# Bulk Const Screws

## Bronze Star 9 3"

Sold in: 1 lb and 5 lb jars

When you are Buying and Selling Bulk Construction Fasteners you need software that can bring in a **1200 lb palette of fasteners** and convert that purchase into a saleable package.

For this example we have bought Bronze Star Screws 9 "3" in a palette that has 1200 lbs of screws. When you buy, ProTrac will use the Palette cost and when you sell it ProTrac will convert the product so you can sell by the lb.

**With ProTrac you can sell 1 screw, a pound of screws or 30 lbs of screws.**

**ProTrac will keep an accurate count.**

**This document is aimed at selling bulk screws that you have prepackaged.**

### OPTION

ProTrac can also track screws or bolts in what is known as a "LOT Tracking" – If you sell bolts that have to be a specific hardness, you can track them with ProTrac's LOT software. This lets you keep track of a series of bolts from a specific vendor. If something is wrong with that fastener you can easily identify who know has purchased them from you.

**If you were to order this product today the minimum would be 20 palates or 24,000 lbs**

Each Fastener Nail or Screw would have its base unit for buying and selling established. Once set up, you seldom have to touch the information. Just buy and sell and ProTrac will take care of the item's information. If your vendor has minimum poundage, units, or dollars that have to be on their order, ProTrac manages this process.

Now the Screw has been set up it is time to create a kit for a 1 lb and 5 lb product to get this product out the door.

## Bulk Const Screws Bronze Star 9 3”

When you set up a kit item in ProTrac you would next go to create a kit in ProTrac’s Utility Program.

The Kit Utility program is displayed at the top of the next Page.

ProTrac has both a “K” kit to sell the jar of screws or you can set up a “G” with sale items that you are fire-sale-ing, but still have to account for in ProTrac.

# Bulk Const Screws Bronze Star 9 3"

**Concept:** A Kit is normally made outside of the normal item picking area. A Picking ticket is created at the time it is keyed to give the warehouse time to prepare the KIT and to get it out with the rest of the order.

If there are other items on the order the sales rep would keep on keying those lines on the order. ProTrac will create a 2<sup>nd</sup> pick ticket for non-Kit products.

3	ZZZ	LABOR CHARGE	LABOR CHARGE		20	0	
Totals:					140		

**ProTrac creates the KIT Pick Ticket. Once the pick ticket is created the Sales person can go on adding items to the order.**

This order was only for the 20 – 5 lb jars of nails.

**Note: the Kit is not mentioned on the invoice just the line of inventory.**

This same process is used no matter if the KIT has 2 items or 25 items in the kit.

Once it has been set up, you can forget it and let ProTrac maintain your cost of the item. If the price has changed for any one of the items, ProTrac would ask you, in Order Entry, if you wanted to update the cost.
