Making Childbirth Safer in Haiti

Haiti has the highest rates of maternal and infant mortality in the Western Hemisphere. We’re working to change that.

Access to skilled attendance before, during, and after childbirth is the single most critical intervention to ensure safe motherhood and infant survival. In Haiti, where only 25% of rural women have access to skilled care, too many women and babies are dying from preventable causes. You can help:

1. **VOLUNTEER**
   Midwives, OB/GYNS, L&D Nurses and NPs needed to help teach our students.

2. **DONATE**
   Tax-deductible donations directly support our programs in Haiti.

3. **ADVOCATE**
   Share our story, follow us on social media, and fundraise for us.

---

**Skilled Birth Attendant Training**
12-month education program for Haitian nurses meets WHO guidelines

**Mobile Prenatal Clinic**
6,000+ patient visits delivered annually to 22 remote villages

**Reaching Rural Mothers + Babies**
Hospital Ste. Therese, the Carrie Wortham Birth Center, and our Matròn Outreach Program make birth safer for rural families
