

Our Internet-based ABI Solution was developed to be a fast and user-friendly system that is superior to our competitors' solutions. Compete with brokers of any size – Technology is a critical component of being both competitive and efficient in today's environment. Eclipse's Cloud Based ABI includes features that can directly impact your bottom line: Web-tracking, e-billing, email notifications, one screen for the entry, plus several tools that let you minimize computer time and maximize time with your prospects.

Well Supported by the Eclipse Consulting support team. Eclipse Consulting can also provide consulting services to review your entire import process and provide further assistance. Eclipse can create interfaces with several 3rd party applications including systems for freight forwarding, accounting, inventory, dispatch and ERP, to streamline client operations.

Eclipse's Cloud Based ABI is a powerful, Software as a Service (SaaS) application that facilitates timesaving, Customs-compliant importation of goods into the United States

Since we are the service provider, you can concentrate on your business, not on "I.T.". There are cost saving benefits to partnering with a service provider:

- More frequent backups
- Faster delivery of new technologies (we only need to update one system)
- Protection from obsolescence (you won't have to replace or be tied to an expensive file server)
- Lower Costs (no special hardware/software to buy or maintain, no I.T. Staff required)
- Built-in Disaster Recovery (we maintain and protect your data)
- Faster Implementation (no hardware/software to install on-site)
- Native Remote Access (connect from any internet enabled PC)
- High Reliability and World class security
