Pre+Probiotics™

DIGESTIVE & GUT HEALTH

Prebiotic fiber and probiotic strain synbiotic blend

Love your gut! The Pre+probiotics pixie is a proprietary synbiotic blend that helps your body's gastrointestinal tract work more efficiently. Supported by science, this balanced blend focuses on providing key probiotic bacteria to support the development of a healthy microbiome, together with prebiotic fiber to act as bacterial nutrition for the added probiotics.*

Product Features

- A blend of five probiotic strains of bacteria supported by two prebiotic fibres*.
- Three lactobacillus strains and two bifidobacterium strains provide a balance of probiotic functionality*.
- Two prebiotic fibers, FOS and inulin, provide support for growth of the probiotic bacteria to improve gastrointestinal colonization*.
- The blend of five strains gives a total of 20 billion units per serving. These bacteria have also been protected using the Microbac™ proprietary technology, which studies have shown provide the equivalent of five times the effective colonization*.
- Microbac protection also ensures shelf stability, so no refrigeration is required*.
- Low-GI sugar (palatinose) together with zero-calorie stevia provide diet-friendly sweetness*.
- Naturally flavored, colored and sweetened.
- Made in the U.S.A. according to rigorous FDA GMP standards.*

KEY BENEFITS

Pre+probiotics pixies provide a number of key benefits*

- 15X more effective than standard capsules*
- Aids healthy gastrointestinal flora*
- Improves digestive function*
- Restores healthy bacteria*
- Reduces bloating and intestinal gas production*
