

THE ELEMENTS

ON BALD HEAD ISLAND

In ancient Greece Aristotle believed that four perfect and pure Elements—Air, Earth, Fire and Water—combined to form all matter in the universe. Hippocrates expanded on the idea, using the Elements to characterize the range of moods and temperaments found in each person. A belief that each individual Element needed to be in balance with the others formed the cornerstone of philosophy, science and medicine for 2000 years.

On Bald Head Island, each of the four pure and complementary Elements inspires its own perfectly scaled cottage rimming the island's 10-acre marina.

With stunning views of the Cape Fear River, the four one-bedroom cottages known as Air, Earth, Fire and Water are a quick walk to the shops, restaurants, creek and beach accesses of Harbour Village, and are especially convenient for boaters desiring a comfortable place to stay while docking at the marina.

Designed as a quintessential couple's getaway, each Element features a charming traditional exterior that fits easily within its harbor setting, complete with a cozy porch ideal for enjoying a morning cup of coffee or

late afternoon glass of wine while watching the sun set over the water.

Inside, the fully-furnished cottages offer a comfortable, contemporary interior with a queen-sized bed, roomy full bath and an efficiency kitchen, complete with a microwave and mini-refrigerator. Each unique interior design alludes to its name, with Air featuring calming cool blue and gray tones, in keeping with a summer sky. Earth's color scheme is rich and soothing, with green, brown and ochre employed on the walls, tile and fabrics. Fire's vibrant palette is ripe with mango, orange and cherry, while Water saturates the senses with aquamarine walls, fabrics and accents.

The Elements are positioned on the harbor's edge to enjoy remarkable views of the surrounding marina, river and lighthouse.

AIR

EARTH

FIRE

WATER

The Elements were designed by the late George Graves, a beloved Bald Head Island architect known for his creative detailing and unexpected touches. While their facades remain classic and timeless, the cottages' interior finishes can be described as crisp, unconventional and surprisingly modern.
