

VIBRA SHAKE™ DUST COLLECTOR

MODELS VS-550, 1200, 1500, 2400,
AND 3000

A self-cleaning collector for intermittent applications where high collection efficiency is essential, such as reclaiming precious metals.

- Two-stage cartridge for high-efficiency filtration on both coarse and fine dusts
- Compact, self-contained collector design allows placement flexibility and saves floor space
- Preassembled for easy, low-cost installation —no need for compressed air
- Selection of inlet size and location for installation flexibility
- Recirculates filtered air saving heating and cooling costs
- Provides a cleaner work environment for maximum productivity
- Reduces plant maintenance costs

VS-550

Vibra Shake cartridge filter features proprietary Pleatloc™ corrugation that assures uniform pleat spacing for better self-cleaning and longer filter life

- Filter screen captures coarse and fibrous particles
- Submicron particulates pass through the filter screen and are trapped by the inner layer of media
- Galvanized outer liner protects filter media
- Easy filter changeout for quicker maintenance

OPERATIONAL EXPLANATION

Automatic mechanical self-cleaning ensures the filter cartridge is cleaned every time the unit is shut off. It does an excellent job more cost effectively, and it does it quietly because of heavy-duty construction, special sound-attenuating material, and a vibration isolation motor mount.

MULTIPLE RATING TABLE
