

FSP Solutions

Functional Service Provider (FSP) means different things to different people because there is no one solution. We can customize each and every workforce solution to take advantage of your legacy systems, established processes and procedures and development pipeline in order to maximize efficiencies without compromising quality.

That's why teaming up with us can be a big advantage. We've created and maintained highly functional teams in clinical and biometric operations for decades, while respecting and integrating each to fit within a unique culture. It all begins with listening to your requirements and devising a customized workforce solution that works for you.

**Customized
Functional Services**

- Governance
- Human Resources
- IT - Hardware and/or Software Provision
- Onboarding Process & Orientation
- Performance Management
- Recruiting/Staffing
- Resource Strategy & Capacity Planning
- Time & Expense Management

Biometrics

- Statistical programming
- Data standards and CDISC
- Biostatistics
- Data management
- Applications development and maintenance

Medical & Safety

- Pharmacovigilance case processing and safety surveillance
- Medical monitoring

The Advantages of Engaging Catalyst's FSP Solutions are Many

- Highly experienced people, our FSP staff average 10+ years
- With a retention rate of 95%, team and program continuity are a given
- Maximize your investment by utilizing your legacy systems and SOPs, or ours
- Our FSP model provides an easy and flexible way to scale up and avoid the expense of underutilized resources or full-time headcount
- Benefit from the knowledge and experience of our industry-leading experts in clinical operations, biometrics and medical and safety
- Line and relationship management to ensure resourcing to forecast; quality, timelines and performance management by metrics
- Open communication, strategic resourcing to long-term planning results in faster turnaround times and ensures resourcing is in place when needed
- We seek to partner with companies that are a good "fit." Strong relationships are critical to making FSP programs successful
