Subj: Letter of Recommendation

Dear Mr. Redd,

It is with great pleasure that I write this letter of recommendation. I have worked with REDD Engineering & Construction, Inc. and predecessor REDD entities since the early 1970's.

REDD has consistently performed work that met or exceeded our expectations.

Over our more than 40 year working relationship their services have included relocation / refurbishment / re-erection of process equipment, debottlenecking studies, process optimization, traditional engineering / design services, studies, plant valuations, construction support and startup and OSHA PSM auditing resulting in the ongoing development and implementation of Foreland's Safe Operations Management (SOM) system adopting many of the PSM guidelines but tailored to our size and needs.

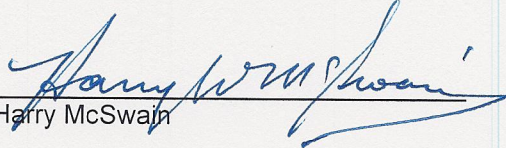

REDD personnel bring with them not only the technical know how, which you expect, but also the practical experience that make their solutions appropriate for the task and don't try to make the task appropriate for their solution.

REDD onsite personnel have consistently handled themselves professionally and, when work is complete, left our site impeccable.

Therefore, based on my experience I would recommend REDD to others and intend to continue to use REDD for future work.

Best regards,

Foreland Refining Corporation

Harry McSwain
