Join us and attend NSBE's 46th Annual Convention!

The 46th Annual Convention is a four-day event every March. Starting on Wednesday and ending Sunday morning, the convention hosts over 14,000 attendees, 300+ booths and a 3,000+ person general session. It is at this meeting that the Society conducts its organizational business, elects national and regional leaders, conducts competitions and provides professional and personal development, networking and celebratory activities for its attendees. This convention also features three mini-conferences with content tailored for specific attendees.

Dates: March 25-29, 2020

Location: San Antonio, TX at the Henry B. González Convention Center

Theme: #NSBE46: Engineering the Revolution

The 2020 Annual Convention marks a pivotal time in the history of our Society. As we return to Region V for #NSBE46, it is noteworthy that we will be five years away from the year 2025, at the halfway mark of the journey to our 10K Goal. To reach our goal of graduating 10,000 Black Engineers annually by 2025, we must be strategic, we must be creative, and we must be radical. It is time to revolutionize NSBE's work and the NSBE experience.

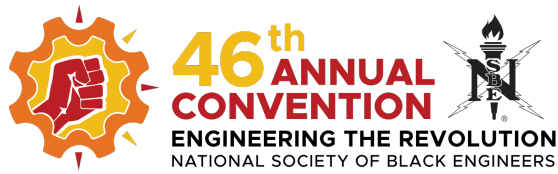

#NSBE46: Engineering the Revolution offers our members a historical experience to engage with the community, in hopes of strengthening the bond between NSBE and the city of San Antonio, the home of the legendary landmark The Alamo and the city's most popular attraction, the San Antonio RiverWalk. The 46th Annual Convention, hosted in the Henry B. González Convention Center, will inspire a personal revolution, a cultural revolution, a societal revolution and engagement in the current industrial revolution.

Personal Revolution:

Maximizing membership opportunities
Year-round workforce preparedness
Professional development opportunities
Focus: Succeed Professionally

Cultural Revolution:

Challenging status quos within our community
Cultural Responsibility workshops/forums

Embracing the uniqueness of our culture
Focus: Culturally Responsible

Societal Revolution:

Continuous NSBE leader development
 Increased NSBE Senate engagement
 Outreach/community engagement
Focus: Positively Impact the Community

Industrial Revolution:

Innovation and technical excellence
 Engineering solutions to real-world issues
 Enhance technical skills through major/topic specific (interactive) workshops
Focus: Excel Academically
