Eclipse Consulting and Technical Services has migrated their Business software suite to the internet. Now your business can access a successful Business software suite at cost savings. The Eclipse Cloud based suite provides businesses with several benefits:

Accessibility

All you need is an internet-connected device to access our cloud software and do your work online. Mobile app access is also available, to ensure your employees can be productive even on the go. This anytime, anywhere access approach is one of the main reasons for the growing popularity of SaaS software.

Cost Savings

You can save a significant amount of money by subscribing to our cloud based package compared to investing in an on-premise solution which includes heavy upfront costs for installation, maintenance, and upgrades of the IT infrastructure. On-premise software also needs administration, power expenses and IT requirements. Businesses of all sizes look to minimize operational expenses and our Cloud system can fit in your plans admirably. With Eclipse Consulting's Cloud Business, Suite , you simply pay for what you need and use, and you can eschew all the unnecessary "bells and whistles" that you are not likely to utilize. Do not think that cloud computing is only for large enterprises. Our Cloud based Business Suite is very affordable even for smaller companies.

Reliability

Eclipse Consulting's Cloud Business software is just as reliable as our on-premise solution. Eclipse Consulting provides customers access to the system any time of the day or night with no interruption in service. You can thus save your IT resources for other important tasks.

Easy Manageability

As mentioned earlier, Eclipse Consulting administers, manages, and maintains the software and infrastructure. You don't have to worry about updates and upgrades as these are done automatically by Eclipse. Thus, you can enjoy the advantage of simply accessing and using the web-based software, services, and applications without worrying about managing them.

Upgradeability

Eclipse Consulting handles software and hardware updates. This can free up your IT employees' time and they can focus on other work such as integrating the Eclipse Cloud solution with your existing systems to expand its usability and effectiveness.

Competitive Edge

You can boost your competitive edge in the market with Eclipse Consulting's cloud software. The solutions allow you to deliver and deploy critical business applications speedily and without major upfront costs. You can stop thinking about technology and concentrate on your vital business objectives and activities. In short, Eclipse Consulting's Cloud Solution can minimize the time you need to market new services and applications.

Scalability

Eclipse Consulting's Cloud software can scale easily to meet your company's growth and greater demands. You can easily add more users and features when necessary. With on-premise software, you would have to shell out for additional software licenses and server capacity. You can save these costs with a cloud system.

ABI

Are you a land, sea or air broker [PAUSE=1] or a self-filing importer, [PAUSE=2] Then you know how much the world has changed in the past few years [PAUSE=1] - timelines are tighter, compliance requirements are stricter and margins are slimmer. Does it all make you feel like your current ABI application was designed for a world that doesn't exist anymore?

Eclipse Consulting has the ABI solution for your business. Eclipse Consulting provides either Standalone solution, for those companies wanting an in house Solution or A cloud based option for those wanting to reduce overall equipment costs. Eclipse provides a solution for AIR and SEA Brokers, Border Brokers and if for self-filers, an import solution.
