

About Bras

■ Underwire Concerns

- It only takes the pressure of a nickle against the skin to stimulate lymphatic flow. Too much pressure/compression can “dam up” breast lymphatics, preventing the emptying of waste products from the breasts.
- Metal can act like an antenna and attract Electro Magnetic Frequency radiation to the breast tissue.

■ Wireless Brands

- Thermogram Center clients report comfort and support with wireless models from these brands:
 - Large Bust: Warner, Wacoal, Third Love, Bali, Lane Bryant
 - Small Bust: Calvin Klein, Coobies
 - Boody Wear – organic bamboo
