

# ENIGMA ULTRA ML 900 3D

## Features

- One dosing head, with 10 forming tips
- Electronic control
- Smooth control of operating parameters
- Adjustable nozzle angle
- Head roller rotation adjustment
- Adjustable rising table/ smooth movement
- Adjustable tray speed
- Replaceable slats, including ends for different types of dough
- Wire-cutting speed control
- Bi-directional table
- High-quality stainless-steel body
- Mobile unit fitted with castors and brakes
- 3D mode
- Torsional Rollers
- Sealed Hopper Design
- Baking tray size: 18" x 26"

The Ultra ML 900 3D is a fully automated, multifunctional, single-head confectionary machine. It produces a broad variety of cookies in all kinds of forms and shapes. Including muffin and sponge cakes. The Ultra ML 900 3D is also fully equipped with wire-cutting.

Features proprietary 3 dimensional geometric mode. Geometric 3 mode creates virtually unlimited possibilities for different designs and shapes.

Enigma depositors provide proprietary features such as:

- Torsional Rollers: Roller design permits wider range of stiff to soft doughs using the same head.
- Hopper Heads are leak-proof. This allows Enigma's basic head to handle many soft and liquid dough types.

Competitive depositors typically require a different Pump Head (with different rollers) in order to handle semi-liquid or soft doughs.

The Ultra ML 900 3D is robustly engineered for 3 shift operation and is very versatile for producing multiple products:

- Soft gingerbread
- Short pastry tarts
- Sponge cakes (sheet cakes)
- Choux cakes
- Meringues

# ENIGMA ULTRA ML 900 3D

## SPECIFICATIONS

Hopper Capacity-50 Liters (52.8 Qts)

Weight-702 pounds

Power-3 Phase 208/220V, 60 Hz

## Accessories Included

- One rotary strip
- One non-rotary strip (number of exits customer choice)
- One strip for the production of sponge-cake bases (sheet cakes)
- One strip for pea or straw puffs
- Plastic nozzles-various patterns
- Bronze nozzles (customer choice)
- Wire-cutting mechanism
- Strip for wire-cutting
- Pre-programmed 3D patterns
- One set of plugs
- Custom Dies

## Options

- Head pump (for semi-liquid pastry)
- Rotary strip with 5, 7, or 9 exits
- Non-rotary strip with 5, 7, or 9 exits
- Inserts for wire-cutting strip with custom-made shape
- Small trolley to transport head

# PLASTIC NOZZLES

**P-1**

For biscuit production, nozzle diameter 9mm

**P-2**

For freckle cookies, nozzle diameter 13mm

**P-3**

For decoration

**P-4**

For stuffing cookies

**P-5**

For small éclairs production

**P-6**

For big éclairs production

**P-7**

Standard straight round

**P-8**

Standard oblique round

**P-9**

Standard straight serrated

**P-10**

Standard oblique serrated
