

SouthWest Sun Solar Recognized as Top 500 Solar Contractor in North America

SouthWest Sun Solar nationally ranked after only 2 years since the founding of the company

WESTMINSTER, CA: Solar Power World released its annual list of the Top 500 Solar Contractors on July 26th. SouthWest Sun Solar (SWSS) among other solar players in the industry were recently named to the annual list of North America's top solar contractors. SWSS achieved a rank of 155 out of the Top 500 Solar Contractor in North America. Also, the company ranked 46 out of 2,336 solar companies in California

The Top 500 Solar Contractors List is developed to recognize the work completed by solar contractors across North America. As a young company, only 2 year of age, they have impressive performance on providing jobs in community and bringing solar power to many consumers as they can.

"The companies on this year's list exude solar-business brilliance, and they deserve to be recognized not only for being great companies but also for how their work positively impacts the environment," said Kathie Zipp, managing editor of *Solar Power World*. Solar energy is a renewable resource with great potential to significantly reduce our nation's greenhouse gas emissions, according to the Solar Energy Industries Association, a national solar industry association.

SWSS has employed more than 117 workers, who installed solar for more than 1700 houses since July of 2016. Since its founding in 2014 the company has installed total 8 Megawatt of solar. "We are honored to be selected in a high rank of 2016 Top 500 Solar Contractors in North America. This is a truly reward for our whole team's effort. We'll definitely keep this spirit up and ongoing." Hieu Nguyen – CEO/ founder

SWSS works amid a burgeoning business market. The U.S. solar market is expected to grow 119% this year, according to global research firm GTM Research. While a majority of solar electricity is produced at large, utility-scale solar power plants, the greatest number of solar jobs are located with companies like SouthWest Sun Solar—firms doing the work to bring clean energy to the public.

"No one can deny that local companies are supporting the growth of the solar industry and the economy as a whole," Zipp said. "Our Top Solar Contractors are the face of the industry—meeting homeowners and business leaders on doorsteps every day."
