Sustainability Reporting: An Overview of CDP and GRI Reporting

Sustainability reporting is becoming more widespread and there are many ways to do it. CDP (formerly the Carbon Disclosure Project) and the Global Reporting Initiative (GRI) are two of the most widely known and utilized sustainability reporting systems, both of which see increasing participation every year. This presentation will provide an introduction and overview of these two mainstream reporting systems as well as a comparison.

TIME/DATE:

Tuesday, July 22nd

12:00 to 1:00 p.m.

Check in begins at 11:45 a.m.

PLACE:

The Egg & I, Broomfield Location

About the speaker

Kimberlee Rankin, an associate with Cadmus and the Deputy Lead of Cadmus' Greenhouse Gas & Sustainability Reporting Practice, specializes in carbon accounting and analysis, sustainability reporting, and energy-efficiency program planning and evaluation. Ms. Rankin has managed data collection and calculations for greenhouse gas inventories for several clients including a global Fortune 500 financial company with over 500 offices. She manages CDP responses for multimillion-dollar global companies in a range of sectors, with several of her clients placing in the Carbon Disclosure Leadership Index over multiple years. Ms. Rankin is experienced in corporate sustainability strategy development and sustainability reporting including development within the Global Reporting Initiative (GRI) framework.

Ms. Rankin has a master's degree in environmental management from Duke University, where she led the development of a multi-building, commercial sustainability plan, and a bachelor's degree in environmental studies from the University of Colorado. Ms. Rankin is also a GRI Certified Sustainability Reporter.
