

2019 Dekalb Street Construction Project

PROJECT UPDATE September 20, 2019

The contractor is proposing to install curb and gutter on Monday, September 23, and continue through Wednesday, September 25. During this time access to the frontage roads will **ONLY** be available from Dekalb Street. The frontage roads will not be accessible from the Meadow Lane, Cook Street, Fallwood Road, or Second Street intersections.

Residents of the frontage roads should access their homes via a temporary gravel ramp located near the center of their respective frontage road that will allow access to Dekalb Street. Residents will then be able to access the side streets (Meadow Lane, Cook Street, Fallwood Road, or Second Street) via Dekalb Street. Please feel free to share this information with your neighbors.

Once the concrete apron is poured on each respective end of the frontage road, 7 days of cure time will be needed before traffic will be allowed on the concrete aprons. Residents should continue to use the temporary gravel ramps to access Dekalb Street during the 7-day cure time. A new notification will be sent out when the frontage road aprons will be open to traffic.

Please note that Dekalb Street will be **extremely** busy with contractor personnel and equipment during construction of the concrete. Please proceed with caution when entering or exiting the construction zone.
