GO

SUGAR-FREE ENERGY

GO is a hydrating, sugar-free, electrolyte-enhanced water additive with amazing taste and no jitters

Your engine runs out of fuel and you slow down almost to a crawl. Your body is a machine, and the fuel is the nutrients you put into it. We're all busy, and we tend to compromise nutrition for convenience. And we all know that candy bar — however delicious! — doesn't fuel you properly.

GO is packed with essential nutrients your body needs to give you the most energy throughout your day. The best part? It's not packed with harmful sugars or synthetic caffeine, and it's supremely tasty.

Product Features

BIOPERINE® — BioPerine, a special extract from black pepper, is what's known as a "bioavailability enhancer." It's been clinically proven to optimize — by 25-45% — your body's access to the critical elements of a supplement. BioPerine is so effective and unique that it's been granted a U.S. patent.

GUARANA — This plant not only helps keep you energized, it helps with your body's metabolism, breaking down foods and helping your body extract more energy from them.

YERBA MATE — A botanical that is not only packed with antioxidants that help free your body from free radicals, it's also loaded with nutrients and natural caffeine, and it's been associated with beneficial effects on mood.

NIACIN — Key for a healthy heart. Also known as vitamin B3, niacin can help lower cholesterol, and it stimulates blood flow throughout your cardiovascular system.

PANTOTHENIC ACID — This helps break down sugar in your

KEY BENEFITS

Infused with vitamins and natural (not synthetic- caffeine, GO provides a smooth, crash-free energy experience you can count on every time.

GO

SUGER-FREE ENERGY

system, turning it into energy instead of love handles. It also has a hand in burning fat and utilizing protein properly.

VITAMIN B6 & B12 — Probably the best-known of the vitamins because many people don't get enough. And that's a shame, because these vitamins are no friends of fat cells, and they play key roles in clearing your mind and rebuilding brain cells.

MAGNESIUM — A powerful electrolyte essential for enzymes and energy production. It regulates all that natural caffeine we just talked about, so it helps with the stability of your energy, keeping those levels level.

SODIUM — Another powerful electrolyte. When we sweat, we lose sodium, and we need to replace it to help with regulation of the nervous system, muscle use, and cellular development. (Sorry: The salt from french fries doesn't count.)

POTASSIUM — This electrolyte packs a mighty punch, helping regulate kidney health, insulin levels, muscle growth and pretty much every other organ. Yeah, it's important.

HYDRATION

Is it really possible to put all these things in powdered form (without sugar) and make it taste great? It's possible, because we did it. Using naturally sweet ingredients, GO is packed with energy-supporting nutrients, and it's incredibly simple to use and to share!

Additional Ingredient Information

Store in a cool, dry place, away from direct sunlight.
