

FOR IMMEDIATE RELEASE

Heat Transfer Sales Gives Percentage of Sales to Hurricane Relief *Company believes in neighbors helping neighbors*

(Greensboro, NC –October 4, 2018)—Heat Transfer Sales of the Carolinas (<http://www.heattransfersales.com>) announced today that they are sending the first donations out to communities affected by Hurricane Florence. The company has committed 2.5% of equipment and parts sales from all hurricane-related replacement equipment to go to charitable organizations helping in the affected areas.

The first check this week in the amount of \$1,500 will go to NourishNC (<https://nourishnc.org/>). The organization is a non-profit that provides hungry children with healthy food. In the aftermath of Florence, they are focusing on hurricane-affected areas. The second check in the amount of \$1,000 will go to the Junior League of Wilmington, NC (<http://www.jlwnc.org/>). The organization will be sponsoring families who have been referred by community partners to help them with recovery after Florence.

“We believe in neighbors helping neighbors,” said Jeff Vestal, president of Heat Transfer Sales of the Carolinas. “As people in our states begin the rebuilding and repair processes after this hurricane, we are committed to not only getting commercial buildings back in working order, but also to give back to affected communities. As a small business in the Carolinas, we want to do our part to help.”

Several of the company’s manufacturing partners have agreed to assist with the donation efforts, including Taco Comfort Solutions, Raypak, and Bock Water Heaters. The program will apply to all hurricane-related replacement parts and equipment sold from September 14 through December 31, 2018. The company will release donation checks monthly to a variety of local organizations assisting with relief and recovery efforts.

About Heat Transfer Sales of the Carolinas
