Remineralization tips		
Biocompatibility test		
Diet and/or lifestyle changes		

*Consult with your MD or ND before taking homeopathic remedies and/or supplementing with omega 3 EPA and DHA (500mg minimum and from fish oil). Melatonin at night, Vit C IV (25 mg) or Quicksilver Liposomal (1000 units per day under the tongue for 90 seconds, away from food starting the day before of the extraction and keep it for at least 1 week, CBD oil (hold under the tongue 90 seconds) before the extraction at night, and after the extraction 2-3 times per week. We recommend checking the Vit D3/K2 and the A1C before the surgery. Ideally we will want to know what the LDL is as well.
