191	78	161	159	131	240	101	321
190	81	160	162	130	243	100	324

Note: For averages of 100 or less, calculate handicap this way:

Subtract average from 220 Multiply the answer by 2.7

Throw out the fraction on final answer and use whole number.

Example: Average 97

$$220 - 97 = 123$$

$$123 \times 2.7 = 332.1$$

Three-game handicap is 332
