

HIGH CARD FLUSH RULES OF PLAY

Object of the game

- There are multiple wagers that may be made by players. The player wants to have a higher ranking flush hand than the dealer to win. Ranking of hands are based on the number of cards of the same suit, then by value of each card.

Game Overview

- "High Card Flush" is a house-banked game played with a standard 52 card deck of playing cards.
- Ranking of hands are based upon the number of cards of the same suit (flush) in the player's or dealers hand.
- Cash wagers will not be accepted. All currency tendered will be exchanged by the Dealer for value chips.
- The Ante and Raise wagers correspond to the player's hand versus the dealer's hand.
- The flush and straight flush wagers are based upon comparing the player's hand to the predetermined payable below. These wagers will remain in action even if the payer folds and forfeits their ante and raise wager.

Betting Limits

- All bets shall be in multiples of \$1.00. Betting limits shall be:

Limits

1 hand:	\$5 to \$100
Flush side bet:	\$1 to \$25
Straight Flush side bet	\$1 to \$25

HIGH CARD FLUSH RULES OF PLAY

- Side Bet limits are as follows:

Rules of the Game

- Players may bet on one betting spot only.
- Players must place an ante wager in order to bet on either, the flush or the straight flush bonus bet.
- After all players have placed their wager, the dealer passes to each player seven cards face down. The deal begins at the first bet and is in a clock-wise motion and ends with giving themselves 7 cards.
- Players cannot look at their cards until the dealer has verified that all cards are accounted for and ensure that the correct number of cards are in play. This verification is performed by the dealer, either by counting down the unused cards for manual shuffle or by ensuring the green light is activated on the automatic shuffler.

HIGH CARD FLUSH RULES OF PLAY

- Each player is required to keep their cards over the table and in full view of the dealer at all times.
- Players may change their discard decision prior to the dealer picking up their discarded cards.
- After examining their cards, each player has the option to either fold their hand and surrender their ante wager by placing their cards on the right side of their ante bet or place a raise wager with the cards they choose to play, underneath the Raise wager. The cards they do not wish to play will be placed on the right of the "Raise" betting spot. If they wish to continue to play, the amount of the Raise wager is limited to the value of the flush. See table below.

Amount of cards in Flush	Amount allowed to Raise
With a 2, 3 or 4 card flush	1X Ante Bet
With a 5 card flush	1X or 2X Ante Bet
With a 6 or 7 card flush	1X or 2X or 3X Ante Bet

- Once all players have acted, by placing their Raise bet, the dealer will then exposes the house hand and determine which cards to play for the best flush hand.
- The dealer and player's hands are compared first by the number of cards in their flush and if they have the same amount of cards in their flush then it will go to the highest ranking cards. (Ace is the highest, two is the lowest)
- If the dealer does not qualify the players will win their ante wager and push their raise wager.
- Dealers qualify with a 3 card 9 high or better flush.
- If a player has a better flush than the dealer, they win and are paid even money on their ante and raise wager.
- If the player's hand is lower than the dealer's hand, the player loses their ante and raise wagers.
- If the player's hand and the dealer's hand are exactly the same (number of cards and ranking of cards). The ante and raise wagers will push.
