

2019 Dekalb Street Construction Project

PROJECT UPDATE

August 29, 2019

The contractor has completed all utility work on the project, and the utility crew has mobilized away from the project. The contractor will bring in a grading crew next week (9/3/19) to install the remaining gravel base and prepare the roadway for concrete installation.

The grading crew will continue the gravel base construction from the East Fallwood Road Intersection up to Highway 19/71. Upon completion of the gravel base, the contractor will install curb & gutter along the Dekalb Street roadway. Concrete driveway approaches, sidewalk, and trails will be constructed upon completion of the curb and gutter.

Residents on the 300 block of Dekalb Street should continue to access their homes from the Cook Street intersection.
