

One Way Speed Plow Key Benefits

- **Greater Operator Visibility**
- **Down Pressure Capabilities**
- **Plow Speeds of up to 32 mph.**
- **Wheel guided to enhance wear prevention, as well as contribute to the elimination of top soil disturbance during field ridging**
- **Hydraulic blade roll allows cutting edge to stay as much as 4" above ground level when in roll back position for ridging. The forward roll position allows for down pressure for cutting into hard packed snow drifts**

**PO Box 2980
Tisdale, Sk
S0E 1T0**
