Project creation ability

NEW, MORE POWERFUL EMAIL ENGINE!

- Users can now create Outlook Folders and link them to Worldox matters to copy or move messages!
- All processing occurs on the Exchange server to increase performance at the desktop!
- Filing from Mobile Devices and Outlook Web App now supported!
- PST File Crawler will background file large data sets into Worldox!
- Global Flag indicates when anyone has filed a message.
- Predictive filing client and matter recommendations now exposed in Outlook message list.

PRODUCTIVITY TOOLS NOW INCLUDED!

- Task & Notify features, formerly only available to Workflow Tools customers, are now built-in.
- Create a Microsoft® Outlook Task from a Worldox document in the file list for important deadline reminders.
- Set up notifications based on audit trail events that can be based on any document metadata!
