

## **Schatt and Morgan Model Numbers, 1903 - 1929.**

Many Schatt and Morgan knives did not show model numbers on the knife, but they were a very organized company and produced two detailed catalogs that can be consulted for the model number. You can consult reproductions of the 1903 and 1907 catalogs for Schatt and Morgan and examine very nice pictures of knives with model numbers attached. – such as the 1176 below:

Page 22, 1907 Schatt & Morgan Catalog

The following Exel database (SM-PATTERN-Numbers....see below) was provided by David Clark and provides names for the pattern as well as pages in both catalogs. It was used in the development of the 2011-12 Heritage Series. It will aid you greatly in your search. Those catalogs are available at:
