

72 Hour Checklist

The first 72 hours after release are the most critical to your success.
You can use this checklist as you begin your transition.

Upon release from custody, report to the Parole or Probation office within 24 hours, as ordered by the Court, or as you were previously instructed. If you have questions regarding whether you are under supervision or you don't know where to report, it is your responsibility to contact either Probation or Parole and confirm your supervision status.
