Backend Developer

Want to be part of a fast-growing tech company, specializing in dissemination of academic research?

We are now hiring for a developer position in our headquarters in Glostrup.

About ChronosHub
Founded in 2017, ChronosHub deals with the complex space of research funding and output tracking. The ecosystem is highly fragmented and, in many ways, an old system. ChronosHub was designed to challenge the current state and bring new tools to life, simplifying the process for everyone involved.

Our mission is to bring the stakeholders together. Through a collaborative approach the complexities can be managed, and the processes automated and streamlined. Instead of having thousands of institutions dealing with thousands of publishers, everyone only needs to deal with one party - ChronosHub.

Our clients are international organizations, so we operate with a global outlook. Amongst our clients are The Bill & Melinda Gates Foundation, University of Copenhagen, Emerald Publishing, and The National Library and Research Fund of Luxembourg.

Key responsibilities
As a backend developer, you will be working on developing new features and ensure the scalability and the automation of the systems as well as supporting our clients. In cooperation with the rest of the team, you will refine, estimate, develop, test and document the features that we develop to our customers. You deliver high quality testable code and drive to keep improving working methods, practices and processes.

Experience:
· Several years of experience with web development
· Experience with .NET and .NET Core web development
· Experience in developing SQL Server-based .NET applications

Following is advantage, but not a requirement:
· Experience with REST API development and system integrations
· Knowledge of cloud solutions, e.g. Azure DevOps, AWS.
· Knowledge about Containers: Docker/Kubernetes (Microservice Architecture)

We value raw, natural talent much more than having the 'right' degree - in other words, don't be discouraged to apply for this position just because you don't hold a degree.

Do you see yourself in this job? Please send us your resume and cover letter to Lead Architect, Snorri Valberg, sv@chronoshub.io today and let us know why we shouldn't miss the opportunity to meet you.

This is not a remote position and applicant for employment must have work authorization that does not now or in the future require sponsorship of visa for employment authorization in Denmark and with ChronosHub.

If you have any questions about the job, please feel free to reach out to Lead Architect, Snorri Valberg, sv@chronoshub.io.

We can't wait to hear from you!
