

The Skull and Bones - Yale University

The occult Bush family 'dossier'

When Saddam Hussein talked of 'the devil Bush' he may not have been so far from the truth. U.S. president George W. Bush, his father and grandfather are proven initiates of this multi-generational occult lodge. George W. was tapped (initiated) in 1968 at the group's Yale University HQ, a mausoleum known as 'the tomb'.

Adolf Hitler was also obsessed with the occult, in his case the Thule Society. The Jolly Roger, "der Todtenkopf" was an emblem of Hitler's SS. If the Nazis' occult lodges had been exposed and shut down, not treated as a taboo, millions of lives could have been saved. The second world war need never have happened. Unless you want this occult order running a totalitarian West and their 'New World Order' - please - do your bit to expose the George W. Bush and the bonesmen.

Death's Head: Piracy, Plunder and Foreign Policy

by Douglas Herman - May 22, 2003

<http://www.strike-the-root.com/>

Where is the justice of political power if it executes the murderer and jails the plunderer, and then itself marches upon neighboring lands, killing thousands and pillaging the very hills? ~ Kahlil Gibran

Piracy is a poor type of foreign policy.

The lawless practice of seizing ships for commercial gain that plagued the coasts of the Americas in the late 17th century seems to have evolved into the outright seizure of ships

of state in the 21st century. When Bartholomew Roberts, a man of some principle, captured 400 ships in four short years of piracy before being killed in battle, he skirted the law of man, preemptively striking his prey, yet doubtful he ever justified his actions before God.

Blackbeard flourished for one short year toward the end of the Golden Age of Piracy (1689-1718), seizing some 40 ships before being killed in bloody, hand-to-hand battle at Ocracoke Inlet in 1718. Perhaps had he been born later and served aboard the USN aircraft carrier Abraham Lincoln, for example, Captain Edward Teach could have helped capture an entire vassal state without so much as risking his neck (he was beheaded). One man's act of piracy for selfish gain is another man's grand, patriotic act.

"The line between officially sanctioned acts and actual piracy was always a fine one," said Libby Klekowski, a biologist researching Captain Kidd's excursion into the Connecticut River. Historical documents list well over 500 English "pirates, buccaneers, corsairs" independently attacking "targets of opportunity." Privateers like Morgan and Drake acted under the sanction of sovereign states, ostensibly raiding enemy shipping under the aegis of exploration while sharing the plunder with king or queen. That fine line between legality and acts of piracy often got a man knighted—Sir Francis Drake, Sir Henry Morgan—or hung from the neck, if not beheaded in battle.

The conquest of Iraq by seizing command of the skies and seas, surrounding her and outgunning this lumbering warship of a country with broadsides represents the capture of a trophy ship by a buccaneer. The treasure beneath the sands of Iraq—black gold in the form of billions of barrels of oil—exceeds in value all the gold from all the fleets of Spanish galleons that ever sailed. Seen from the perspective of a 17th century buccaneer, the Bush/Cheney/Rumsfeld foreign policy of plundering countries on the high seas makes good economic sense. All that is lacking is legality and a suitable pirate banner.

The glyphic devices of Christopher Moody's banner (pictured above), while designed in the early 18th century, perhaps best symbolizes occupied Iraq. The winged hourglass symbolizes the fleeting notion of liberty, or, if you prefer, the insistent, never-ending search for WMD. The upraised arm symbolizes tyranny both past, present and to come, while the grinning skull symbolizes victims, both American and Iraqi, of depleted radiation poison or perhaps only the mocking of our moral ambiguity.

The black flag, death's head, jolly Roger or skull and crossbones still flies prominently—although hardly visibly—from the ship of American foreign policy as she plows through uncharted waters. Truthfully, the days of swashbuckling pirates never really died in North America but became more secretive, sinister and—some say—far more dangerous. The flag of convenience hoisted by our captains of industry, banking, law, military and media (or propaganda) resembles not Old Glory but the death's head pictured to the left (322). While you and I sing garbled stanzas to the Stars and Stripes, the most powerful men in America salute the death's head banner of a secret society at Yale University in Connecticut.

"Those on the inside know it as The Order. Others have known it for more than 150 years as Chapter 322," said Antony C. Sutton, author of the book, *America's Secret Establishment*, a revealing look inside the Skull and Bones Society. "It was also once known as 'The Brotherhood of Death,'" Sutton added. "The power of the place remains

unmistakable To rival institutions and academic reformers there was something irritating and disquieting about old Yale College .”

Disquieting? Consider our last three presidents, whether Republican or Democrat, attended Yale and, not coincidentally, the “terror expert” governing Iraq , Paul Bremer III, is another Yale insider. Former CIA Director James Woolsey, who lauded the approach of "World War IV," John Bolton and Lewis Libby, all Yale. All powerful. Disquieting.

The elite and powerful, some say altogether sinister, cult of the Skull and Bones Society—think of the masked revelers in the movie “Eyes Wide Shut”—traces its origins back to Germany . From there the philosophy of an all-powerful state, sharing many of the same tenets and rituals of the Third Reich, took root with the WASPs of New England, many of whom could trace their roots, ironically, to buccaneer brethren. Not surprisingly, the Nazis adopted a parallel vision, decorating the military badges (shown at left) of their SS special forces with a death’s head lifted, as was that of Yale’s Skull and Bones Society, from the existing flags and symbols of piracy, murder and mayhem.

While many Bonesmen of Yale downplay the symbolism and fascist pageantry that occurs in the windowless meeting hall—known as “The Tomb”—as nothing more than youthful merriment and harmless initiation rites, some critics see a darker side, suggesting the “double cross” of the black flag signifies a truer ambition, similar to the more explicit motto of the Israeli intelligence agency, Mossad—“By way of deceit, thou shalt make war.”

Examples of subverted, occupied, undermined or double-crossed nations lend weight to those who contend a US conspiracy for unlimited global power is well underway. “Between 1945 and now, the US has never stopped being at war with the world. For 58 years, there has never been a single year in which it has not bombed and occupied another country, and in most years, it has attacked two or more countries at the same time,” said Professor of English literature, Uzma Khan. “I haven’t even touched upon America’s non-military, CIA-backed interference in the governance of sovereign countries all over the world,” she added.

Doug Henwood, author of *Spooks In Blue*, said, “There is something profoundly undemocratic about the culture The CIA’s Yale is the Yale of secret societies, like the infamous Skull and Bones, whose alumni fill the Agency.” By contrast to the eastern elites playing at pirate, playing at spy, helming a ship with a madman’s eye, let us pause to consider a buccaneer who actually lived and died by a code, by principles yet foreign to our jingoist’s mode of saluting the death’s head, but usually attired in black tie while lesser worlds explode.

Article 1—“Every man has a vote in affairs of moments; has equal title to the fresh provisions, or strong liquors at any time seized, and may use them at pleasure, unless a scarcity makes it necessary, for the good of all, to vote a retrenchment,” wrote Bartholomew Roberts in his Articles. Notice the almost Jeffersonian phrases at beginning and end. Recall that these Articles—eleven in all—were written long before the US Constitution, and since then have not been improved upon but rather eroded by those who would sail us into a war in the name of God, while play-acting at pirate.

Will we Americans simply be remembered by the world as just another band of pirates?

Bigger but no better? Toward the end of the Golden Age of Pirates, the repercussions of resentment by land dwellers eventually overtook most of these buccaneers; those not killed in battle were captured and hung. Bartholomew Roberts, killed in 1722. Blackbeard 1718. Captain Kidd, hung by the neck and then allowed to rot, in 1701. The difference between pirates and those who play at being pirates is that the swashbuckler risked his own neck. Antony Sutton said of the modern pretender: "These prominent men are really immature juveniles at heart. The horrible reality is that these little boys have been dominant in world affairs. No wonder we have wars and violence."

Nowadays we may find ourselves charmed by the legends of buccaneers while overlooking the reality, and yet some legends offer a colorful story and a moral lesson as well. While the banner of Calico Jack Rackham (left) resembles the flag of the world champion NFL Buccaneers of Tampa Bay (home of CentCom), Calico Jack became known as much for his crew as for his exploits. Legendary lady pirate, Ann Bonny, a quick-triggered cutthroat attired in trousers, fought alongside Jack and may have been his mistress. When their ship was attacked in 1720, Rackham and many of his men fled to the hold while Ann Bonny and another woman, Mary Read, remained on deck and resisted their captors. Pregnant, the two women avoided the gallows, and Bonny witnessed the execution of Calico Jack. "I'm sorry to see you here, Jack," she said, "but if you'd have fought like a man you needn't hang like a dog."

And perhaps if we conducted ourselves like men, instead of spoiled, rich kids playing at pirate, the world wouldn't snarl at us like dogs.

White House 'Bonesman' Leads Nation Into the Dark

By Alexandra Robbins

USA TODAY

http://www.truthout.org/docs_02/11.05A.robbins.bones.htm

Wednesday, 25 September, 2002

"My senior year (at Yale University) I joined Skull and Bones, a secret society," President Bush wrote in his autobiography, "so secret, I can't say anything more."

He doesn't have to. He's practically turning the government into a secret society - an old-boy, throwback establishment that even holds its secret spy-court proceedings in an elaborately locked, windowless room that sounds similar to the Bones' elaborately locked, practically windowless "tomb," or campus clubhouse.

Bush, a loyal and particularly active member of Skull and Bones, a mysterious, historically misogynist Yale-based secret society, seems to have done almost all he can to promote a level of secrecy in government not seen since the Nixon administration:

* Last month, Bush-appointed Assistant Attorney General Robert McCallum, a member of Bush's 1968 Skull and Bones class, filed pleadings in U.S. District Court seeking to extend executive privilege to any government official in pardon cases; the move makes information on presidential pardons more secret than it has ever been.

* After 9/11, without initially telling Congress, Bush assembled a shadow government assigned to secret bunkers somewhere on the East Coast. He also tried to cut off some members of Congress from classified information about the anti-terrorist campaign.

* The USA Patriot Act Bush eagerly signed lets the FBI - with permission from a secret Washington "spy court" - view some customer records; store owners cannot reveal the review

* In October 2001, Attorney General John Ashcroft released a memo encouraging federal agencies to withhold as much information as possible from the public.

* A month later, just before documents from the Reagan-Bush administration were to be released, Bush signed an executive order severely hindering public access to former presidents' records.

* Bush also signed legislation that jails or fines journalists who publish sensitive leaks, essentially reviving the Official Secrecy Act that President Clinton vetoed.

Bush has a "fetish for secrecy," Vanderbilt University professor emeritus Hugh Davis Graham, now deceased, told the National Journal earlier this year.

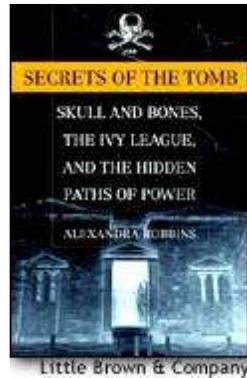

Granted, pressing issues of national security merit a level of secrecy. But security and secrecy are not always necessary companions, and some of these examples suggest secrecy for secrecy's sake, such as the pardons and the Reagan documents. Also, a government that operates in secret prevents its constituents from holding it accountable and so may be more prone to arbitrariness and ill-considered conduct. This administration may even be doing itself a disservice with its excess secrecy, which can cause people to conjure up much more malicious and elitist scenarios than may actually exist.

That is what has happened with Skull and Bones, which operates a powerful alumni network but, despite the lore, does not run a secret world government, collaborate with Nazis or require initiates to lie naked in a coffin.

Bonesmen have long helped Bush; he received a fair chunk of his early business financing from them and turned to them for help when he needed a job, investors and campaign assistance. Even his baseball-team purchase involved at least one Bonesman. As president, Bush has appointed fellow Bonesmen to high-level positions, such as Edward McNally, the general counsel of the Office on Homeland Security and senior associate counsel on national security. Yet, although one of his first social gatherings at the White House was a Skull and Bones reunion, Bush feigned ignorance when asked recently about Bones: "The thing is so secret that I'm not even sure it still exists," he replied.

Is it a coincidence that the federal government suddenly prioritizes secrecy when a Skull and Bones president is in power? Maybe. But there's no question that the Bush administration increasingly resembles the Bones' dark, locked tomb.

Skull and Bones, the Ivy League, and the Hidden Paths of Power

THE TODAY SHOW

<http://www.msnbc.com/news/802773.asp?cp1=1>

Sept. 4 — Inside a cold, foreboding structure of brown sandstone in New Haven, Conn., lives one of the most heavily shrouded secret societies in American history.

Yale's super-elite Skull and Bones, a 200-year-old organization whose roster is stocked with some of the country's most prominent families: Bush, Harriman, Phelps, Rockefeller, Taft, and Whitney. Journalist Alexandra Robbins, herself a member of another of Yale's secret societies, interviewed more than a hundred Bonesmen and writes about the rituals that make up the organization. Read an excerpt from her book 'The Secrets of the Tomb' below.

Skull and Bones, the Ivy League, and the Hidden Paths of Power by Alexandra Robbins

THE LEGEND OF SKULL AND BONES

Sometime in the early 1830s, a Yale student named William H. Russell—the future valedictorian of the class of 1833—traveled to Germany to study for a year. Russell came from an inordinately wealthy family that ran one of America's most despicable business organizations of the nineteenth century: Russell and Company, an opium empire. Russell would later become a member of the Connecticut state legislature, a general in the Connecticut National Guard, and the founder of the Collegiate and Commercial Institute in New Haven. While in Germany, Russell befriended the leader of an insidious German secret society that hailed the death's head as its logo. Russell soon became caught up in this group, itself a sinister outgrowth of the notorious eighteenth-century society the Illuminati. When Russell returned to the United States, he found an atmosphere so Anti-Masonic that even his beloved Phi Beta Kappa, the honor society, had been unceremoniously stripped of its secrecy. Incensed, Russell rounded up a group of the most promising students in his class—including Alphonso Taft, the future secretary of war, attorney general, minister to Austria, ambassador to Russia, and father of future president William Howard Taft—and out of vengeance constructed the most powerful secret society

the United States has ever known.

Yale's secret society exposed

September 4, 2002 — Journalist and author Alexandra Robbins discusses her book “Secrets of the Tomb: Skull and Bones, the Ivy League, and the Hidden Paths of Power” with “Today’s” Ann Curry.

The men called their organization the Brotherhood of Death, or, more informally, the Order of Skull and Bones. They adopted the numerological symbol 322 because their group was the second chapter of the German organization and founded in 1832. They worshiped the goddess Eulogia, celebrated pirates, and plotted an underground conspiracy to dominate the world.

Fast-forward 170 years. Skull and Bones has curled its tentacles into every corner of American society. This tiny club has set up networks that have thrust three members into the most powerful political position in the world. And the group’s influence is only increasing—the 2004 presidential election might showcase the first time each ticket has been led by a Bonesman. The secret society is now, as one historian admonishes, “an international mafia’ . . . unregulated and all but unknown.” In its quest to create a New World Order that restricts individual freedoms and places ultimate power solely in the hands of a small cult of wealthy, prominent families, Skull and Bones has already succeeded in infiltrating nearly every major research, policy, financial, media, and government institution in the country. Skull and Bones, in fact, has been running the United States for years.

Skull and Bones cultivates its talent by selecting members from the junior class at Yale University, a school known for its strange, Gothic elitism and its rigid devotion to the past. The society screens its candidates carefully, favoring Protestants and, now, white Catholics, with special affection for the children of wealthy East Coast Skull and Bones members. Skull and Bones has been dominated by about two dozen of the country’s most prominent families—Bush, Bundy, Harriman, Lord, Phelps, Rockefeller, Taft, and Whitney among them—who are encouraged by the society to intermarry so that its power is consolidated. In fact, Skull and Bones forces members to confess their entire sexual histories so that the club, as a eugenics overlord, can determine whether a new Bonesman will be fit to mingle with the bloodlines of the powerful Skull and Bones dynasties. A rebel will not make Skull and Bones; nor will anyone whose background in any way indicates that he will not sacrifice for the greater good of the larger organization.

As soon as initiates are allowed into the “tomb,” a dark, windowless crypt in New Haven with a roof that serves as a landing pad for the society’s private helicopter, they are sworn to silence and told they must forever deny that they are members of this organization. During initiation, which involves ritualistic psychological conditioning, the juniors wrestle in mud and are physically beaten—this stage of the ceremony represents their “death” to the world as they have known it. They then lie naked in coffins, masturbate, and reveal to the society their innermost sexual secrets. After this cleansing, the Bonesmen give the initiates robes to represent their new identities as individuals with a higher purpose. The society anoints the initiate with a new name, symbolizing his rebirth and rechristening as Knight X, a member of the Order. It is during this initiation that the new members are

introduced to the artifacts in the tomb, among them Nazi memorabilia—including a set of Hitler’s silverware—dozens of skulls, and an assortment of decorative tchotchkes: coffins, skeletons, and innards. They are also introduced to “the Bones whore,” the tomb’s only full-time resident, who helps to ensure that the Bonesmen leave the tomb more mature than when they entered.

Members of Skull and Bones must make some sacrifices to the society—and they are threatened with blackmail so that they remain loyal—but they are remunerated with honors and rewards, including a graduation gift of \$15,000 and a wedding gift of a tall grandfather clock. Though they must tithe their estates to the society, each member is guaranteed financial security for life; in this way, Bones can ensure that no member will feel the need to sell the secrets of the society in order to make a living. And it works: No one has publicly breathed a word about his Skull and Bones membership, ever.

Bonesmen are automatically offered jobs at the many investment banks and law firms dominated by their secret society brothers. They are also given exclusive access to the Skull and Bones island, a lush retreat built for millionaires, with a lavish mansion and a bevy of women at the members’ disposal.

The influence of the cabal begins at Yale, where Skull and Bones has appropriated university funds for its own use, leaving the school virtually impoverished. Skull and Bones’ corporate shell, the Russell Trust Association, owns nearly all of the university’s real estate, as well as most of the land in Connecticut. Skull and Bones has controlled Yale’s faculty and campus publications so that students cannot speak openly about it. “Year by year,” the campus’s only anti-society publication stated during its brief tenure in 1873, “the deadly evil is growing.”

The year in the tomb at Yale instills within members an unwavering loyalty to Skull and Bones. Members have been known to stab their Skull and Bones pins into their skin to keep them in place during swimming or bathing. The knights (as the student members are called) learn quickly that their allegiance to the society must supersede all else: family, friendships, country, God. They are taught that once they get out into the world, they are expected to reach positions of prominence so that they can further elevate the society’s status and help promote the standing of their fellow Bonesmen.

This purpose has driven Bonesmen to ascend to the top levels of so many fields that, as one historian observes, “at any one time The Order can call on members in any area of American society to do what has to be done.” Several Bonesmen have been senators, congressmen, Supreme Court justices, and Cabinet officials. There is a Bones cell in the CIA, which uses the society as a recruiting ground because the members are so obviously adept at keeping secrets. Society members dominate financial institutions such as J. P. Morgan, Morgan Stanley Dean Witter, and Brown Brothers Harriman, where at one time more than a third of the partners were Bonesmen. Through these companies, Skull and Bones provided financial backing to Adolf Hitler because the society then followed a Nazi—and now follows a neo-Nazi—doctrine. At least a dozen Bonesmen have been linked to the Federal Reserve, including the first chairman of the New York Federal Reserve. Skull and Bones members control the wealth of the Rockefeller, Carnegie, and Ford families.

Skull and Bones has also taken steps to control the American media.

Two of its members founded the law firm that represents the New York Times. Plans for both Time and Newsweek magazines were hatched in the Skull and Bones tomb. The society has controlled publishing houses such as Farrar, Straus & Giroux. In the 1880s, Skull and Bones created the American Historical Association, the American Psychological Association, and the American Economic Association so that the society could ensure that history would be written under its terms and promote its objectives. The society then installed its own members as the presidents of these associations.

Under the society's direction, Bonesmen developed and dropped the nuclear bomb and choreographed the Bay of Pigs invasion. Skull and Bones members had ties to Watergate and the Kennedy assassination. They control the Council on Foreign Relations and the Trilateral Commission so that they can push their own political agenda. Skull and Bones government officials have used the number 322 as codes for highly classified diplomatic assignments. The society discriminates against minorities and fought for slavery; indeed eight out of twelve of Yale's residential colleges are named for slave owners while none are named for abolitionists. The society encourages misogyny: it did not admit women until the 1990s because members did not believe women were capable of handling the Skull and Bones experience and because they said they feared incidents of date rape. This society also encourages grave robbing: deep within the bowels of the tomb are the stolen skulls of the Apache chief Geronimo, Pancho Villa, and former president Martin Van Buren.

Finally, the society has taken measures to ensure that the secrets of Skull and Bones slip ungraspable like sand through open fingers. Journalist Ron Rosenbaum, who wrote a long but not probing article about the society in the 1970s, claimed that a source warned him not to get too close.

"What bank do you have your checking account at?" this party asked me in the middle of a discussion of the Mithraic aspects of the Bones ritual.

I named the bank. "Aha," said the party. "There are three Bonesmen on the board. You'll never have a line of credit again.

They'll tap your phone. They'll. . . ." . . . The source continued: "The alumni still care. Don't laugh. They don't like people tampering and prying. The power of Bones is incredible. They've got their hands on every lever of power in the country. You'll see—it's like trying to look into the Mafia."

In the 1980s, a man known only as Steve had contracts to write two books on the society, using documents and photographs he had acquired from the Bones crypt. But Skull and Bones found out about Steve. Society members broke into his apartment, stole the documents, harassed the would-be author, and scared him into hiding, where he has remained ever since. The books were never completed. In Universal Pictures' thriller *The Skulls* (2000), an aspiring journalist is writing a profile of the society for the New York Times. When he sneaks into the tomb, the Skulls murder him.

The real Skull and Bones tomb displays a bloody knife in a glass case. It is said that when a Bonesman stole documents and threatened to publish society secrets if the members did not pay him a determined amount of money, they used that knife to kill him.

This, then, is the legend of Skull and Bones. It is astonishing that so many people continue

to believe, even in twenty-first-century America, that a tiny college club wields such an enormous amount of influence on the world's only superpower. The breadth of clout ascribed to this organization is practically as wide-ranging as the leverage of the satirical secret society the Stonecutters introduced in an episode of *The Simpsons*. The Stonecutters theme song included the lyrics:

Who controls the British crown?
Who keeps the metric system down? We do! We do. . .
Who holds back the electric car?
Who makes Steve Guttenberg a star? We do! We do.

Certainly, *Skull and Bones* does cross boundaries in order to attempt to stay out of the public spotlight. When I wrote an article about the society for the *Atlantic Monthly* in May 2000, an older Bonesman said to me, "If it's not portrayed positively, I'm sending a couple of my friends after you." After the article was published, I received a telephone call at my office from a fellow journalist, who is a member of *Skull and Bones*.

He scolded me for writing the article—"writing that article was not an ethical or honorable way to make a decent living in journalism," he condescended—and then asked me how much I had been paid for the story.

When I refused to answer, he hung up. Fifteen minutes later, he called back.

"I have just gotten off the phone with our people." "Your people?" I snickered.

"Yes. Our people." He told me that the society demanded to know where I got my information.

"I've never been in the tomb and I did nothing illegal in the process of reporting this article," I replied.

"Then you must have gotten something from one of us. Tell me whom you spoke to. We just want to talk to them," he wheedled. "I don't reveal my sources."

Then he got angry. He screamed at me for a while about how dishonorable I was for writing the article. "A lot of people are very despondent over this!" he yelled. "Fifteen Yale juniors are very, very upset!" I thanked him for telling me his concerns.

"There are a lot of us at newspapers and at political journalism institutions," he coldly hissed. "Good luck with your career"—and he slammed down the phone.

Skull and Bones, particularly in recent years, has managed to pervade both popular and political culture. In the 1992 race for the Republican presidential nomination, Pat Buchanan accused President George Bush of running "a *Skull and Bones* presidency."

In 1993, during Jeb Bush's Florida gubernatorial campaign, one of his constituents asked him, "You're familiar with the *Skull and Crossbones Society*?" When Bush responded, "Yeah, I've heard about it," the constituent persisted, "Well, can you tell the people here what your family membership in that is? Isn't your aim to take control of the United States?" In January 2001, *New York Times* columnist Maureen Dowd used *Skull and Bones* in a simile: "When W. met the press with his choice for attorney general, John Ashcroft, before Christmas, he vividly showed how important it is to him that his White House be as leak-proof as the *Skull & Bones* 'tomb.'"

That was less than a year after the Universal Pictures film introduced the secret society to a new demographic perhaps uninitiated into the doctrines of modern-day conspiracy theory. Not long before the movie was previewed in theaters—and perhaps in anticipation of the election of George W. Bush—a letter was distributed to members from Skull and Bones headquarters. “In view of the political happenings in the barbarian world,” the memo read, “I feel compelled to remind all of the tradition of privacy and confidentiality essential to the well-being of our Order and strongly urge stout resistance to the seductions and blandishments of the Fourth Estate.” This vow of silence remains the society’s most important rule. Bonesmen have been exceedingly careful not to break this code of secrecy, and have kept specific details about the organization out of the press. Indeed, given the unusual, strict written reminder to stay silent, members of Skull and Bones may well refuse to speak to any member of the media ever again.

But they have already spoken to me. When? Over the past three years. Why? Perhaps because I am a member of one of Skull and Bones’ kindred Yale secret societies. Perhaps because some of them are tired of the Skull and Bones legend, of the claims of conspiracy theorists and some of their fellow Bonesmen. What follows, then, is the truth about Skull and Bones. And if this truth does not contain all of the conspiratorial elements that the Skull and Bones legend projects, it is perhaps all the more interesting for that fact. The story of Skull and Bones is not just the story of a remarkable secret society, but a remarkable society of secrets, some with basis in truth, some nothing but fog. Much of the way we understand the world of power involves myriad assumptions of connection and control, of cause and effect, and of coincidence that surely cannot be coincidence.

A death cult at the heart of the United States establishment? Impossible surely? But look a little closer and you'll see that seems to be exactly what George W Bush's family club, the order of Skull and Bones, is. Known variously as 'Bonesmen', 'The Order' and 'The Russell Trust Association', George W.Bush's father and grandfather were both initiated into this 'society' who's badge is a skull and cross bones with the lodge number 322 below it.

Lodge 322 is believed to have been founded on June 28th 1832. And the Skull and Bones are believed to have a commemoration ceremony on 28th June every year. This year (2002) on this date George W. Bush was relieved of his presidency for several hours, Dick Cheney took over running the world's only superpower while Bush was 'undergoing hospital tests'.

If the Nazis' occult Thule Society had been exposed in the twenties millions might not have died - I would like to see the 'Bonesmen' and any other secret groups hungry for power fully exposed as unfit to hold positions of public responsibility.

Author and researcher Antony Sutton died earlier this year on June 17th 2002. He was a British born émigré to the USA and spent much of his academic time researching links from the US establishment and business world to fascism and communism. Particularly enlightening is his research on the financing of the Nazi party which he attributed to Wall street bankers - see his book 'Wall Street and the Rise of Hitler'. Sutton was a research fellow at the Hoover Institution, Stanford University, from 1968 to 1973. He was a former economics professor at California State University, Los Angeles. He was born in London in 1925 and educated at the universities of London, Gottingen and California.

In September 1977 an article appeared in the US magazine Esquire. Sutton explains it detailed much of the mumbo-jumbo associated with the Bonesmen. When a new member is initiated into the order "Tonight", he is told, "he will die to the world and be born again into The Order as he will thenceforth refer to it. The Order is a world unto itself in which he will have a new name and fourteen new blood brothers, also with new names."

When Rosenbaum starts to enquire about The Order he is told: "They don't like people tampering and prying. The power of Bones is incredible. They've got their hands on every lever of power in the country. You'll see - it's like trying to look into the Mafia. Remember, they're secret society too."

The Washington Post broached the subject on 25th February 2000 - 'Shred This After Reading!' Lloyd Grove called the article:

"Before George W. Bush was a good ol' boy, he was a member of Skull and Bones. Author Ron Rosenbaum calls this club "the most powerful of all secret societies in the strange Yale secret-society system." Its roster includes Averell Harriman, Henry Stimson, Henry Luce, Sen. John Kerry (D-Mass.) and Dubya's dad, former president George Bush. They all engaged in "certain occult rituals of the ruling class," as Rosenbaum writes, in a windowless mausoleum on Yale's New Haven, Conn., campus."

"Although the club dates back to the mid-19th century, Hollywood has just discovered it. "The Skulls," written and produced by D.C. native and Yale grad John Pogue, premieres next month. The movie portrays a sinister conspiracy, a la John Grisham's "The Firm," in which sons of the power elite have their flesh branded with a skull and crossbones, and keep the society's secrets on pain of death. The real Skull and Bones has a similar mania for secrecy, but that didn't stop us from casting a wide net for the reactions of "Bonesmen" to this crass vulgarization of their sacred brotherhood. Dubya and Kerry didn't return our calls, but we managed to talk to a few."

"Washington writer Christopher Buckley told us: "Don't quote me, or I shall have to come and kill you, burn down your house and rape your dog!" Former Yale chaplain William Sloane Coffin said the real thing was bad enough without resorting to Hollywood spin: "It strikes me that if anybody wants to make fun of it in such a gross way, that lets Skull and Bones off the hook." And Oklahoma University President and former senator David Boren cautioned: "Make sure you say that when you asked me about this, I gasped and threw the telephone on the floor. There was never any branding. I'm much too chicken to belong to anything that requires your flesh to be burned. Officially, my response is silence.""

Finally here's a two year old interview from Time magazine with Bush happily admitting his family are in the cult. Extracted from: 'My Heritage Is Part Of Who I Am', by Walter Isaacson, Time Magazine, August 7th 2000 (Time Volume 156, No. 6),

.....ISAACSON: But you sure shared a lot of the same upbringing: Andover, Yale, even Skull and Bones. Did you have any qualms, say, about joining an elite secret club like Bones?

GEORGE W. BUSH: No qualms at all. I was honored. I was fairly nonchalant. I didn't view it as a great heritage thing. I didn't take it all that seriously.

ISAACSON: Demystify it a bit for those who might think it's a cross between a Masonic Lodge and the Trilateral Commission. Did your father show up for your initiation, like your grandfather showed up for his?

GEORGE W. BUSH: Without revealing all the great secrets? I got a few of my old club mates who could demystify it right off the bat. My dad didn't tap me. Someone a year ahead of me tapped me. There was an entry celebration. I can't remember whether my dad showed up or not. I don't think so.....

Chapter 7 ~ Skull and Bones: The Racist Nightmare at Yale

``Wise statesmen ... established these great self-evident truths, that when in the distant future some man, some faction, some interest, should set up the doctrine that none but rich men, or none but white men, were entitled to life, liberty and the pursuit of happiness, their posterity should look up again at the Declaration of Independence and take courage to renew the battle which their fathers began...." -- Abraham Lincoln --

1. Honeymoon

The U.S. Navy delivered George Bush back home for good on Christmas Eve, 1944; the war in the Pacific raged on over the next half year, with Allied forces taking Southeast Asia, the Netherlands East Indies (Indonesia), and islands such as Iwo Jima and Okinawa.

Barbara Pierce quit Smith College in her sophomore year to marry George. Prescott and

Mother Bush gave a splendid pre-nuptial dinner at the Greenwich Field Club. The wedding took place January 6, 1945, in the Rye, New York Presbyterian Church, as the U.S. Third Fleet bombarded the main Philippine island of Luzon in preparation for invasion. Afterwards there was a glamorous reception for 300 at Appawamis Country Club. The newlyweds honeymooned at The Cloisters, a five-star hotel on Sea Island, Georgia, with swimming, tennis and golf.

George's next assignment was to train pilots at Norfolk, Virginia Naval Air Station. ``George's duty ... was light. As for other young marrieds, whose husbands were between warzone tours, this was kind of an extended (and paid) honeymoon."@s2

Japan surrendered in August. That fall, George and Barbara Bush moved to New Haven where Bush entered Yale University. He and Barbara moved into an apartment at 37 Hillhouse Avenue, across the street from Yale President Charles Seymour.

College life was good to George, what he saw of it. A college career usually occupies four years. But we know that George Bush is a rapidly moving man. Thus he was pleased with the special arrangement made for veterans, by which Yale allowed him to get his degree after attending classes for only two and a half years.

Bush and his friends remember it all fondly, as representatives of the Fashionable Set: ``[M]embers of [Bush's] class have since sighed with nostalgia for those days of the late 1940s.... Trolley cars still rumbled along the New Haven streets. On autumn afternoons they would be crowded with students going out to football games at the Yale Bowl, scattering pennies along the way and shouting `scramble' to the street kids diving for them"[emphasis added].@s3

In 1947, Barbara gave birth to George W. Bush, the President's namesake.

By the time of his 1948 graduation, he had been elected to Phi Beta Kappa, an honor traditionally associated with academic achievement. A great deal is known about George Bush's career at Yale, except the part about books and studies. Unfortunately for those who would wish to consider his intellectual accomplishment, everything about that has been sealed shut and is top secret. The Yale administration says they have turned over to the FBI custody of all of Bush's academic records, allegedly because the FBI needs such access to check the resume; of important office holders.

From all available testimony, his mental life before college was anything but outstanding. His campaign literature claims that, as a veteran, Bush was ``serious" at Yale. But we cannot check exactly how he achieved election to Phi Beta Kappa, in his abbreviated college experience. Without top secret clearance, we cannot consult his test results, read his essays, or learn much about his performance in class. We know that his father was a trustee of the university, in charge of ``developmental" fundraising. And his family friends were in control of the U.S. secret services.

A great deal is known, however, about George Bush's status at Yale.

His fellow student John H. Chafee, later a U.S. Senator from Rhode Island and Secretary of the Navy, declared: ``We didn't see much of him because he was married, but I guess my first impression was that he was--and I don't mean this in a derogatory fashion--in the inner set, the movers and shakers, the establishment. I don't mean he put on airs or anything, but ... just everybody knew him."

Chafee, like Bush, and Dan Quayle, was in the important national fraternity, Delta Kappa Epsilon (DKE or the "Dekes"). But Chafee says, "I never remember seeing him there. He wasn't one to hang around with the fellows."

2. The Tomb

George Bush, in fact, passed his most important days and nights at Yale in the strange companionship of the senior-year Skull and Bones Society.

Out of those few who were chosen for Bones membership, George was the last one to be notified of his selection--this honor is traditionally reserved for the highest of the high and mighty.

His father, Prescott Bush, several other relatives and partners, and Roland and Averell Harriman, who sponsored the Bush family, were also members of this secret society.

The undoubted political and financial power associated with Skull and Bones has given rise to many popular questions about the nature and origin of the group. Its members have fed the mystery with false leads and silly speculations.

The order was incorporated in 1856 under the name "Russell Trust Association." By special act of the state legislature in 1943, its trustees are exempted from the normal requirement of filing corporate reports with the Connecticut Secretary of State.

As of 1978, all business of the Russell Trust was handled by its lone trustee, Brown Brothers Harriman partner John B. Madden, Jr. Madden started with Brown Brothers Harriman in 1946, under senior partner Prescott Bush, George Bush's father.

Each year, Skull and Bones members select ("tap") 15 third-year Yale students to replace them in the senior group the following year. Graduating members are given a sizeable cash bonus to help them get started in life. Older graduate members, the so-called "Patriarchs," give special backing in business, politics, espionage and legal careers to graduate Bonesmen who exhibit talent or usefulness.

The home of Skull and Bones on the Yale campus is a stone building resembling a mausoleum, and known as "the Tomb." Initiations take place on Deer Island in the St. Lawrence River (an island owned by the Russell Trust Association), with regular reunions on Deer Island and at Yale. Initiation rites reportedly include strenuous and traumatic activities of the new member, while immersed naked in mud, and in a coffin. More important is the "sexual autobiography": The initiate tells the Order all the sex secrets of his young life. Weakened mental defenses against manipulation, and the blackmail potential of such information, have obvious permanent uses in enforcing loyalty among members.

The loyalty is intense. One of Bush's former teachers, whose own father was a Skull and Bones member, told our interviewer that his father used to stab his little Skull and Bones pin into his skin to keep it in place when he took a bath.

Members continue throughout their lives to unburden themselves on their psycho-sexual thoughts to their Bones Brothers, even if they are no longer sitting in a coffin. This has been the case with President George Bush, for whom these ties are reported to have a deep personal meaning. Beyond the psychological manipulation associated with

freemasonic mummery, there are very solid political reasons for Bush's strong identification with this cult.

Observers of Skull and Bones, apologists and critics alike, have accepted various deceptive notions about the order. There are two outstanding, among these falsehoods:

1) that it is essentially an American group, an assembly of wealthy, elite "patriots"; it is in fact, an agency for British Empire penetration and subversion of the American republic; and

2) that it is somehow the unique center of conspiratorial control over the United States. This misconception is certainly understandable, given the rather astonishing number of powerful, historically important and grotesquely anti-human individuals, who have come out of Skull and Bones. But there are in fact congruent organizations at other Ivy League colleges, which reflect, as does Skull and Bones, the over-arching oligarchical power of several heavily intermarried financier families.

The mistaken, speculative notions may be corrected by examining the history of Skull and Bones, viewed within the reality of the American Eastern Establishment.

Skull and Bones--the Russell Trust Association--was first established among the class graduating from Yale in 1833. Its founder was William Huntington Russell of Middletown, Connecticut. The Russell family was the master of incalculable wealth derived from the largest U.S. criminal organization of the nineteenth century: Russell and Company, the great opium syndicate.

There was at that time a deep suspicion of, and national revulsion against, freemasonry and secret organizations in the United States, fostered in particular by the anti-masonic writings of former U.S. President John Quincy Adams. Adams stressed that those who take oaths to politically powerful international secret societies cannot be depended on for loyalty to a democratic republic.

But the Russells were protected as part of the multiply-intermarried grouping of families then ruling Connecticut (see accompanying chart). The blood-proud members of the Russell, Pierpont, Edwards, Burr, Griswold, Day, Alsop and Hubbard families were prominent in the pro-British party within the state. Many of their sons would be among the members chosen for the Skull and Bones Society over the years.

The background to Skull and Bones is a story of Opium and Empire, and a bitter struggle for political control over the new U.S. republic.

Samuel Russell, second cousin to Bones founder William H., established Russell and Company in 1823. Its business was to acquire opium from Turkey and smuggle it into China, where it was strictly prohibited, under the armed protection of the British Empire.

The prior, predominant American gang in this field had been the syndicate created by Thomas Handasyd Perkins of Newburyport, Massachusetts, an aggregation of the self-styled "blue bloods" or Brahmins of Boston's north shore. Forced out of the lucrative African slave trade by U.S. law and Caribbean slave revolts, leaders of the Cabot, Lowell, Higginson, Forbes, Cushing and Sturgis families had married Perkins siblings and children. The Perkins opium syndicate made the fortune and established the power of these families. By the 1830s, the Russells had bought out the Perkins syndicate and made Connecticut the

primary center of the U.S. opium racket. Massachusetts families (Coolidge, Sturgis, Forbes and Delano) joined Connecticut (Alsop) and New York (Low) smuggler-millionaires under the Russell auspices.

**** Certain of the prominent Boston opium families, such as Cabot and Weld, did not affiliate directly with Russell, Connecticut and Yale, but were identified instead with Harvard.**

John Quincy Adams and other patriots had fought these men for a quarter century by the time the Russell Trust Association was set up with its open pirate emblem--Skull and Bones.

With British ties of family, shipping and merchant banking, the old New England Tories had continued their hostility to American independence after the Revolutionary War of 1775-83. These pretended conservative patriots proclaimed Thomas Jefferson's 1801 presidential inauguration ``radical usurpation."

The Massachusetts Tories (``Essex Junto") joined with Vice President Aaron Burr, Jr. (a member of the Connecticut Edwards and Pierpont families) and Burr's cousin and law partner Theodore Dwight, in political moves designed to break up the United States and return it to British allegiance.

The U.S. nationalist leader, former Treasury Secretary Alexander Hamilton, exposed the plan in 1804. Burr shot him to death in a duel, then led a famous abortive conspiracy to form a new empire in the Southwest, with territory to be torn from the U.S.A. and Spanish Mexico. For the ``blue bloods," the romantic figure of Aaron Burr was ever afterwards the symbol of British feudal revenge against the American republic.

The Connecticut Tory families hosted the infamous Hartford Convention in 1815, toward the end of the second war between the U.S. and Britain (the War of 1812). Their secessionist propaganda was rendered impotent by America's defensive military victory. This faction then retired from the open political arena, pursuing instead entirely private and covert alliances with the British Empire. The incestuously intermarried Massachusetts and Connecticut families associated themselves with the British East India Company in the criminal opium traffic into China. These families made increased profits as partners and surrogates for the British during the bloody 1839-42 Opium War, the race war of British forces against Chinese defenders.

Samuel and William Huntington Russell were quiet, wary builders of their faction's power. An intimate colleague of opium gangster Samuel Russell wrote this about him:

While he lived, no friend of his would venture to mention his name in print. While in China, he lived for about twenty-five years almost as a hermit, hardly known outside of his factory [the Canton warehouse compound] except by the chosen few who enjoyed his intimacy, and by his good friend, Hoqua [Chinese security director for the British East India Company], but studying commerce in its broadest sense, as well as its minutest details. Returning home with well-earned wealth he lived hospitably in the midst of his family, and a small circle of intimates. Scorning words and pretensions from the bottom of his heart, he was the truest and staunchest of friends; hating notoriety, he could always be

absolutely counted on for every good work which did not involve publicity.

The Russells' Skull and Bones Society was the most important of their domestic projects ``which did not involve publicity."

A police-blotter type review of Russell's organization will show why the secret order, though powerful, was not the unique organ of ``conspiracy" for the U.S. Eastern Establishment. The following gentlemen were among Russells' partners:

- Augustine Heard (1785-1868): ship captain and pioneer U.S. opium smuggler.
- John Cleve Green (1800-75): married to Sarah Griswold; gave a fortune in opium profits to Princeton University, financing three Princeton buildings and four professorships; trustee of the Princeton Theological Seminary for 25 years.
- Abiel Abbott Low (1811-93): his opium fortune financed the construction of the Columbia University New York City campus; father of Columbia's president Seth Low.
- John Murray Forbes (1813-98): his opium millions financed the career of author Ralph Waldo Emerson, who married Forbes's daughter, and bankrolled the establishment of the Bell Telephone Company, whose first president was Forbes's son.
- Joseph Coolidge: his Augustine Heard agency got \$10 million yearly as surrogates for the Scottish dope-runners Jardine Matheson during the fighting in China; his son organized the United Fruit Company; his grandson, Archibald Cary Coolidge, was the founding executive officer of the Anglo-Americans' Council on Foreign Relations.
- Warren Delano, Jr.: chief of Russell and Co. in Canton; grandfather of U.S. President Franklin Delano Roosevelt.
- Russell Sturgis: his grandson by the same name was chairman of the Baring Bank in England, financiers of the Far East opium trade.

Such persons as John C. Green and A.A. Low, whose names adorn various buildings at Princeton and Columbia Universities, made little attempt to hide the criminal origin of their influential money. Similarly with the Cabots, the Higginsons and the Welds for Harvard. The secret groups at other colleges are analogous and closely related to Yale's Skull and Bones.

Princeton has its ``eating clubs," especially Ivy Club and Cottage Club, whose oligarchical tradition runs from Jonathan Edwards and Aaron Burr through the Dulles brothers. At Harvard there is the ultra-blue-blooded Porcelian (known also as the Porc or Pig club); Theodore Roosevelt bragged to the German Kaiser of his membership there; Franklin Roosevelt was a member of the slightly ``lower" Fly Club.

A few of the early initiates in Skull and Bones went on to careers in obvious defiance of the order's oligarchical character; two such were the scientists Benjamin Silliman, Jr. (Skull and Bones 1837), and William Chauvenet (Skull and Bones 1840). This reflects the continued importance of republican factions at Yale, Harvard and other colleges during the middle three decades of the nineteenth century. Silliman and Chauvenet became enemies of everything Skull and Bones stood for, while the Yale secret group rapidly conformed to the Russells' expectations.

Yale was the northern college favored by southern slaveowning would-be aristocrats. Among Yale's southern students were John C. Calhoun, later the famous South Carolina

defender of slavery against nationalism, and Judah P. Benjamin, later Secretary of State for the slaveowners' Confederacy.

Young South Carolinian Joseph Heatly Dulles, whose family bought their slaves with the money from contract-security work for the British conquerors in India, was in a previous secret Yale group, the "Society of Brothers in Unity." At Yale Dulles worked with the Northern secessionists and attached himself to Daniel Lord; their two families clove together in the fashion of a gang. The Lords became powerful Anglo-American Wall Street lawyers, and J.H. Dulles's grandson was the father of Allen Dulles and John Foster Dulles.

In 1832-33 Skull and Bones was launched under the Russell pirate flag.

Among the early initiates of the order were Henry Rootes Jackson (S&B 1839), a leader of the 1861 Georgia Secession Convention and post-Civil War president of the Georgia Historical Society (thus the false accounts of the "good old slavery days" and the "bad northern invaders"); John Perkins, Jr. (S&B 1840), chairman of the 1861 Louisiana Secession Convention, who fled abroad for 13 years after the Civil War; and William Taylor Sullivan Barry (S&B 1841), a national leader of the secessionist wing of the Democratic Party during the 1850s, and chairman of the 1861 Mississippi Secession Convention.

Alphonso Taft was a Bonesman alongside William H. Russell in the Class of 1833. As U.S. Attorney General in 1876-77, Alphonso Taft helped organize the backroom settlement of the deadlocked 1876 presidential election. The bargain gave Rutherford B. Hayes the presidency (1877-81) and withdrew the U.S. troops from the South, where they had been enforcing blacks' rights.

Alphonso's son, William Howard Taft (S&B 1878), was U.S. President from 1909 to 1913. President Taft's son, Robert Alphonso Taft (S&B 1910), was a leading U.S. Senator after World War II; his family's Anglo-Saxon racial/ancestral preoccupation was the disease which crippled Robert Taft's leadership of American nationalist "conservatives."

Other pre-Civil War Bonesmen were:

- William M. Evarts (S&B 1837): Wall Street attorney for British and southern slaveowner projects, collaborator of Taft in the 1876 bargain, U.S. Secretary of State 1877-81;
- Morris R. Waite (S&B 1837): Chief Justice of the U.S. Supreme Court 1874-88, whose rulings destroyed many rights of African-Americans gained in the Civil War; he helped his cohorts Taft and Evarts arrange the 1876 presidential settlement scheme to pull the rights-enforcing U.S. troops out of the South;
- Daniel Coit Gilman (S&B 1852): co-incorporator of the Russell Trust; founding president of Johns Hopkins University as a great center for the racialist eugenics movement;
- Andrew D. White (S&B 1853): founding president of Cornell University; psychic researcher; and diplomatic cohort of the Venetian, Russian and British oligarchies;
- Chauncey M. Depew (S&B 1856): general counsel for the Vanderbilt railroads, he helped the Harriman family to enter into high society.

By about the mid-1880s, the Skull and Bones membership roster began to change from its earlier, often ``scholarly," coloration; the change reflected the degradation of American political and economic life by imperialist, neo-pagan and racialist ideology.

Irving Fisher (S&B 1888) became the racialist high priest of the economics faculty (Yale professor 1896-1946), and a famous merchant of British Empire propaganda for free trade and reduction of the non-white population. Fisher was founding president of the American Eugenics Society under the financial largesse of Averell Harriman's mother.

Gifford Pinchot (S&B 1889) invented the aristocrats' ``conservation" movement. He was President Theodore Roosevelt's chief forester, substituting federal land-control in place of Abraham Lincoln's free-land-to-families farm creation program. Pinchot's British Empire activism included the Psychological Research Society and his vice-presidency of the first International Eugenics Congress in 1912.

Helping Pinchot initiate this century's racialist environmentalism were his cohorts George W. Woodruff (S&B 1889), Teddy Roosevelt's Assistant Attorney General and Acting Interior Secretary; and Henry Solon Graves (S&B 1892), chief U.S. forester 1910-20. Frederick E. Weyerhaeuser (S&B 1896), owner of vast tracts of American forest, was a follower of Pinchot's movement, while the Weyerhaeuser family were active collaborators of British-South African super-racist Cecil Rhodes. This family's friendship with President George Bush is a vital factor in the present environmentalist movement.

With Henry L. Stimson (S&B 1888) we come to the Eastern Liberal Establishment which has ruled America during the twentieth century. Stimson was President Taft's Secretary of War (1911-13), and President Herbert Hoover's Secretary of State (1929-33). As Secretary of War (1940-45), this time under President Harry Truman, Stimson pressed Truman to drop the atomic bomb on the Japanese. This decision involved much more than merely ``pragmatic" military considerations. These Anglophiles, up through George Bush, have opposed the American republic's tradition of alliance with national aspirations in Asia; and they worried that the invention of nuclear energy would too powerfully unsettle the world's toleration for poverty and misery. Both the U.S. and the Atom had better be dreaded, they thought.

The present century owes much of its record of horrors to the influential Anglophile American families which came to dominate and employ the Skull and Bones Society as a political recruiting agency, particularly the Harrimans, Whitneys, Vanderbilts, Rockefellers and their lawyers, the Lords and Tafts and Bundys.

The politically aggressive Guaranty Trust Company, run almost entirely by Skull and Bones initiates, was a financial vehicle of these families in the early 1900s. Guaranty Trust's support for the Bolshevik and Nazi revolutions overlapped the more intense endeavors in these fields by the Harrimans, George Walker and Prescott Bush a few blocks away, and in Berlin.

Skull and Bones was dominated from 1913 onward by the circles of Averell Harriman. They displaced remaining traditionalists such as Douglas MacArthur from power in the United States.

For George Bush, the Skull and Bones Society is more than simply the British, as opposed to the American, strategic tradition. It is merged in the family and personal network within

which his whole life has been, in a sense, handed to him prepackaged.

3. Britain's Yale Flying Unit

During Prescott Bush's student days, the Harriman set at Yale decided that World War I was sufficiently amusing that they ought to get into it as recreation. They formed a special Yale Unit of the Naval Reserve Flying Corps, at the instigation of F. Trubee Davison. Since the United States was not at war, and the Yale students were going to serve Britain, the Yale Unit was privately and lavishly financed by F. Trubee's father, Henry Davison, the senior managing partner at J.P. Morgan and Co. At that time, the Morgan bank was the official financial agency for the British government in the United States. The Yale Unit's leader was amateur pilot Robert A. Lovett. They were based first on Long Island, New York, then in Palm Beach, Florida.

The Yale Unit has been described by Lovett's family and friends in a collective biography of the Harriman set:

Training for the Yale Flying Unit was not exactly boot camp. Davison's father ... helped finance them royally, and newspapers of the day dubbed them ``the millionaires' unit." They cut rakish figures, and knew it; though some dismissed them as dilettantes, the hearts of young Long Island belles fluttered at the sight....

[In] Palm Beach ... they ostentatiously pursued a relaxed style. ``They were rolled about in wheel chairs by African slaves amid tropical gardens and coconut palms," wrote the unit's historian.... ``For light exercise, they learned to glance at their new wristwatches with an air of easy nonchalance".... [Lovett] was made chief of the unit's private club, the Wags, whose members started their sentences, ``Being a Wag and therefore a superman"....

Despite the snide comments of those who dismissed them as frivolous rich boys, Lovett's unit proved to be daring and imaginative warriors when they were dispatched for active duty in 1917 with Britain's Royal Naval Air Service.

Lovett was transferred to the U.S. Navy after the U.S. joined Britain in World War I.

The Yale Flying Unit was the glory of Skull and Bones. Roland Harriman, Prescott Bush and their 1917 Bonesmates selected for 1918 membership in the secret order these Yale Flying Unit leaders: Robert Lovett, F. Trubee Davison, Artemus Lamb Gates, and John Martin Vorys. Unit flyers David Sinton Ingalls and F. Trubee's brother, Harry P. Davison (who became Morgan vice chairman), were tapped for the 1920 Skull and Bones.

Lovett did not actually have a senior year at Yale: ``He was tapped for Skull and Bones not on the Old Campus but at a naval station in West Palm Beach; his initiation, instead of being conducted in the `tomb' on High Street, occurred at the headquarters of the Navy's Northern Bombing Group between Dunkirk and Calais."

Some years later, Averell Harriman gathered Lovett, Prescott Bush and other pets into the utopian oligarchs' community a few miles to the north of Palm Beach, called Jupiter Island (see Chapter 4).

British Empire loyalists flew right from the Yale Unit into U.S. strategymaking positions:

- F. Trubee Davison was Assistant U.S. Secretary of War for Air from 1926 to 1933. David S. Ingalls (on the board of Jupiter Island's Pan American Airways) was meanwhile Assistant Secretary of the Navy for Aviation (1929-32). Following the American Museum of Natural History's Hitlerite 1932 eugenics congress, Davison resigned his government Air post to become the Museum's president. Then, under the Harriman-Lovett national security regime of the early 1950s, F. Trubee Davison became Director of Personnel for the new Central Intelligence Agency.
- Robert Lovett was Assistant Secretary of War for Air from 1941-45.
- Lovett's 1918 Bonesmate Artemus Gates (chosen by Prescott and his fellows) became Assistant Secretary of the Navy for Air in 1941. Gates retained this post throughout the Second World War until 1945. Having a man like Gates up there, who owed his position to Averell, Bob, Prescott and their set, was quite reassuring to young naval aviator George Bush; especially so, when Bush would have to worry about the record being correct concerning his controversial fatal crash.

4. Other Important Bonesmen

Richard M. Bissell, Jr. was a very important man to the denizens of Jupiter Island.

He graduated from Yale in 1932, the year after the Harrimanites bought the island. Though not in Skull and Bones, Bissell was the younger brother of William Truesdale Bissell, a Bonesman from the class of 1925. Their father, Connecticut insurance executive Richard M. Bissell, Sr., had put the U.S. insurance industry's inside knowledge of all fire-insured industrial plants at the disposal of government planners during World War I.

The senior Bissell, a powerful Yale alumnus, was also the director of the Neuro-Psychiatric Institute of the Hartford Retreat for the Insane; there, in 1904, Yale graduate Clifford Beers underwent mind-destroying treatment which led this mental patient to found the Mental Hygiene Society, a major Yale-based Skull and Bones project. This would evolve into the CIA's cultural engineering effort of the 1950s, the drugs and brainwashing adventure known as "MK-Ultra."

Richard M. Bissell, Jr. studied at the London School of Economics in 1932 and 1933, and taught at Yale from 1935 to 1941. He then joined Harriman's entourage in the U.S. government. Bissell was an economist for the Combined Shipping Adjustment Board in 1942-43, while Averell Harriman was the U.S. leader of that board in London.

In 1947 and 1948, Bissell was executive secretary of the "Harriman Commission," otherwise known as the President's Commission on Foreign Aid. When Harriman was the administrator of the Marshall Plan, Bissell was assistant administrator.

Harriman was director of Mutual Security (1951-53), while Bissell was consultant to the director of Mutual Security 1952.

Bissell then joined F. Trubee Davison at the Central Intelligence Agency. When Allen Dulles became CIA Director, Bissell was one of his three aides.

Why could this be of interest to our Floridians? We saw in Chapter 4, that the great anti-Castro covert initiative of 1959-61 was supervised by an awesome array of Harriman agents. We need now add to that assessment only the fact that the detailed management of

the invasion of Cuba, and of the assassination planning, and the training of the squads for these jobs, was given into the hands of Richard M. Bissell, Jr.

This 1961 invasion failed. Fidel Castro survived the widely-discussed assassination plots against him. But the initiative succeeded in what was probably its core purpose: to organize a force of multi-use professional assassins.

The Florida-trained killers stayed in business under the leadership of Ted Shackley. They were all around the assassination of President Kennedy in 1963. They kept going with the Operation Phoenix mass murder of Vietnamese civilians, with Middle East drug and terrorist programs, and with George Bush's Contra wars in Central America.

Harvey Hollister Bundy (S&B 1909) was Henry L. Stimson's Assistant Secretary of State (1931-33); then he was Stimson's Special Assistant Secretary of War, alongside Assistant Secretary Robert Lovett of Skull and Bones and Brown Brothers Harriman.

Harvey's son William P. Bundy (S&B 1939) was a CIA officer from 1951 to 1961; as a 1960s defense official, he pushed the Harriman- Dulles scheme for a Vietnam war. Harvey's other son, McGeorge Bundy (S&B 1940), co-authored Stimson's memoirs in 1948. As President John Kennedy's Director of National Security, McGeorge Bundy organized the whitewash of the Kennedy assassination, and immediately switched the U.S. policy away from the Kennedy pullout and back toward war in Vietnam.

There was also Henry Luce, a Bonesman of 1920 with David S. Ingalls and Harry Pomeroy. Luce published Time magazine, where his ironically-named "American Century" blustering was straight British Empire doctrine: Bury the republics, hail the Anglo-Saxon conquerors.

William Sloane Coffin, tapped for 1949 Skull and Bones by George Bush and his Bone companions, was from a long line of Skull and Bones Coffins. William Sloane Coffin was famous in the Vietnam War protest days as a leader of the left protest against the war. Was the fact that he was an agent of the Central Intelligence Agency embarrassing to William Sloane?

This was no contradiction. His uncle, the Reverend Henry Sloane Coffin (S&B 1897), had also been a "peace" agitator, and an oligarchical agent. Uncle Henry was for 20 years president of the Union Theological Seminary, whose board chairman was Prescott Bush's partner Thatcher Brown. In 1937, Henry Coffin and John Foster Dulles led the U.S. delegation to England to found the World Council of Churches, as a "peace movement" guided by the pro-Hitler faction in England.

The Coffins have been mainstays of the liberal death lobby, for euthanasia and eugenics. The Coffins outlasted Hitler, arriving into the CIA in the 1950s.

Amory Howe Bradford (S&B 1934) married Carol Warburg Rothschild in 1941. Carol's mother, Carola, was the acknowledged head of the Warburg family in America after World War II. This family had assisted the Harrimans' rise into the world in the nineteenth and early twentieth centuries; in concert with the Sulzbergers at the New York Times, they had used their American Jewish Committee and B'nai B'rith to protect the Harriman-Bush deals with Hitler. This made it nice for Averell Harriman, just like family, when Amory Howe Bradford worked on the Planning Group of Harriman's NATO secretariat in London, 1951-52. Bradford was meanwhile assistant to the publisher of the New York

Times, and went on to become general manager of the Times.

Other modern Bonesmen have been closely tied to George Bush's career.

George Herbert Walker, Jr. (S&B 1927) was the President's uncle and financial angel. In the 1970s he sold G.H. Walker & Co. to White, Weld & Co. and became a director of White, Weld; company heir William Weld, the original federal prosecutor of Lyndon LaRouche and current Massachusetts governor, is an active Bush Republican.

Publisher William F. Buckley (S&B 1950) had a family oil business in Mexico. There Buckley was a close ally to CIA covert operations manager E. Howard Hunt, whose lethal antics were performed under the eyes of Miami Station and Jupiter Island.

David Lyle Boren (S&B 1963) was assistant to the director of the Office of Civil and Defense Mobilization, and a propaganda analyst for the U.S. Information Agency, before graduating from Yale. Thus while he was imbibing the British view at Oxford University (1963-65), Boren was already an Anglo-American intelligence operative, listed in the ``speakers bureau" of the American embassy in London. David Boren was elected to the U.S. Senate in 1979 and became chairman of the Senate Intelligence Committee.

Though a Democrat (who spoke knowingly of the ``parallel government" operating in Iran-Contra), Boren's Intelligence Committee rulings have been (not unexpectedly) more and more favorable to his ``Patriarch" in the White House.

5. Bush's Own Bones

Among the traditional artifacts collected and maintained within the High Street Tomb are human remains of various derivations. The following concerns one such set of Skull and Bones.

Geronimo, an Apache faction leader and warrior, led a party of warriors on a raid in 1876, after Apaches were moved to the San Carlos Reservation in Arizona territory. He led other raids against U.S. and Mexican forces well into the 1880s; he was captured and escaped many times.

Geronimo was finally interned at Fort Sill, Oklahoma. He became a farmer and joined a Christian congregation. He died at the age of 79 years in 1909, and was buried at Fort Sill. Three-quarters of a century later, his tribesmen raised the question of getting their famous warrior reinterred back in Arizona.

Ned Anderson was Tribal Chairman of the San Carlos Apache Tribe from 1978 to 1986. This is the story he tells:

Around the fall of 1983, the leader of an Apache group in another section of Arizona said he was interested in having the remains of Geronimo returned to his tribe's custody. Taking up this idea, Anderson said that the remains properly belonged to his group as much as to the other Apaches. After much discussion, several Apache groups met at a kind of summit meeting held at Fort Sill, Oklahoma. The army authorities were not favorable to the meeting, and it only occurred through the intervention of the office of the Governor of Oklahoma.

As a result of this meeting, Ned Anderson was written up in the newspapers as an

articulate Apache activist. Soon afterwards, in late 1983 or early 1984, a Skull and Bones member contacted Anderson and leaked evidence that Geronimo's remains had long ago been pilfered--by Prescott Bush, George's father. The informant said that in May of 1918, Prescott Bush and five other officers at Fort Sill desecrated the grave of Geronimo. They took turns watching while they robbed the grave, taking items including a skull, some other bones, a horse bit and straps. These prizes were taken back to the Tomb, the home of the Skull and Bones Society at Yale in New Haven, Connecticut. They were put into a display case, which members and visitors could easily view upon entry to the building.

The informant provided Anderson with photographs of the stolen remains, and a copy of a Skull and Bones log book in which the 1918 grave robbery had been recorded. The informant said that Skull and Bones members used the pilfered remains in performing some of their Thursday and Sunday night rituals, with Geronimo's skull sitting out on a table in front of them.

Outraged, Anderson traveled to New Haven. He did some investigation on the Yale campus and held numerous discussions, to learn what the Apaches would be up against when they took action, and what type of action would be most fruitful.

Through an attorney, Ned Anderson asked the FBI to move into the case. The attorney conveyed to him the Bureau's response: If he would turn over every scrap of evidence to the FBI, and completely remove himself from the case, they would get involved. He rejected this bargain, since it did not seem likely to lead toward recovery of Geronimo's remains.

Due to his persistence, he was able to arrange a September 1986 Manhattan meeting with Jonathan Bush, George Bush's brother. Jonathan Bush vaguely assured Anderson that he would get what he had come after, and set a followup meeting for the next day. But Bush stalled-- Anderson believes this was to gain time to hide and secure the stolen remains against any possible rescue action.

The Skull and Bones attorney representing the Bush family and managing the case was Endicott Peabody Davison. His father was the F. Trubee Davison mentioned above, who had been president of New York's American Museum of Natural History, and personnel director for the Central Intelligence Agency. The general attitude of this Museum crowd has long been that ``Natives" should be stuffed and mounted for display to the Fashionable Set.

Finally, after about 11 days, another meeting occurred. A display case was produced, which did in fact match the one in the photograph the informant had given to Ned Anderson. But the skull he was shown was that of a ten-year-old child, and Anderson refused to receive it or to sign a legal document promising to shut up about the matter.

Anderson took his complaint to Arizona Congressmen Morris Udahl and John McCain III, but with no results. George Bush refused Congressman McCain's request that he meet with Anderson.

Anderson wrote to Udahl, enclosing a photograph of the wall case and skull at the ``Tomb," showing a black and white photograph of the living Geronimo, which members of the Order had boastfully posted next to their display of his skull. Anderson quoted from a Skull and Bones Society internal history, entitled Continuation of the History of Our

Order for the Century Celebration, 17 June 1933, by The Little Devil of D'121.

From the war days [W.W. I] also sprang the mad expedition from the School of Fire at Fort Sill, Oklahoma, that brought to the T[omb] its most spectacular "crook," the skull of Geronimo the terrible, the Indian Chief who had taken forty-nine white scalps. An expedition in late May, 1918, by members of four Clubs [i.e. four graduating-class years of the Society], Xit D.114, Barebones, Caliban and Dingbat, D.115, S'Mike D.116, and Hellbender D.117, planned with great caution since in the words of one of them: "Six army captains robbing a grave wouldn't look good in the papers." The stirring climax was recorded by Hellbender in the Black Book of D.117: "... The ring of pick on stone and thud of earth on earth alone disturbs the peace of the prairie. An axe pried open the iron door of the tomb, and Pat[riarch] Bush entered and started to dig. We dug in turn, each on relief taking a turn on the road as guards.... Finally Pat[riarch] Ellery James turned up a bridle, soon a saddle horn and rotten leathers followed, then wood and then, at the exact bottom of the small round hole, Pat[riarch] James dug deep and pried out the trophy itself... We quickly closed the grave, shut the door and sped home to Pat[riarch] Mallon's room, where we cleaned the Bones. Pat[riarch] Mallon sat on the floor liberally applying carbolic acid. The Skull was fairly clean, having only some flesh inside and a little hair. I showered and hit the hay ... a happy man..."@s9

The other grave robber whose name is given, Ellery James, we encountered in Chapter 1-- he was to be an usher at Prescott's wedding three years later. And the fellow who applied acid to the stolen skull, burning off the flesh and hair, was Neil Mallon. Years later, Prescott Bush and his partners chose Mallon as chairman of Dresser Industries; Mallon hired Prescott's son, George Bush, for George's first job; and George Bush named his son, Neil Mallon Bush, after the flesh-picker.

In 1988, the Washington Post ran an article, originating from the Establishment-line Arizona Republic, entitled "Skull for Scandal: Did Bush's Father Rob Geronimo's Grave?" The article included a small quote from the 1933 Skull and Bones History of Our Order: "An axe pried open the iron door of the tomb, and ... Bush entered and started to dig..." and so forth, but neglected to include other names beside Bush.

According to the Washington Post, the document which Bush attorney Endicott Davison tried to get the Apache leader to sign, stipulated that Ned Anderson agreed it would be "inappropriate for you, me [Jonathan Bush] or anyone in association with us to make or permit any publication in connection with this transaction." Anderson called the document "very insulting to Indians." Davison claimed later that the Order's own history book is a hoax, but during the negotiations with Anderson, Bush's attorney demanded Anderson give up his copy of the book.

Bush crony Fitzhugh Green gives the view of the President's backers on this affair, and conveys the arrogant racial attitude typical of Skull and Bones:

"Prescott Bush had a colorful side. In 1988 the press revealed the complaint of an Apache leader about Bush. This was Ned Anderson of San Carlos, Oklahoma [sic], who charged that as a young army officer Bush stole the skull of Indian Chief [sic] Geronimo and had it hung on the wall of Yale's Skull and Bones Club. After exposure of 'true facts' by

Anderson, and consideration by some representatives in Congress, the issue faded from public sight. Whether or not this alleged skullduggery actually occurred, the mere idea casts the senior Bush in an adventurous light"[emphasis added].

George Bush's crowning as a Bonesman was intensely, personally important to him. These men were tapped for the Class of 1948:

Thomas William Ludlow Ashley
Lucius Horatio Biglow, Jr.
George Herbert Walker Bush
John Erwin Caulkins
William Judkins Clark
William James Connelly, Jr.
George Cook III
David Charles Grimes
Richard Elwood Jenkins
Richard Gerstle Mack
Thomas Wilder Moseley
George Harold Pfau, Jr.
Samuel Sloane Walker, Jr.
Howard Sayre Weaver
Valleau Wilkie, Jr.

Survivors of this 1948 Bones group were interviewed for a 1988 Washington Post campaign profile of George Bush. The members described their continuing intimacy with and financial support for Bush up through his 1980s vice-presidency. Their original sexual togetherness at Yale is stressed:

The relationships that were formed in the ``Tomb" ... where the Society's meetings took place each Thursday and Sunday night during the academic year, have had a strong place in Bush's life, according to all 11 of his fellow Bonesmen who are still alive.

Several described in detail the ritual in the organization that builds the bonds. Before giving his life history, each member had to spend a Sunday night reviewing his sex life in a talk known in the Tomb as CB, or ``connubial bliss"....

``The first time you review your sex life.... We went all the way around among the 15," said Lucius H. Biglow Jr., a retired Seattle attorney. ``That way you get everybody committed to a certain extent.... It was a gradual way of building confidence."

The sexual histories helped break down the normal defenses of the members, according to several of the members from his class. William J. Connelly, Jr. ... said, ``In Skull and Bones we all stand together, 15 brothers under the skin. [It is] the greatest allegiance in the world."

Here is our future U.S. President with the other wealthy, amoral young men, excited about their future unlimited power over the ignorant common people, sharing their sex secrets in a mausoleum surrounded by human remains. The excited young men are entirely directed by the ``Patriarchs," the cynical alumni financiers who are the legal owners of the Order.

6. The Yale Tories Who Made Skull and Bones

This chart depicts family relationships which were vital to the persons appearing on the chart. At less exalted levels of society, one is supposed to be praised or blamed only according to one's own actions. But in these Yale circles, "family"--genealogy--is an overwhelming consideration when evaluating individuals. Thus what we present here is more than simply a system of associations. It is a tradition which has operated powerfully on the emotions and judgment of the leaders of Yale University; they have merged their own identities into this tradition.

Lines are directed downwards from parents to their children. A double hyphen--signifies the marriage of the persons on either side.

7. GUIDE TO THE YALE FAMILY CHART

- 1) Rev. Nodiah Russell: One of 10 or 12 men who founded Yale University in 1701. Yale Trustee 1701-13. Pastor, First Congregational Church, Middletown, Ct. ca. 1691-1716.
- 2) Rev. James Pierpont: Most celebrated of the Yale founders. Yale Trustee, 1701-14.
- 3) William Russell: Yale Trustee 1745-61. Pastor, First Congregational Church, Middletown, Ct. 1716-61.
- 4) Jonathan Edwards: Graduated Yale 1720. Ultra-Calvinist theologian, president of Princeton University (called then "College of New Jersey").
- 5) Rev. Nodiah Russell: Graduated Yale 1750.
- 6) Pierpont Edwards (1750-1826): Made Master of Connecticut Masons by the British Army occupying New York in 1783; he administered the estate of the traitor Benedict Arnold.
- 7) Aaron Burr, Sr.: Graduated Yale 1735. President of Princeton University ("College of New Jersey").
- 8) Matthew Talcott Russell: Graduated Yale 1769. Deacon of First Congregational Church, Middletown, Ct. for 30 years. Lawyer for the Middletown Russell family. Died ca. 1817.
- 9) Captain John Russell. Died 1801 or 1802.
- 10) Henry W. Edwards: Governor of Connecticut 1833, 1835-38. Protector of Samuel Russell's opium-financed enterprises, patron of William Huntington Russell's new secret society, Skull and Bones.
- 11) Aaron Burr, Jr.: U.S. Vice President 1801-08. Killed Alexander Hamilton in a duel in 1804. Secession conspirator. Acquitted of treason in 1807, but wanted for murder, he fled to England. Returned to U.S.A. in 1812. Wall Street lawyer, 1812-36. Hero of imperial Anglo- Americans.
- 12) Theodore Dwight (1764-1846): Law partner of his cousin Aaron Burr, Jr. Secretary of the secessionist Hartford Convention, 1815. He united the Connecticut pro-British party with Massachusetts "Essex Junto."

13) Timothy Dwight: Secessionist. President of Yale, 1795-1817.

14) William Huntington Russell (1809-85): Graduated Yale 1833. Founder of Skull and Bones Society (or Russell Trust Association), which came to dominate Yale. Founded prep school for boys, 1836. His secret organization spread in the 1870s to Phillips Academy, the Andover, Massachusetts prep school.

15) Samuel Russell: Born in 1789 in the main ancestral house of the Russell family of Middletown. This house had been owned by the co-founder of Yale, Nodiah Russell (1), and by William Russell (3) and his wife Mary, sister-in-law to Jonathan Edwards.

He became head of the Middletown Russells. He established Russell and Co. in 1823, which by the 1830s superseded Perkins syndicate as largest American opium smuggling organization. His partners included leading Boston families.

He founded the Russell Manufacturing Company, Middletown, in 1837; he was president of Middlesex County Bank. During the formative years of Skull and Bones, the fabulously wealthy Samuel Russell was undisputed king of Middletown.

Note to Reader:

For the sake of clarity, we have omitted from this chart the ancestral line from Rev. James Pierpont (2) to his great grandson Rev. John Pierpont. Rev. John Pierpont wrote poetry for the pro-British secessionists; he denounced President Thomas Jefferson for saying that Pierpont's New England relatives were "under the influence of the whore of England." Rev. John was an employee of Aaron Burr's family during Burr's western conspiracy. Rev. John's daughter Juliet married Connecticut-born British banker Junius Morgan and gave birth to U.S. financial kingpin John Pierpont Morgan, named for his grandfather Rev. John.

1. The Secret Origins of Skull & Bones

The story begins at Yale, where three threads of American social history -- espionage, drug smuggling and secret societies -- intertwine into one.

Elihu Yale was born near Boston, educated in London, and served with the British East India Company, eventually becoming governor of Fort Saint George, Madras, in 1687. He amassed a great fortune from trade and returned to England in 1699. Yale became known as quite a philanthropist; upon receiving a request from the Collegiate School in Connecticut, he sent a donation and a gift of books. After subsequent bequests, Cotton Mather suggested the school be named Yale College, in 1718.

A statue of Nathan Hale stands on Old Campus at Yale University. There is a copy of that statue in front of the CIA's headquarters in Langley, Virginia. Yet another stands in front of Phillips Academy in Andover, Massachusetts (where George H.W. Bush ('48) went to prep school and joined a secret society at age twelve).

Nathan Hale, along with three other Yale graduates, was a member of the "Culper Ring," one of America's first intelligence operations. Established by George Washington, it was successful throughout the Revolutionary War. Nathan was the only operative to be ferreted out by the British, and after speaking his famous regrets, he was hanged in 1776. Ever since the founding of the Republic, the relationship between Yale and the "Intelligence Community" has been unique.

In 1823, Samuel Russell established Russell and Company for the purpose of acquiring opium in Turkey and smuggling it to China. Russell and Company merged with the Perkins (Boston) syndicate in 1830 and became the primary American opium smuggler. Many of the great American and European fortunes were built on the "China"(opium)

trade.

One of Russell and Company's Chief of Operations in Canton was Warren Delano, Jr., grandfather of Franklin Roosevelt. Other Russell partners included John Cleve Green (who financed Princeton), Abiel Low (who financed construction of Columbia), Joseph Coolidge and the Perkins, Sturgis and Forbes families. (Coolidge's son organized the United Fruit company, and his grandson, Archibald C. Coolidge, was a co-founder of the Council on Foreign Relations.)

William Huntington Russell ('33), Samuel's cousin, studied in Germany from 1831-32. Germany was a hotbed of new ideas. The "scientific method" was being applied to all forms of human endeavor. Prussia, which blamed the defeat of its forces by Napoleon in 1806 on soldiers only thinking about themselves in the stress of battle, took the principles set forth by John Locke and Jean Rousseau and created a new educational system. Johan Fichte, in his "Address to the German People," declared that the children would be taken over by the State and told what to think and how to think it.

Georg Wilhelm Friedrich Hegel took over Fichte's chair at the University Of Berlin in 1817, and was a professor there until his death in 1831. Hegel was the culmination of the German idealistic philosophy school of Immanuel Kant.

To Hegel, our world is a world of reason. The state is Absolute Reason and the citizen can only become free by worship and obedience to the state. Hegel called the state the "march of God in the world" and the "final end". This final end, Hegel said, "has supreme right against the individual, whose supreme duty is to be a member of the state." Both fascism and communism have their philosophical roots in Hegellianism. Hegellian philosophy was very much in vogue during William Russell's time in Germany.

When Russell returned to Yale in 1832, he formed a senior society with Alphonso Taft ('33). According to information acquired from a break-in to the "tomb" (the Skull and Bones meeting hall) in 1876, "Bones is a chapter of a corps in a German University.... General Russell, its founder, was in Germany before his Senior Year and formed a warm friendship with a leading member of a German society. He brought back with him to college, authority to found a chapter here." So class valedictorian William H. Russell, along with fourteen others, became the founding members of "The Order of Scull and Bones," later changed to "The Order of Skull and Bones".

The secretive Order of Skull and Bones exists only at Yale. Fifteen juniors are "tapped" each year by the seniors to be initiated into next year's group. Some say each initiate is given \$15,000 and a grandfather clock. Far from being a campus fun-house, the group is geared more toward the success of its members in the post-collegiate world.

The family names on the Skull and Bones roster roll off the tongue like an elite party list -- Lord, Whitney, Taft, Jay, Bundy, Harriman, Weyerhaeuser, Pinchot, Rockefeller, Goodyear, Sloane, Stimson, Phelps, Perkins, Pillsbury, Kellogg, Vanderbilt, Bush, Lovett and so on.

William Russell went on to become a general and a state legislator in Connecticut. Alphonso Taft was appointed U.S. Attorney General, Secretary of War (a post many "Bonesmen" have held), Ambassador to Austria, and Ambassador to Russia (another post held by many "Bonesmen"). His son, William Howard Taft ('87), is the only man to be

both President of the United States and Chief Justice of the Supreme Court.

2. Secrets of the "Tomb"

The Order flourished from the very beginning in spite of occasional squalls of controversy. There was dissension from some professors, who didn't like its secrecy and exclusiveness. And there was backlash from students, showing concern about the influence "Bones" was having over Yale finances and the favoritism shown to "Bonesmen."

In October of 1873, Volume 1, Number 1, of *The Iconoclast* was published in New Haven. It was only published once and was one of very few openly published articles on the Order of Skull and Bones.

From *The Iconoclast*:

"We speak through a new publication. because the college press is closed to those who dare to openly mention 'Bones'...."

"Out of every class Skull and Bones takes its men. They have gone out into the world and have become, in many instances, leaders in society. They have obtained control of Yale. Its business is performed by them. Money paid to the college must pass into their hands, and be subject to their will. No doubt they are worthy men in themselves, but the many, whom they looked down upon while in college, cannot so far forget as to give money freely into their hands. Men in Wall Street complain that the college comes straight to them for help, instead of asking each graduate for his share. The reason is found in a remark made by one of Yale's and America's first men: 'Few will give but Bones men and they care far more for their society than they do for the college....'

"Year by year the deadly evil is growing. The society was never as obnoxious to the college as it is today, and it is just this ill-feeling that shuts the pockets of non-members. Never before has it shown such arrogance and self-fancied superiority. It grasps the College Press and endeavors to rule it all. It does not deign to show its credentials, but clutches at power with the silence of conscious guilt.

"To tell the good which Yale College has done would be well nigh impossible. To tell the good she might do would be yet more difficult. The question, then, is reduced to this -- on the one hand lies a source of incalculable good -- on the other a society guilty of serious and far-reaching crimes. It is Yale College against Skull and Bones!! We ask all men, as a question of right, which should be allowed to live?"

At first, the society held its meetings in hired halls. Then in 1856, the "tomb", a vine-covered, windowless, brown-stone hall was constructed, where to this day the "Bonesmen" hold their "strange, occultish" initiation rites and meet each Thursday and Sunday.

On September 29, 1876, a group calling itself "The Order of File and Claw" broke into the Skull and Bones' holy of holies. In the "tomb" they found lodge-room 324 "fitted up in black velvet, even the walls being covered with the material." Upstairs was lodge-room 322, "the 'sanctum sanctorium' of the temple... furnished in red velvet" with a pentagram on the wall. In the hall are "pictures of the founders of Bones at Yale, and of members of the Society in Germany, when the chapter was established here in 1832." The raiding party

found another interesting scene in the parlor next to room 322.

From "The Fall Of Skull And Bones":

"On the west wall, hung among other pictures, an old engraving representing an open burial vault, in which, on a stone slab, rest four human skulls, grouped about a fools cap and bells, an open book, several mathematical instruments, a beggar's scrip, and a royal crown. On the arched wall above the vault are the explanatory words, in Roman letters, 'We War Der Thor, Wer Weiser, Wer Bettler Oder, Kaiser?' and below the vault is engraved, in German characters, the sentence; 'Ob Arm, Ob Beich, im Tode gleich.'

The picture is accompanied by a card on which is written, 'From the German Chapter. Presented by D. C. Gilman of D. 50'."

Daniel Coit Gilman ('52), along with two other "Bonesmen," formed a troika which still influences American life today. Soon after their initiation in Skull and Bones, Daniel Gilman, Timothy Dwight ('49) and Andrew Dickinson White ('53) went to study philosophy in Europe at the University of Berlin. Gilman returned from Europe and incorporated Skull and Bones as Russell Trust, in 1856, with himself as Treasurer and William H. Russell as President. He spent the next fourteen years in New Haven consolidating the order's power.

Gilman was appointed Librarian at Yale in 1858. Through shrewd political maneuvering, he acquired funding for Yale's science departments (Sheffield Scientific School) and was able to get the Morrill Land Bill introduced in Congress, passed and finally signed by President Lincoln, after being vetoed by President Buchanan.

This bill, "donating public-lands for State College for agriculture and sciences", is now known as the Land Grant College Act. Yale was the first school in America to get the federal land scrip and quickly grabbed all of Connecticut's share at the time. Pleased by the acquisitions, Yale made Gilman a Professor of Physical Geography.

Daniel was the first President of the University of California. He also helped found, and was the first president of, John Hopkins.

Gilman was first president of the Carnegie Institution and involved in the founding of the Peabody, Slater and Russell Sage Foundations.

His buddy, Andrew D. White, was the first president of Cornell University (which received all of New York's share of the Land Grant College Act), U.S. Minister to Russia, U.S. Ambassador to Berlin and first president of the American Historical Association. White was also Chairman of the American delegation to the first Hague Conference in 1899, which established an international judiciary.

Timothy Dwight, a professor at Yale Divinity School, was installed as president of Yale in 1886. All presidents since, have been either "Bonesmen" or directly tied to the Order and its interests.

The Daniel/Gilman/White trio was also responsible for the founding of the American Economic Association, the American Chemical Society and the American Psychological Association. Through their influences on John Dewey and Horace Mann, this trio continues to have an enormous impact on education today.

3. Networks of Power

In his book "America's Secret Establishment," Antony Sutton outlined the Order of Skull and Bones' ability to establish vertical and horizontal "chains of influence" that ensured the continuity of their conspiratorial schemes.

The Whitney-Stimson-Bundy links represent the "vertical chain".

W. C. Whitney ('63), who married Flora Payne (of the Standard Oil Payne dynasty), was Secretary of the Navy. His attorney was a man named Elihu Root. Root hired Henry Stimson ('88), out of law school. Stimson took over from Root as Secretary of War in 1911, appointed by fellow Bonesman William Howard Taft. Stimson later became Coolidge's Governor-General of the Philippine Islands, Hoover's Secretary of State, and Secretary of War during the Roosevelt and Truman administrations.

Hollister Bundy ('09) was Stimson's special assistant and point man in the Pentagon for the Manhattan Project. His two sons, also members of Skull and Bones, were William Bundy ('39) and McGeorge Bundy ('40) -- both very active in governmental and foundation affairs.

The two brothers, from their positions in the CIA, the Department of Defense and the State Department, and as Special Assistants to Presidents Kennedy and Johnson, exercised significant impact on the flow of information and intelligence during the Vietnam "War."

William Bundy went on to be editor of Foreign Affairs, the influential quarterly of the Council on Foreign Affairs (CFR). McGeorge became president of the Ford Foundation.

Another interesting group of "Bonesmen" is the Harriman/Bush crowd. Averil Harriman ('13), "Elder Statesman" of the Democratic Party, and his brother Roland Harriman ('17) were very active members. In fact, four of Roland's fellow "Bonesmen" from the class of 1917 were directors of Brown Brothers, Harriman, including Prescott Bush ('17), George Bush's dad.

Since the turn of the century, two investment bank firms -- Guaranty Trust and Brown Brothers, Harriman -- were both dominated by members of Skull and Bones. These two firms were heavily involved in the financing of Communism and Hitler's regime.

Bonesmen share an affinity for the Hegelian ideas of the historical dialectic, which dictates the use of controlled conflict - - thesis versus anti-thesis -- to create a pre-determined synthesis. A synthesis of their making and design, where the state is absolute and individuals are granted their freedoms based on their obedience to the state -- a New World Order.

Funding and political maneuvering on the part of "Bonesmen" and their allies helped the Bolsheviks prevail in Russia. In defiance of federal laws, the cabal financed industries, established banks and developed oil and mineral deposits in the fledgling U.S.S.R.

Later, Averil Harriman, as minister to Great Britain in charge of Lend-Lease for Britain and Russia, was responsible for shipping entire factories into Russia. According to some researchers, Harriman also oversaw the transfer of nuclear secrets, plutonium and U. S. dollar printing plates to the U.S.S.R.

In 1932, the Union Banking Corporation of New York City had enlisted four directors from the ('17) cell and two Nazi bankers associated with Fritz Thyssen, who had been financing Hitler since 1924.

From "George Bush; The Unauthorized Biography":

"President Franklin Roosevelt's Alien Property Custodian, Leo T. Crowley, signed Vesting Order Number 248 [11/17/42] seizing the property of Prescott Bush under the Trading with Enemy Act. The order, published in obscure government record books and kept out of the news, Note #4 explained nothing about the Nazis involved; only that the Union Banking Corporation was run for the 'Thyssen family' of 'Germany and/or Hungary' -- 'nationals ... of a designated enemy country.'

"By deciding that Prescott Bush and the other directors of the Union Banking Corporation were legally 'front men for the Nazis', the government avoided the more important historical issue: In what way 'were Hitler's Nazis themselves hired, armed, and instructed by' the New York and London clique of which Prescott Bush was an executive manager? ...

"4. New York Times, December 16, 1944, ran a five-paragraph page 25 article on actions of the New York State Banking Department. Only the last sentence refers to the Nazi bank, as follows: 'The Union Banking Corporation, 39 Broadway, New York, has received authority to change its principal place of business to 120 Broadway.'

"The Times omitted the fact that the Union Banking Corporation had been seized by the government for trading with the enemy, and the fact that 120 Broadway was the address of the government's Alien Property Custodian."

After the war, Prescott went on to become a U. S. Senator from Connecticut and favorite golfing partner of President Eisenhower. Prescott claims responsibility for getting Nixon into politics and takes personal credit for bringing Dick on board as Ike's running mate in 1952.

4. Name Roster of the Secret Establishment

There were so many "Yalies" in the OSS that Yale's drinking tune, the "Whiffenpoof Song", became an "unofficial" song of the OSS. Many in the OSS were "Bonesmen" or belonged to the other Yale senior societies.

Robert Lovett ('18), Harriman's childhood friend, had been tapped into Skull & Bones by Prescott Bush's cell of '17 and was a director at Brown Brothers, Harriman.

Again, from "George Bush: The Unauthorized Biography":

"On October 22, 1945, Secretary of War Robert Patterson created the Lovett Committee, chaired by Robert A. Lovett, to advise the government on the post-World War II organization of U.S. intelligence activities.... The new agency would 'consult' with the armed forces, but it must be the sole collecting agency in the field of foreign espionage and counterespionage. The new agency should have an independent budget, and its appropriations should be granted by Congress without public hearings. Lovett appeared before the Secretaries of State, War, and Navy on November 14, 1945.... Lovett pressed

for a virtual resumption of the wartime Office of Strategic Services (OSS).... The CIA was established in 1947 according to the prescription of Robert Lovett, of Jupiter Island."

Gaddis Smith, a history professor at Yale, said, "Yale has influenced the Central Intelligence Agency more than any other university, giving the CIA the atmosphere of a class reunion." And "Bonesman" have been foremost among the "spooks" building the CIA's "haunted house."

F. Trubee Davison ('18) was Director of Personnel at the CIA in the early years. Some of the other "Bonesmen" connected with the intelligence community are:

Sloane Coffin, Jr. ('49)

V. Van Dine ('49)

James Buckley ('44)

Bill Buckley ('50)

Hugh Cunningham ('34)

Hugh Wilson ('09)

Reuben Holden ('40)

Charles R. Walker ('16)

Yale's 'unofficial' Secretary of War, Robert D. French ('10)

Archibald MacLiesh ('15)

Dino Pionzio ('50), CIA Deputy Chief of Station during Allende overthrow

William and McGeorge Bundy

Richard A. Moore ('3?)

Senator David Boren ('63)

Senator John Kerry ('66)

...and, of course, George Herbert Walker Bush. Bush tapped Coffin, who tapped Buckley.

Some other prominent Bonesmen include:

Henry Luce ('20), Time-Life

John Thomas Daniels ('14), founder Archer Daniels Midland

Gifford Pinchot ('89), President Theodore Roosevelt's chief forester

Frederick E. Weyerhaeuser ('96)

Harold Stanley ('08), founder of Morgan Stanley, investment banker

Alfred Cowles ('13), Cowles Communication

Henry P. Davison ('20), senior partner Morgan Guaranty Trust

Thomas Cochran ('04) Morgan partner

Senator John Heinz ('31)

Pierre Jay ('92), first chairman of the Federal Reserve Bank of New York

George Herbert Walker, Jr. ('27), financier and co-founder of the NY Mets

Artemus Gates ('18), President of New York Trust Company, Union Pacific, TIME, Boeing Company

William Draper III (50), the Defense Department, UN and Import-Export Bank

Dean Witter, Jr. ('44), investment banker

Senator Jonathan Bingham ('36)

Potter Stewart ('36), Supreme Court Justice

Senator John Chaffe ('47)

Harry Payne Whitney ('94), husband of Gertrude Vanderbilt, investment banker

Russell W. Davenport ('23), editor Fortune Magazine, created Fortune 500 list

Evan G. Galbraith ('50), Ambassador to France and Managing Director of Morgan Stanley

Richard Gow ('55), president Zapata Oil

Amory Howe Bradford ('34), husband of Carol Warburg Rothschild and general manager for the New York Times

C. E. Lord ('49), Comptroller of the Currency

Winston Lord ('59), Chairman of CFR, Ambassador to China and assistant Secretary of State in the Clinton administration

Ever since Nixon re-established America's political relationship with China, many of our ambassadors to that country have been Bonesmen, including George Bush, the first Chief U. S. Liaison Officer to the Peoples Republic of China.

5. China and the Opium Wars

Why all this interest in China? Well, China, among other things, is one of the largest producers and users of opiates in the world.

For a while, in the 1800s, the Yankee Clippers in Connecticut and Massachusetts were the fastest ships on the ocean. Speed was crucial to the opium trade; whoever made the trip from Turkey/India to Macao/Hong Kong/Shanghai first got the most for their goods.

During the Opium Wars, the U.S. chose to stand on the sidelines and cheer for the English and French, knowing that treaty obligations would bring the U.S. a share in the spoils. Russell and Company was at times the only trading house operating in Canton and used the opportunity to develop strong commercial ties and handsome profits.

Powerful national interests were behind the drug trade, because American traders were badly in need of some article the Chinese would buy, since by this time the seal breeding grounds had been nearly wiped out. If the Chinese had not bought opium from Americans, then United States imports of silk, porcelain and tea would have to be paid in precious coin,

which was in short supply. In 1843, when the Port of Shanghai was opened, Russell and Co. was one of its earliest traders.

In 1903, Yale Divinity School set up a program of schools and hospitals in China. Mao Zedong was among the staff. During the intrigues of China in the 1930s and '40s, American intelligence called upon the resources of "Yale in China", and George Bush's cousin and fellow "Bonesman" Reuben Holden.

After stints as UN Ambassador and Chairman of the Republican National Committee for the beleaguered Richard Nixon, George Bush was sent to look after the "China trade". The Bush family is still very much involved in the economic activities of "Red" China.

Many researchers contend that George Bush has been with CIA since the early 1950s, and that one of his jobs was to consolidate and co-ordinate the worldwide narcotics industry, the largest industry on Earth. Some say that one of the reasons behind the Vietnam "Police Action" was a cover for the consolidation of the "Golden Triangle".

6. The War on Drugs: An "Intellectual Fraud"

Before the Vietnam "War", the Golden Triangle was run by French Intelligence and Corsican mobsters. After the French bailed out and America moved in, the triangle was run by U.S. intelligence, with aid from Sicilian mobsters. This narcotics network is well documented in "The Politics of Heroin in S. E. Asia" by Alfred McCoy, "The Great Heroin Coup" by Henrik Kruger and "Double-Cross" by Sam and Chuck Giancana.

Vice-President George Bush, as Chairman of President Reagan's cabinet-level working group and as Director of the National Narcotics Interdiction System, was the highest U. S. governmental official involved in the "war on drugs".

Frances Mullen, Jr., former head of the Drug Enforcement Agency (DEA), called Bush's efforts "an intellectual fraud" and "a liability rather than an asset". Soon after these statements, Mullen resigned and the resultant General Accounting Office (GAO) report was buried.

In July, 1985, the suppressed GAO paper reported that there were "no benefits from the National Narcotics Border Interdiction System, directed by George Bush. In fact, the overall effect was to encourage supply...."

Monika Jensen-Stevenson, a "60 Minutes" producer, quit her job after the CBS news program refused to air the story she had uncovered relating to the covert drug trade. Her book, "Kiss The Boys Goodbye", details how our intelligence community used the apparatus of the POW/MIA governmental agencies as a cover for the trafficking of opiates from the "Golden Triangle".

President Reagan appointed Reform Party founder and Texas billionaire Ross Perot to the President's Advisory Council on Foreign Intelligence. Reagan made Perot a special presidential investigator, looking into America's POW and MIAs from the Vietnam "War".

Ross took the job to heart and spent considerable time and money in pursuit of the quest. He was given special clearance and access. He asked questions and interviewed everyone he could find.

From "Kiss The Boys Goodbye":

"Relations between Bush and Perot had gone downhill ever since the Vice-President had asked Ross Perot how his POW/ MIA investigations were going.

'Well, George, I go in looking for prisoners,' said Perot, 'but I spend all my time discovering the government has been moving drugs around the world and is involved in illegal arms deals.... I can't get at the prisoners because of the corruption among our own people.'

"This ended Perot's official access to the highly classified files as a one-man presidential investigator. 'I have been instructed to cease and desist,' he had informed the families of missing men early in 1987."

The wholesale importation of cocaine into the U.S. during "Iran/Contra" is also well documented. George Bush, is known "to be in the loop" with many of the players keeping in contact directly with his office.

Also, there has been much speculation as to the use of the off-shore rigs, pipelines and other assets of Zapata Offshore being used for narcotic trans-shipments.

Narcotics such as cocaine and heroin cannot be manufactured without the precursor chemicals. One of the largest makers of these precursor chemicals is the Eli Lilly Company of Indianapolis, Indiana. The Quayle family is a large stockholder, and George Bush has been on the Board of Directors. Eli Lilly is also the company that first synthesized LSD for the CIA.

7. George Bush, Skull & Bones and the JFK Assassination

Rodney Stich's book "Defrauding America" tells of a "deep-cover CIA officer" assigned to a counter-intelligence unit, code-named Pegasus. This unit "had tape-recordings of plans to assassinate Kennedy" from a tap on the phone of J. Edgar Hoover. The people on the tapes were "[Nelson] Rockefeller, Allen Dulles, [Lyndon] Johnson of Texas, George Bush and J. Edgar Hoover."

Could George Bush be involved in the JFK assassination?

In 1963, Bush was living in Houston, busily carrying out his duties as president of the Zapata Offshore oil company. He denied the existence of a note sent by the FBI's J. Edgar Hoover to "Mr. George Bush of the CIA." When news of the note surfaced, the CIA first said they never commented on employment questions, but later relented said yes, a "George Bush" was mentioned in the note, but that it was "another" George Bush, not the man who took office in the White House in 1988.

Some intrepid reporters tracked down the "other" George Bush and discovered that he was just a lowly clerk who had shuffled papers for the CIA for about six months. He never received any interagency messages from anybody at the FBI, let alone the Queen Mary.

It is also worth noting that a CIA code word for Bay of Pigs was Operation Zapata, and that two of the support vessels were named Barbara and Houston.

Many say that George Bush was high up on the CIA ladder at the time, running proprietary vehicles and placed in a position of command, responsible for many of the Cubans recruited into "service" at the time. All through the Iran-Contra affair, Felix Rodriguez, the man who captured and had Che Guevara killed for the CIA, always seemed to call Bush's office first.

From *The Realist* (Summer, 1991):

"Bush was working with the now-famous CIA agent, Felix Rodriguez, recruiting right-wing Cuban exiles for the invasion of Cuba. It was Bush's CIA job to organize the Cuban community in Miami for the invasion.... A newly discovered FBI document reveals that George Bush was directly involved in the 1963 murder of President John Kennedy. The document places marksmen by the CIA. Bush at that time lived in Texas. Hopping from Houston to Miami weekly, Bush spent 1960 and '61 recruiting Cubans in Miami for the invasion....

"George Bush claims he never worked for the CIA until he was appointed Director by former Warren Commission director and then president Jerry Ford in 1976. Logic suggests that is highly unlikely. Of course, Bush has a company duty to deny being in the CIA. The CIA is a secret organization. No one ever admits to being a member. The truth is that Bush has been a top CIA official since before the 1961 invasion of Cuba, working with Felix Rodriguez. Bush may deny his actual role in the CIA in 1959, but there are records in the Bay of Pigs invasion of Cuba that expose Bush's role..."

On the Watergate tapes, June 23, 1972, referred to in the media as the 'smoking gun' conversation, Nixon and his Chief of Staff, H.R. Haldeman, were discussing how to stop the FBI investigation into the CIA Watergate burglary. They were worried that the investigation would expose their connection to 'the Bay of Pigs thing.' Haldeman, in his book "The Ends of Power", reveals that Nixon always used code words when talking about the 1963 murder of JFK. Haldeman said Nixon would always refer to the assassination as 'the Bay of Pigs'.

On that transcript we find Nixon discussing the role of George Bush's partner, Robert Mosbacher, as one of the Texas fundraisers for Nixon. On the tapes Nixon keeps referring to the 'Cubans' and the 'Texans.' The 'Texans' were Bush, Mosbacher and Baker. This is another direct link between Bush and evidence linking Nixon and Bush to the Kennedy assassination."

8. Motives for the Conspiracy

So, why would an intelligence agency/secret society want to smuggle drugs and assassinate JFK?

Well, they make a lot of money, and they garner intelligence assets through their participation. There's also the rationale that the world is a seamy and unseemly place, and if you're going to be the 'big boy' on the block, you better know what's going on. And what better way of knowing than by running it yourself? There are also some who theorize that the covert drug trade fits with plans to destabilize American families and society. Through demoralizing and fracturing the body politic, they can impose their will using psychological warfare and the political alchemy of the Hegelian dialectic.

James Shelby Downard's article, "Sorcery, Sex, Assassination and the Science of Symbolism," an underground classic, links American historical events with a wild, numerological, grand occult plan "to turn us into cybernetic mystery zombies". The assassination of JFK, this article contends, was the performance of a public occult ritual called The Killing of the King, designed as a mass-trauma, mind-control assault against our U.S. national body-politic.

During Operation Sunrise, Operation Blowback, Operation Paperclip and others, thousands of Nazi scientists, researchers and administrators were brought to the United States after World War II. Many were "smuggled" into the country against direct, written, orders from President Harry S. Truman.

Project Monarch was the resumption of a mind-control project called Marionette Programming, which started in Nazi Germany. The basic component of the Monarch Program is the sophisticated manipulation of the mind, using extreme trauma to induce Multiple Personality Disorder.

Mr. Downard feels that the perpetrators purposefully murdered JFK in such a way as to affect our National identity and cohesiveness -- to fracture America's soul. Even the blatancy of their conspiracy was designed to show "their superiority" and "our futility".

There have been studies that show a correlation between the JFK assassination and the rise in violence in society, distrust of government and other extensions of social ills.

9. The Illuminati: Subverting the Body Politic

Why this attack against our body politic?

In 1785, a bolt of lightning struck a courier en route to Paris from Frankfurt-on-the-Main. A tract written by Adam Weishaupt, founder of the Illuminati, "Original Shift in Days of Illuminations," was recovered from the dead messenger, containing the secret society's long-range plan for "The New World Order through world revolution".

The Bavarian Government outlawed the society and in 1787 published the details of The Illuminati conspiracy in "The Original Writings of the Order and Sect of the Illuminati."

In Adam Weishaupt's own words:

"By this plan, we shall direct all mankind in this manner. And, by the simplest means, we shall set all in motion and in flames. The occupations must be so allotted and contrived that we may, in secret, influence all political transactions."

There is disagreement among scholars as to whether or not the Illuminati survived its banishment. Nevertheless, the group had been quite successful in attracting members and had allied itself with the extensive Masonic networks.

The Illuminati was publicly founded May 1, 1776 at the University of Ingolstadt by Weishaupt, Professor of Canon Law. It was a very "learned" society; Weishaupt drew the earliest members of his new order from among his students.

On December 5, 1776, students at William and Mary College founded a secret society, Phi Beta Kappa. A second chapter was formed, at Yale, in 1780. The anti-Masonic movement

in the United States during the 1820s held groups such as Phi Beta Kappa in a bad light. Because of pressure, the society went public. This is noted by some researchers as the direct cause of the appearance of Yale's Order of Skull and Bones.

In "The Cyclopedica Of Fraternities", a genealogical chart of general Greek-Letter college fraternities in the United States, shows Phi Beta Kappa as "the parent of all the fraternal systems in [American] higher education." There is only one "side" lineal descendant: the Yale chapter of 1780. The line then continues to Skull and Bones in 1832, and on through the other "only at Yale" senior societies, Scroll & Key and Wolf's Head.

Phi Beta Kappa is the "first three Greek letters, for 'Philosophia Biou Kubernetes' or 'Love of wisdom, the helmsman of life'." A skull homophone is scull, a quick, gliding boat and part of Skull & Bones first nomenclature.

John Robison, a professor of natural philosophy at Edinburgh University in Scotland and a member of a Freemason Lodge, said that he was asked to join the Illuminati. After study, he concluded the purposes of the Illuminati were not for him.

In 1798, he published a book called "Proofs Of A Conspiracy":

"An association has been formed for the express purpose of rooting out all the religious establishments and overturning all the existing governments.... the leaders would rule the World with uncontrollable power, while all the rest would be employed as tools of the ambition of their unknown superiors."

"Proofs of A Conspiracy" was sent to George Washington. Responding to the sender of the book with a letter, the president said he was aware the Illuminati were in America. He felt that the Illuminati had "diabolical tenets" and that their object was "a separation of the People from their government."

In "Proofs Of A Conspiracy", Robison printed the ceremony of initiation of the "Regent degree" in Illuminism. In it "a skeleton is pointed out to him [the initiate], at the feet of which are laid a crown and a sword. He is asked 'whether that is the skeleton of a king, nobleman or a beggar.' As he cannot decide, the president of the meeting says to him, 'The character of being a man is the only one that is importance'".

This is, essentially, the same as the writing in the Skull & Bones "tomb":

"Wer war der Thor, wer Weiser, Bettler oder Kaiser? Ob Arm, ob Reich, im Tode gleich."

Which reads:

"Who was the fool, who the wise man, beggar or king? Whether poor or rich, all's the same in death."

10. Skull & Bones = Illuminati?

Is the Order of the Skull & Bones part of the Illuminati?

When a person is initiated into Skull & Bones, they are given a new name, similar to the practice of the Illuminati. And many recorded Illuminati members can be shown to have contact and/or strong influences with many of the professors that taught "Bonesmen" in

Berlin.

When a secret society conspires against the sovereignty of a king, they need to organize, raise funds, make their plans operational, and hopefully bring them to fruition.

Could we have in the United States a secret society that has used the "National Security State" as a cover for their nefarious plans?

From "George Bush: The Unauthorized Biography":

"That September [1951], Robert Lovett replaced Marshall as secretary of defense. Meanwhile, Harriman was named director of the Mutual Security Agency, making him the U.S. chief of the Anglo-American military alliance. By now, Brown Brothers, Harriman was everything but commander-in-chief.

"A central focus of the Harriman security regime in Washington (1950-53) was the organization of covert operations and 'psychological warfare.' Harriman, together with his lawyers and business partners, Allen and John Foster Dulles, wanted the government's secret services to conduct extensive propaganda campaigns and mass-psychology experiments within the U.S.A., and paramilitary campaigns abroad....

"The Harriman security regime created the Psychological Strategy Board (PSB) in 1951. The man appointed director of the PSB [was] Gordon Gray.... Gordon's brother, R.J. Reynolds chairman Bowman Gray Jr., was also a naval intelligence officer, known around Washington as the 'founder of operational intelligence.' Gordon Gray became a close friend and political ally of Prescott Bush; and Gray's son became for Prescott's son, George, his lawyer and the shield of his covert policy."

So you have the Whitney/Stimson/Bundy clan and the Harriman/Bush boys wielding a tremendous amount of influence on the political, economic and social affairs of America and the world. Then you have Prescott Bush's buddy Richard Nixon as an activist vice-president. Then, a nation-chilling assassination, some time under LBJ with the Bundy boys keeping things in line, then Nixon as President with "Bonesmen" aides Ray Price ('51) and Richard A. Moore. Some time out for a Trilateralist-Democrat-patsy president, followed by Prescott's son as an activist vice-president under Reagan. Next, we get a Skull and Bones president who declares a "New World Order" while beating up on his business partner, Saddam Hussein.

After twelve years of Republican administrations, Bush passes the reins to his drug smuggling buddy from Arkansas, Bill Clinton, who studied at Yale Law School. According to some researchers, Clinton was recruited as a CIA operative while a Rhodes Scholar at Oxford. Could this be the "old Hegallian historical dialectic process"?

11. World History: Plan or Accident?

Will we get another failed Democratic administration? A scandal as disgraceful as Nixon's fall? When Robert P. Johnson (William Barr) told Clinton in a bunker in Arkansas that "you are our fair-haired boy, but you do have competition for the job you seek. We would never put all our eggs in one basket. You and your state have been our greatest asset.... Mr. Casey wanted me to pass on to you, that unless you fuck up and do something stupid,

you are number one on our short list for shot at the job you always wanted."

So, you have William Casey -- CIA Director, George Bush's campaign manager and Sovereign Knight of Malta -- speaking through the proxy of George Bush's last Attorney General to George's rival in the 1992 federal elections. Is it all just a show and sham for U.S. hoi polloi?

Perhaps so, if there exists the type of control over the electoral process as told by Mae Brussell and the suppressed book "VoteScam," written by Jim and Ken Collier:

"...Your vote and mine may now be a meaningless bit of energy directed by preprogrammed computers-which can be fixed to select certain pre-ordained candidates and leave no footprints or paper trail.

"In short, computers are covertly stealing your vote.

--For almost three decades the American vote has been subject to government-sponsored electronic theft.

--The vote has been stolen from you by a cartel of federal "national security" bureaucrats, who include higher-ups in the Central Intelligence Agency, political party leaders, Congressmen, co-opted journalists -- and the owners and managers -- of the major Establishment news media, who have decided in concert that how America's votes are counted, by whom they are counted and how the results are verified and delivered to the public is, as one of them put it, 'Not a proper area of inquiry.'

--By means of an unofficial private corporation named News Election Service (NES), the Establishment press has actual physical control of the counting and dissemination of the vote, and it refuses to let the public know how it is done."

Is the American electorate subjected to cyclic propaganda, pre-selected candidates and winners, and psychological warfare to alienate Americans from the institutions established to serve them by the Constitution? Are the Democratic and Republican National Parties used for a Hegelian experiment in controlled conflict?

Pamela Churchill Harriman, Averil's wife, is one of the Democratic Party's biggest fund-raisers. She once gave Bill a job as director of her "PAM PAC" when he was defeated for governor in 1980. Bill paid her back by appointing her as Ambassador to France.

Another Harriman/Bush friend, Eugene Stetson ('34), was an assistant manager for Prescott Bush at Brown Brothers, Harriman's New York office. He organized the H. Smith Richardson Foundation. The foundation, in the late 1950s, participated in the MKULTRA, the CIA's domestic covert psychological warfare operation. The Richardson Foundation helped to finance the testing of psychotropic drugs, including LSD, at Bridgewater Hospital in Massachusetts, the center of some of the most brutal MK-ULTRA experiments.

During the Iran-Contra operations, the H. Smith Richardson Foundation was a "private donors steering committee," working with the National Security Council to co-ordinate the Office of Public Diplomacy. This was an effort to propagandize in favor of and run cover for the Iran-Contra operations, and to coordinate published attacks on opponents of the program.

The H. Smith Richardson Foundation also runs the Center for Creative Leadership at

Langley to "train leaders of the CIA," as well as another center near Greensboro, North Carolina, that trains CIA and Secret Service Agents. Almost everyone who achieves the military rank of general also gets this training.

This is just the tip of an iceberg. You also have eugenics and population control, suppressed history and technology, yearly retreats, profitable partnerships with brutal dictators, deals with "terrorists", the involvement of the Knights of Malta, war-mongering and profiteering, mind-control, secret societies for teens, ritual magic and more -- all spinning the dark threads in the web of conspiracy that our spinning blue ball has gotten caught in.

We've got a whole new crop of "Bonesmen" coming up, including George H.W. Bush's son George W. Bush ('68), Governor of Texas.

When Don Schollander ('68), the Olympic gold-medalist and only known Skull and Bones member living in Portland, was contacted by Willamette Week reporter John Schrang regarding his involvement in the Order, he said, "It's really something I can't talk about."

Not wouldn't, but "couldn't".

In wake of Antony Sutton's first ground-breaking exposes of the Order, the Sterling Library at Yale has refused to allow any other researchers access to the Russell Trust papers.

Daniel Gilman, like most Bonesmen, makes no mention of Skull & Bones or the Russell Trust in his memoirs or biographies.

So, are we all just 'fodder" for a secret society with satanic overtones that is attempting to form a one world government with themselves at the helm? Or is the Order of Skull and Bones just a bunch of frat boys from Yale? Wanna bet your future on it?

At Skull and Bones, Bush's Secret Club Initiates Ream Gore

by Ron Rosenbaum

<http://www.nyobserver.com/pages/story.asp?ID=4136>

This column ran on page 1 in the 4/23/01 edition of The New York Observer.

It's the primal scene of American power, of Bush family values. For two centuries, the initiation rite of Skull and Bones has shaped the character of the men who have shaped the American character, including two Presidents named Bush.

And last Saturday, April 14—for the first time ever—that long-secret rite was witnessed by a team of outsiders, including this writer.

Using high-tech night-vision video equipment able to peer through the gloom into the inner courtyard of the Skull and Bones "Tomb" in New Haven, The Observer team witnessed:

- The George W. effect: intoxicated by renewed proximity to Presidential power, a robed Bonesman posing as George W. harangued initiates in an eerily accurate Texas drawl: "I'm gonna ream you like I reamed Al Gore" and "I'm gonna kill you like I killed Al Gore."
- Privileged Skull and Bones members mocked the assault on Abner Louima by crying out repeatedly, "Take that plunger out of my ass!"
- Skull and Bones members hurled obscene sexual insults ("lick my bumhole") at initiates as they were forced to kneel and kiss a skull at the feet of the initiators.
- Other members acted out the tableau of a throat-cutting ritual murder.

It's important to remember this is not some fraternity initiation. It is an initiation far more secret—and far more significant, in terms of real power in the United States—than that of the Cosa Nostra. If the Bushes are "the WASP Corleones"—as the ever more stingingly waspish Maureen Dowd has suggested—this is how their "made men" (and women) are made.* It's an initiation ceremony that has bonded diplomats, media moguls, bankers and spies into a lifelong, multi-generational fellowship far more influential than any fraternity. It was—and still remains—the heart of the heart of the American establishment.

Further revelations turned up by the Observer Bones Investigation Unit include:

- The words to the secret Skull and Bones "death mantra."
- Copies of the Skull and Bones tax returns, obtained through Freedom of Information Act requests, raise questions about the legitimacy of the secret society's claim to charitable tax-exempt deduction status—particularly relevant considering recent criticism of the Bush tax plan for favoring the privileged few.
- A possible explanation emerged in the course of the initiation ceremony for George W.'s decision to run for President in the first place.

‘The Devil Equals Death’

The Observer Mission Impossible expedition had its inception several months ago with a phone call from Peggy Adler, the research associate on my previous Skull and Bones piece in The Observer (July 17, 2000). She is the demon investigator and former Iran-contra committee staffer who, among other coups, cross-referenced corporate boards to crack the "RTA code," the corporate shell game by which the corporate shell of the Skull and Bones society, the Russell Trust Association, shielded its paper trail from prying eyes by changing its name to RTA Inc.

Ms. Adler said she had been approached by a member of the Yale community who wanted to share with us a remarkable coup of his own: He had found a way last year, in April of 2000, to audiotape the Skull and Bones initiation ceremony. And he wanted to know if we'd be interested in an attempt to videotape it this time.

And so one afternoon last December, shortly after the Bush electoral victory had been certified, I met with the intrepid fellow; he booted up his laptop and let me listen to the sounds of a ceremony that had been the subject of fevered speculation for nearly two centuries now.

Of course, there is more to Skull and Bones than the mystical mumbo-jumbo of its rituals. The rituals are less important than the relationships—the bonds of power and influence that develop between Skull and Bones initiates after they graduate. But the relationships are first forged by the rituals and fact that the founders of Time Inc. and the C.I.A., as well as several Secretaries of State and National Security Advisors—the men who made the decision to drop the Hiroshima bomb, invade the Bay of Pigs and plunge us into Vietnam, the Tafts, the Bundys, the Buckleys, the Harrimans, the Lovetts—all took part in this initiation ritual may have something to do with the real world power of those bonds. The unspoken understanding, the comfort level with the clandestine, the nods and winks with which power is exercised.

The initiation ceremony begins the process of inculcating into the elect of the elite (just 15 out of 1,300 in every Yale class) the same mystical sense of mission that allowed the British Old Boy network to rule a worldwide empire.

The whole phenomenon is rarely looked into beyond the exotic ritual trappings (although Evan Thomas and Walter Isaacson talk about the world-wide web of Bones foreign policy mandarins in *The Wise Men*). But it's something I've been investigating off and on for a quarter of a century now. I am the Ahab of Skull and Bones, pursuing the white whale (or white male) leviathan to the utmost depths. As an undergraduate at Yale I lived next door to the Skull and Bones Tomb, and back in 1977 I published the first outsider's investigation into Skull and Bones, its rituals and its influence on American political culture (an updated version of that piece, revised to include my chilly exchange with George and Barbara Bush on Air Force Two, can be found in my recent nonfiction collection, *The Secret Parts of Fortune*).

And so it was momentous for me to actually hear the sounds of the Skull and Bones initiation on that laptop. But in listening to it, awe gave way to a mixture of puzzlement and embarrassment—and an even deeper, unsatisfied curiosity.

In part it was the fact that the ritual was heard but not seen. My Yale source had found a

previously unexploited perch from which to record the sounds of the ceremonies, but could glimpse them only incompletely. He reported a figure dressed like the devil, another one in a hooded-skeleton costume and others in robes. The thing that stood out for me, listening to it, was what I've come to think of as "the death mantra."

Yes, the death mantra—here it is, the three-line Skull and Bones initiation-ritual theme that has bound three Presidents (including the present one) to their secret society:

‘THE HANGMAN EQUALS DEATH!

THE DEVIL EQUALS DEATH!

DEATH EQUALS DEATH!’

Most of the speculative lore about the Skull and Bones ritual has centered on its death fixation. Beyond the obvious skull-and-crossbones insignia, of course, the most persistent story is that initiates spend their senior year in the basement crypt of the Bones Tomb taking turns lying in a coffin and, in two long, intense, psycho-drama autobiographical sessions in said coffins, recount their personal and sexual history to the other 14 chosen ones. The better to bond for life with those they know best and prepare for their destiny as stewards of the ruling class.

The death-centered imagery, the injunction to initiates that they must "die to the barbarian world" and be reborn in the Elysian company of the elect of "The Order," as they call it, is what makes Skull and Bones as radically different from a college fraternity as the Gambino family is from the "hunting and fishing club" that was their nominal headquarters.

The hangman equals death. The devil equals death. Death equals death

What the hell is going on there? Is it a puzzle in logic, like "All men are mortal. Socrates is mortal ..."? Does it solve out to "The hangman equals the devil?"

Could one detect a capital-punishment theme here—the hangman as executioner presaging George W.'s prolific execution rate as Texas governor? "George W. equals death," you might say.

And what about the devil? (Well, the figure dressed like the devil.) Is that the secret they've been covering up ever since the society was founded in 1832, the offshoot of a German secret society: devil worship? A fulfillment of the paranoid fantasies of the fundamentalist right, who believe the Eastern establishment is a front for Satanic conspiracy.

Probably not, but it made me more eager to participate in this year's caper: the attempt to see as well as hear it, to capture it all on video—for educational, historical and journalistic purposes to document a defining rite of passage of the American ruling class.

Oh, yes—before we get to the night-vision videotape, there was one more thing, the embarrassing part of the audiotape, the OOGA-BOOGA part. Part of the ceremony on the tape involved an initiation master ordering the neophytes to fetch bones and uttering the (I guess) fake Tarzan-movie "native" chant "OOGA BOOGA." It left me feeling embarrassed for Skull and Bones. Hard to ever take seriously again anyone whose defining life-mission moment includes an OOGA BOOGA.

But as it turned out, "OOGA BOOGA" was not evident in this year's ceremony, as far as

we were able to tell. Perhaps it was an improvisation, like this year's impersonation of George W. ("I'll ream you like I reamed Al Gore") was.

The Observer Mission Impossible Force met to plot strategy an hour before sunset on initiation night, Saturday, April 12. It is not widely known, but Tap Night, which occurs on Thursday, is not generally the same as initiation night. The good stuff happens on Saturday night, and already limos are cruising the quiet streets that crisscross the Yale campus, conveying initiates of other secret societies to their rituals. Bones initiates come on foot, knock on the massive triple-locked wooden door of the Tomb and are conveyed to the first stage of the ritual. But we are getting ahead of ourselves.

Let me just mention how much I admired the intrepid Yale members of the Observer Bones Task Force for displaying the kind of curiosity, initiative and heretical, skeptical impulse apparently absent on most Ivy campuses, if you believe David Brooks' recent Atlantic Monthly cover story on get-along-go-along premature careerists. The guys on my team will make more of a real contribution than any of the smug secret-society types.

First on the agenda was a quick examination of the Bones income-tax filings, which an outside consultant to the team had obtained through Freedom of Information Act requests. He and Peggy Adler pointed out to me a couple of dubious assertions on the Form 990's (Return of Organization Exempt from Income Tax), which called into question certain of the grounds for charitable exemption. In particular, there was the assertion in the 1997 RTA Incorporated filing (Part VI, line 80b) that the organization was not "related ... through common membership, governing bodies, trustees, officers etc. to any other exempt or non-exempt organization."

Contradicting that assertion is information on the filing of the Deer Island Club Corporation. Deer Island is the private island of the Skull and Bones Society, located in the St. Lawrence River. It is the place where Bones members bring their families for summer get-togethers. It is wholly owned and run by Skull and Bones members, apparently contradicting Bones' claim of "no relationship" to another exempt organization, and appearing to contradict the strictly educational and charitable mission for which RTA gets its exemption for Skull and Bones.

The consultant argues in a memo that the purpose of the 80b question on the Bones deduction claim form "is to prevent tax exempt charities from undertaking non-charitable activities by hiding them in another corporation. This is of course precisely what RTA Inc. is accomplishing through the Deer Island Club Corporation. In order to conceal this arrangement however RTA Inc. denies its connection to the DICC."

In fact, he goes on, "RTA and the DICC are so closely linked that for all intents and purposes RTA Inc. does own Deer Island despite its claims to the contrary."

I'm not going to go into the whole tax issue here. Perhaps the Bones shell corporation has a good and valid reason for claiming that it has no connection to the Bones private-island country club.** Perhaps this sort of thing goes on all the time among the private charities of the privileged. I don't think Deer Island will become George W. Bush's Whitewater. But one might think that a scrupulous White House counsel would want to look at the kind of tax information George W.'s secret society is filing on his behalf. Particularly since he's promising enormous windfalls for the privileged, the tax breaks his secret society takes should be utterly beyond suspicion. Does the President, I'd like to know, claim his

Skull and Bones dues as a charitable deduction, when the only charity seems to be providing a club house and country house for the privileged? The RTA filing claims Skull and Bones exists "for the benefit of Yale University." But Yale—which celebrates three centuries of luminous attainments this weekend—ought to question what "benefit" it gets from chants of "lick my bumhole" and the mockery of Abner Louima.

Anyway, as night came falling and we choreographed the evening's caper, I felt that we were carrying on an old-fashioned, longstanding tradition: the natural reaction of the democratic (small D) tradition to elitist power that conceals itself within the cloak of privilege and secrecy. And for me, it was a culmination of my own quarter-century quest, one that had become personalized lately by the fact that our Skull and Bones President had been a classmate of mine at Yale.

‘Run, Neophyte, Run!’

At last, zero hour approached. For two centuries, the outside world had wondered and fantasized about what was about to happen, what actually went on in the fabled Skull and Bones initiation. There's a long tradition of Yale secret societies (including Bones) raiding other secret societies to capture their ritual artifacts. In the 1970's, an all-woman break-in team published photographs of the Bone's Tomb's interior. But tonight, for the first time ever, we would attempt to capture the actual secret initiation ritual and bring it to light for anthropological study. Our team's equipment included three night-vision-capable digital-video cameras, one tape recorder, a stepladder and two walkie-talkies. (I could never get mine to work.) Because of a recent injury which limits my mobility, I was stationed at a listening post with my tape recorder while the video-cam team proceeded to their more perilous perch at the forward base (as those of us in special ops call it). We planned to rendezvous afterward for me to view the tape.

We split up just as the whoops and groans, the screams and moans began to emanate from inside the Tomb and the masters of the Skull and Bones initiation began establishing the posts they'd man for the occult psycho-drama to come.

From my post, I could see through an open window shadowy figures walking very close above my head. Later I'll put my audio impressions together with the video-cam record the other team obtained for a more complete picture, but first let me transcribe some of the notes I made from listening in. Fragmentary as they are, they capture some of the strangeness, and perhaps the kind of disorientation the initiates themselves experienced there in the courtyard of Skull and Bones.

First, there was the guy posing as George W. He seemed to be a bit disgruntled at being given this role—a feeling he expressed by calling out in his George W. drawl to another "Patriarch" (as they're called): "I got the power to bomb the crap out of China and they give me this station."

Then someone—one of the initiates?—called out "Uncle Toby!" (Many Bone ritual personae are taken from Laurence Sterne's *Tristram Shandy*—you gotta give them credit there for good taste.)

"Uncle Toby!" the cry repeated.

"Shut up, neophyte."

"Take that plunger out of my ass, Uncle Toby."

Presumably, this mocking Louima reference was a ploy to scare initiates into thinking Uncle Toby was going to give them the plunger treatment.

That cheerful rectal theme was followed up by:

"I'm gonna ream you like I reamed Al Gore!" from the George W. imitator.

Followed by "Help me! It's the devil!"

And then "George W." really getting into it: "I'm gonna kill you like I killed Al Gore."

Silence. Then a door opened. Voices—half of them, it seemed, women—were screaming: "Run! Neophyte! Run, neophyte!"

(The neophytes are, of course, the new initiates.)

From my post, I could only see hooded figures racing about in the darkness above my head, accompanied by cries of:

"Run, neophyte!"

"Find the femur!"

And (again): "Take that plunger out of my ass, Uncle Toby!"

Then silence for awhile. The neophyte seemed to have gone back inside the Tomb. After which one of the Patriarchs complained, "We ought to get better blood than this fuckin' syrup, man."

It was only later that I learned what the blood was for: the whole throat-slitting "barbarian" tableau after the skull-kissing.

But first there was a different kind of kissing being referred to. There were cries of "Lick my bumhole, neophyte!" "Lick my ass, neophyte!" "Do you like my bum, neophyte?" (Despite these heartfelt pleas, we did not witness any of those acts being consummated.)

The bumhole tribute was followed by more cries of "Get the femur!" and at least part of the death mantra I'd heard before: "DEATH EQUALS DEATH."

Following which, "George W." chimed in with "I'm the President of the motha-fuckin' U.S.A."—apparently just for the sheer pleasure of saying it. (He was sounding more like the real George W. all the time.)

It began to be clear that what was going on outside in the courtyard was the climax of an initiation ceremony that began inside the Tomb. There, it's reputed, the initiates must first enter into a coffin and "die to the barbarian world," to the world of "savages" (all but the Skull and Bones elect), in order to be reborn as a member of "The Order." Then comes the skull-kissing and the throat-slashing.

Two hours later, after all 15 of the initiates had burst out to be harangued and scared, I approached the rendezvous point with the night-vision camera team. This was the moment of truth: The night-vision team wasn't sure what their digicams had picked up. With their own eyes they'd gotten evocative glimpses, but the playback on the camera's swing-out view screens would be the first time, so far as we knew, any outsider had really seen the legendary ritual. A ritual three Presidents, a few Supreme Court justices, maybe a dozen

Senators (including 2004 Democratic Presidential contender John Kerry—which would mean a head-to-head, Skull-to-Skull smackdown with George W.), several Secretaries of State, literary and cultural luminaries including John Hersey and William F. Buckley, had all undergone.

The footage was ghostly, it was grainy—but from the angles of the night-vision cams, we were able to piece together a narrative of what happened when the initiates emerged one at a time from the preliminaries inside the Tomb.

First they were led forward by a figure in a devil costume. Not really a sinister, Satanic-looking figure but, as one of the team put it, "More like Satan's Little Helper."

A shrill, menacing and sometimes blood-curdling chorus of cries and screams and imprecations accompanied the emergence:

"Hurry, neophyte!" "Run, neophyte!"

"Find the femur, neophyte!" Along with the occasional "Lick my bumhole!" "Remove the plunger!"—type outcries.

The devil figure pulled them into a white tent in the courtyard where, we think, they found their femurs and emerged with what looked like a thigh bone, although it was impossible to tell whether it once belonged to a human or not.

When they reemerged from the tent, they were led to the centerpiece of this part of the ritual.

They were forced face-to-face with a shocking tableau: a guy holding what seemed like a butcher knife, wearing a kind of animal-skin "barbarian" look, stood over what seemed to be a woman covered in fake blood and not much else. The neophyte then approached a skull a few feet away from the knife-wielder-and-victim tableau. The neophyte knelt and kissed the skull, at which point the guy with the knife knelt and cut the throat of the prone figure. (Well, pretended to cut the throat.)

I'm not sure what it all means. I've yet to decode the mystical significance of this, although I do love to think of former President George Bush kissing the skull. Obviously, it has something to do with subservience. Kiss the skull of power. Bow down to The Order. But what about the "barbarian" cutting the throat of his victim?

Does it mean "One dies to the barbarian world"? Does it mean "Death to the barbarians"? Does it endorse cutthroat tactics? Is that how they enforce silence and secrecy?

I plan to continue my relentless study of the hermeneutics of the Bones rituals, myths and symbolism based on these new revelations, and perhaps with the help of a Bones graduate who feels the time has come to lift the veil on the silly (and no longer even secret) symbolism of their society. (Contact me privately c/o The Edgy Alliance, 577 Second Avenue, Box 105, N.Y., N.Y. 10016.)

All that death imagery, though: Maybe it's meant to be a first ritualistic confrontation with Mortality, the skull as a memento mori designed to instill in the "neophyte" a sense of the gravity of one's mission in life.

In that regard, consider the direct relevance of at least one aspect of the ritual to George W. That recurrent phrase: "Run, neophyte, run!"

Think about it. When George W. was first considering the fairly serious shift from baseball-team owner (whose major achievement was trading away Sammy Sosa) to governor of Texas, or when he was considering the shift from one-term governor of Texas to President of the United States, what decided him—what made him think he could pull it off, despite years as a semi-permanent neophyte? Could it be that what he heard, echoing in his brain, down the corridors of the years, was the injunction from that long-ago April night when he was a Skull and Bones initiate? When he bent down to kiss the skull and heard, resounding in his ears, the command: "Run, neophyte, run!"

Introduction	

This special report is intended to assist the Japanese audience in more fully understanding the present policies of the United States under the administration of President George Bush. It explains the thinking behind America's military adventure in the Persian Gulf and its current attitudes toward the Middle East region.

In so doing, we provide a glimpse into the most powerful organization in America--the Order of Skull & Bones. This secret fraternity is based at Yale University in New Haven, Connecticut, where many of the leading members of the U.S. government and the American intelligence community received their formal education. The Order, as it is referred to by its members, is a bastion of White Anglo Saxon Protestant (WASP) culture, which is at the core of the American 20th century outlook.

The reader will learn that President George Herbert Walker Bush's concept of the New World Order is an old idea, one which has its origins in the philosophy and beliefs of the secret Skull & Bones fraternity. Today in particular, this is the prevailing outlook of the U.S. government, many of whose most influential members, like the president himself, are part of the Skull & Bones network. These men seek to recreate the American imperium of the immediate post-World War II period, an era which President Bush frequently refers to as "the American Century."

The powerful men of Skull & Bones genuinely believe that they have a strategic and moral "right" to control world affairs. Consequently, they take upon themselves the authority to crush any rivalrous threat to U.S. imperial leadership, whether by current allies, such as Japan, Germany or Great Britain, or by Cold War adversaries, like the Soviet Union. The members of the Order, due to their narrow WASP upbringing, view with particular suspicion the maneuverings of Zionist Israel and its affluent, influential lobby in the United States.

Bush, his fellow Bonesmen and their like-thinking elitist allies in the American Establishment see themselves as New World Order warriors, an American samurai caste of sorts, whose mission is restoring American greatness. They intend to utilize the institutional networks of the U.S. government and key private agencies, such as the New York Council on Foreign Relations, to advance their purpose.

The Skull & Bones members believe in the idea of "constructive chaos." By keeping their true policy intentions secret, by constantly sending out mixed signals on all critical policy issues, they consciously seek to sow confusion

among both their nominal "friends" and "enemies" alike.

The fulcrum for the policy of constructive chaos is, at present, the Middle East situation. Although U.S. military action in the region has for the time being subsided, America's military power will remain a critical determinant in the future of that vital zone of conflict. American military power is aimed at securing undisputed control over the vast reservoir of oil -- not at necessarily fostering any permanent alignment of local states or combinations of regional interests.

If President George Bush and his fellow true believers are successful, the United States will be first among equals in the New World Order. This is their goal. It is also the quest of the Bonesmen of the Order of Skull & Bones -- America's warrior aristocracy.

THE ORDER OF SKULL & BONES

Skull & Bones was founded at Yale College in New Haven, Connecticut in 1832. It is the oldest and most prestigious of Yale's seven secret societies. Among the others are: Scroll & Key, Book & Snake, Wolf's Head, Eliahu, and Berzelius. These fraternities serve as a recruiting ground for young men destined for careers in government, law, finance and other influential sectors of American life. Skull & Bones is the elite of the elite among these secret societies. Only Scroll & Key can claim a near equal influence on American affairs over the past 160 years.

Unlike the Greek fraternities on most other American university campuses, Skull & Bones and its similar secret societies exist exclusively at Yale. They are not part of any nationwide public association. The other elite Ivy League colleges, Harvard and Princeton have similar exclusive secret societies. Yet, even among these few universities, the secret societies of Yale -- led by Skull & Bones -- are unchallenged in their influence on American political affairs.

According to some accounts, the Skull & Bones secret society at Yale has an underground affiliation with two other societies which were simultaneously founded at two other locations. The number "322" that appears under the skull and crossbones on the Order's emblem is believed to indicate the year of its founding -- 1832 -- and the fact that it is the second lodge within an international system. By some accounts, the lodge holding the number "1" is in Germany and the lodge numbered "3" is based at another American college.

Since its founding, Skull & Bones has only inducted about 2,500 members. At any given time, only about 600 or so members of the Order are alive. This small number underscores the tremendous concentration of power in the hands of its members.

If the members of Skull & Bones were to select a Hall of Fame from among their own elite ranks, some of the people whose names would almost certainly appear

at the top of the list would be:

* Alphonso Taft, a founding member of the Order who served as the Secretary of War under President Rutherford B. Hayes (1876-1880).

* William Howard Taft, the only man to ever serve as both the President of and Chief Justice of the United States Supreme Court.

* Henry Lewis Stimson, partner in the Wall Street law firm of Root and Stimson, Secretary of War under President Taft (1908-1912), Governor General of the Philippines (1926-1928), Secretary of State under President Herbert Hoover (1929-1933) and Secretary of War under Presidents Franklin Delano Roosevelt and Harry S. Truman (1940-1946).

* Averell Harriman, investment banker with Brown Brothers Harriman, director of the Lend-Lease program of the U.S. State Department (1941-1942), U.S. Ambassador to the Soviet Union (1943-1946), Governor of New York, Under Secretary of State for Asia (1961-1963), and presidential secret envoy to Soviet leaders Stalin, Krushchev, Brezhnev and Andropov.

* Robert Lovett, partner in Brown Brothers Harriman, Assistant Secretary of War for Air (1941-1945), Deputy Secretary of Defense, Secretary of Defense (1950), leading member of the New York Council on Foreign Relations.

* Harold Stanley, investment banker, founder of Morgan Stanley.

* Robert A. Taft, United States Senator (1938-1950).

* Prescott Bush, investment banker and partner in Brown Brothers Harriman, United States Senator from Connecticut, father of George Herbert Walker Bush

* George Herbert Walker Bush, United States Congressman (1964-1970), Chairman of the Republican National Committee, United States Ambassador to the United Nations, first American Diplomatic Liaison to the Peoples Republic of China, Director of the Central Intelligence Agency (1975-1977). Vice President of the United States (1980-1988), President of the United States (1988-).

* John Thomas Daniels, agro-industrialist, founder of Archer Daniels Midland.

* Hugh Wilson, foreign service officer, Counselor to Japan (1911- 1921), U.S. Minister to Switzerland (1924-1927), Assistant Secretary of State (1937-1938). Ambassador to Germany (1938), Special Assistant to the Secretary of State (1939-1941), Office of Strategic Services (1941-1945)

The members of the Order of Skull & Bones, true to their firm belief in

"constructive confusion," have intentionally allowed a series of conflicting mythologies to spring up about the origins and history of their secret fraternity. According to one version of the Order's founding, it was an outgrowth of an earlier British or Scottish freemasonic grouping first established at All Soul's College at Oxford University in the late 17th century. Another version of the history of Skull & Bones is that it grew out of the German "nationalistic" secret societies of the early 19th century. Still a third explanation is that Skull & Bones is an uniquely American institution which adopted some of the rituals of European freemasonry, but molded these rituals and beliefs into a new form.

Regardless of these conflicting accounts, it can be stated with certainty that the Order was first established on the Yale campus in 1832. It was officially incorporated only in 1856 under the name Russell Trust Association. According to virtually all the available biographical data on its early members, the money required to sustain the secret order's campus affairs and its broader role in placing its members into key positions of influence upon their graduation from Yale, derived from the opium trade in the Far East. That trade was set up by the British East India Company and was flourishing by the time the Treaty of Paris was signed in 1783 ending the American War for Independence. The East India Company during this period was controlled by the Baring Brothers Bank (Toward the closing decades of the 17th century, the British House of Rothschild would supplant the Baring Brothers as the controlling financial interests in the China opium trade.

Through the sponsorship of the Barings and also the Rothschilds, a number of leading New England families, some of whom had sided with Great Britain during the American Revolution, were brought into the opium trade as junior partners. These merchant families ran fleets of clipper ships and became in many cases fabulously wealthy as the result of their association with the British East India Company. Among these key New England merchant families were: Cabot, Coolidge, Forbes, Higginson, Sturgis, Lodge, Lowell, Perkins and Russell.

These New England merchant families founded the United Fruit Company and the Bank of Boston. The founding families of Skull & Bones included the Russell and Perkins families, Over several generations, however, all these families heavily intermarried and became, in effect, one extended power grouping.

William Huntington Russell incorporated Skull & Bones as the Russell Trust Association. Throughout the 20th century, the Russell Trust Association listed the New York City headquarters of Brown Brothers Harriman as its address.

Russell was valedictorian of his class at Yale in 1833. He and his Skull & Bones comrades considered themselves to be a special elite among the merchant banking and Puritan pilgrim elite of Yale. They took the Puritan beliefs of the early New England settlers, that they were "elected by God," and pre-ordained to rule North America.

The founding of Yale College in 1701 pre-dates the American Revolution by several generations. Many of the founders of Yale were righteous men of the Puritan heritage who devoutly believed in God and country. Some of these patriotic souls later made up the core of Benjamin Franklin's political coalition which ultimately broke with the mother country, Great Britain. Many graduates of Yale were active in the American Revolution and the founding of the United States.

Two critics of the Order, historian Antony Sutton and investigative journalist Ron Rosenbaum (himself a Yale graduate), both concluded that Skull & Bones has degenerated since its founding and has taken on more of the occult and ritualistic trappings of the majority of European freemasonic and Illuminati secret societies. Sutton charges that the Order is secretly known among its initiates as the "Brotherhood of Death" and has become an evil instrument in the hands of America's secret power elite. Rosenbaum claims that the society's Germanic origins are inherently wicked and pre-Nazi.

In a long 1977 article in Esquire magazine, Rosenbaum charged that the Skull & Bones building on the Yale campus houses remnants from Hitler's private collection of silver. While these stories cannot be dismissed out of hand, it must be noted that authors Rosenbaum and Sutton may be biased. As a young Jewish student at Yale, Rosenbaum was almost automatically excluded on religious grounds from the inner sanctum of the campus's secret societies. Sutton, a British-born eccentric historian, proudly admits his strong British biases, frequently citing philosopher John Stuart Mill as the spiritual mentor in his book on the Order.

Despite the possible personal biases in these two accounts of the history of the Order of Skull & Bones, it must be acknowledged that the membership of the society has tended over generations to converge upon a small group of New England families who have intermarried and then sponsored their sons and nephews into the Order. This kind of inbreeding always tends to produce narrow-mindedness and prejudice against outsiders, which can be a serious shortcoming, particularly among individuals responsible for charting the course of a nation as powerful as the United States.

It can be documented by comparing the family charts of the early Bonesmen that there is today a core group of no more than 20 to 30 families who form the nucleus of the Order. The majority are old-line Puritan families who came to North America in the very first wave of settlers in the 17th century. Among these prominent families are: Whitney, Lord, Phelps, Wadsworth, Allen, Bundy, Adams, Stimson, Taft, Gilman and Perkins. A second group of families in the Skull & Bones core earned fabulous fortunes during the 18th and 19th centuries and thus won a rite of passage into the New England elite, even though they were not among the earliest settlers. The leading Skull & Bones families in this second category are: Harriman, Rockefeller, Payne, Davison, Pillsbury and

Weyerhauser.

A few of the Jewish banking families who made their way from Germany to the United States during the 18th and 19th centuries were eventually granted limited access to the WASP inner sanctums. Some families, like the Schiff, Warburg, Guggenheim and Meyer families, were unofficially designated as intermediaries between the New England WASPs and their cousins in London. This was especially true after the Rothschild interests supplanted the Anglican Baring group as the most powerful financial cabal in the City of London. Some of these German Jewish families became so absorbed into the WASP or Anglican society that they eventually converted from Judaism to Protestantism and were gradually ostracized from the Jewish aristocracy.

The WASP families, however, never saw the prominent Jewish investment banking families of America as equals. The Jews were considered politically and culturally different by the WASPs, and have never been accepted into the latter's inner circle. For the most part, these Jewish merchant bankers are viewed with suspicion and distrust by the members of the Order. Moreover, the Jewish fraternal societies, such as B'nai B'rith, were formed out of the British-based Scottish Rite Freemasonry. Their sponsors in America, the Rothschilds and the Cecil Rhodes Trust (also known as the British Round Table Group), are connected with the British Foreign Office and its secret intelligence apparatus.

INITIATION AND RITUAL

To be initiated into the Order of Skull & Bones, one must endure a ritual of selection called "tapping". It is conducted by 15 senior classmen of Yale University who make up the current membership of the secret society. They select 15 members of the junior class to be the Bonesmen the following year. Historically, Skull & Bones kept blacks, Jews and all other non-WASPs from its ranks. Within the last 30 years, however, token members from these groups have been occasionally selected to join. Thus, in the most recent list of initiates to the Order, there is one Yale with a Jewish surname and even one with a Chinese name. According to author Rosenbaum, in recent years, the Order has inducted members of homosexual rights groups on the campus into its ranks.

Among the criterion for selection -- apart from family ties to the order, which has always been an important factor -- is what is referred to by historians and members as the "Three Ordeals." These ordeals are intended to measure the prospective Bonesman's ability to "make it" in the world beyond the university campus.

The first ordeal is boarding school. The overwhelming majority of Bonesmen, given their wealthy blueblood family pedigrees, attend one of the prestigious New England preparatory schools, i.e. private high schools. (Whereas a large number of the most elite of the Harvard University students attend Groton, a school with close ties to the Anglican-Episcopal Church, where they receive a

thoroughly Anglophilic education, the preferred prep schools for the future Bonesmen are the two Puritan Calvinist-sponsored Phillips Academies.)

The second of the ordeals is that of nature. The prospective Bonesmen are judged on their skills as outdoorsmen. Hunting in the New England countryside or, better yet, traveling to distant locations like Africa, the jungles of South America or even the American badlands of the Plains states, is a prerequisite for admission to the Spartan elite ranks of the Order.

The third of the ordeals is war. The experience of combat during wartime is considered to be of special significance for the Bonesmen, who see themselves as the elite of the New England WASP warrior caste. Many Yale Bonesmen of President George Bush's generation, as the result of the outbreak of World War II, went directly from prep school into the military service prior to their entering Yale. For a majority of Bonesmen, the preferred military service has historically been with the U.S. Navy. During World II the Naval air corp was a particularly important track for future Bones initiates. In peacetime, participation at Yale in military officer's training is desirable but not essential. The commitment to enter some branch of the military upon graduation is viewed with favor.

After the formal selection of the next group of prospective Bonesmen, there is an invitation followed by a formal initiation ceremony. First the 15 senior class members who are the members of the Order select a group of junior class members who are to be "tapped" for Skull & Bones. A group of Bonesmen proceed to the dormitory room of the "tappee." Upon reaching the door, they pound loudly. When the prospective member opens the door, a Bonesman will tap him on the shoulder and yell, "Skull and Bones: Do you accept?" If the candidate accepts, a message wrapped with a black ribbon sealed by black wax with the skull and crossbones emblem and the mystical Bones number 322 is handed to the "tappee." The message appoints a time and a place for the candidate to appear on initiation night. Candidates are instructed to wear no metal objects or clothing.

According to a 1940 Skull & Bones document, the initiation ceremony involves the following kinds of things: "New man placed in coffin -- carried into central part of building. New man chanted over and reborn into society. Removed from coffin and given robes with symbols on it. A bone with his name on it is tossed into the bone heap at the start of every meeting."

Within the Skull & Bones Crypt, also known as "the Tomb," there is what is referred to as a "sacred room" with the number 322. On the arched wall about the vault entrance is inscribed in German: "Who was the fool, who was the wise man, beggar or king? Whether poor or rich, all's the same in death."

This quotation from a German Freemasonic ritual remains a source of controversy surrounding the origins of Skull & Bones. It is one of the bits of "evidence" cited by some of the Order's most ardent critics that the group is

"Nazi like" and singularly "Germanic". In fact, the rituals of the Order are very much like the rituals employed by Scottish and English freemasonic lodges.

Some of the mystery and confusion surrounding these occult symbols and rituals is intentionally fostered by the Order itself. Among the principles taught to the members of the Yale secret society are the value of ambiguity and secrecy. These values are not taught as part of a purely mystical or occult quasi-religion. They are taught as valuable tools to be applied by the Bonesmen when they leave the insulated environment of the Yale campus and become officials of government, the intelligence community, the military or the private sector.

A careful study of the often confusing and self-contradictory behavior and public statements of President Bush and his closest advisers throughout the months of the Persian Gulf crisis of last year and war that followed offers a valuable example of how ambiguity and secrecy are applied by Bonesmen.

For the initiates of the Order, the question of whether secrecy and ambiguity are used for the purpose of accomplishing "good" or "evil" is of secondary importance. Secrecy and ambiguity are essential instruments for wielding power. The effective wielding of power is one of the overarching goals of all Bonesmen. The secret ties built up during the Bonesmen's senior year of active membership in the Order are maintained for life. Those ties link each Bonesman to every other initiate, especially to those initiates who were members of the Order in the same year.

Thus, every member of Skull & Bones is, in real and practical terms, part of a small elite group of young Yale graduates -- most from wealthy and powerful WASP families -- who enter the world of politics, business, finance, intelligence or education and who proceed to make their mark on the world.

According to several sources, President George Bush to this day frequently consults with several of his fellow Yale Bonesmen, and has, on occasion, called upon Skull & Bones members to carry out secret diplomatic missions for the White House.

THE SPARTAN MODEL

These rites of passage into the upper ranks of the WASP Establishment are capped by the experience the Bonesmen go through in their final year at Yale -- the year in which they actively participate in the Order. For the vast majority of the initiates, the process of inculcation with the ideas of WASP supremacy, an American Calvinist version of what British imperialist writer Rudyard Kipling called the "White Man's Burden," began at prep school.

According to the biographical accounts of a number of the leading Bonesmen, the prep school experience is paramount. At prep school, intellectual pursuits are encouraged, but special emphasis is also placed on athletic performance.

Future Yale Bonesmen are expected to excel in some team sport, such as baseball and football, both American inventions. (Members of Skull & Bones were involved in the development of both games.) Team sports supposedly prepare the future Bonesman to accept leadership responsibility, and more importantly, teach him to "respect the rules of the game."

According to one biographer, when George Bush was a Yale undergraduate he was a member of the university baseball team. Although he was apparently not a very good baseball player, he eventually became captain of the Yale team. One day during the Yale baseball season, he excitedly visited his mother to proudly proclaim that he had hit his first home run. She reportedly looked back at him with patrician coolness, and asked, "Yes, George, but did your team win the game?"

The particular emphasis on team sports during the prep school and Yale years is, according to several historians, part of the Spartan training that is so essential to the Skull & Bones philosophy. In the world of Skull & Bones, one of the greatest virtues is the ability to steer the nation into war and to successfully prosecute the war.

To the Bonesmen, the use of military power is a natural and essential corollary to political power. The Bonesmen are taught that, although ideas have their place, to truly transform history, military force is almost always required. Critics of the Order have pointed out that this philosophy of power and the imperial use of military force comes straight from the chronicles of the Roman Empire -- especially the Roman Empire during its phase of decline and collapse.

The criticism may prove to be most prophetically true of the current generation of Bonesmen who are leading the United States under the presidency of George Bush. During the final phase of the Roman Empire, legions were deployed out around the world to conquer and subjugate vast territories, while back in Rome, there was a breakdown, a crisis in which the entire social and cultural fabric of the early Roman republic was eroding and giving way to something akin to the drug, rock-sex counterculture of today. The Roman imperial policy of attempting to gloss over the decadence at home by engaging in constant wars of expansion led ultimately to the total collapse of Rome.

In this regard, the Spartan-Roman imperial outlook of the American WASP warrior caste, exemplified by Skull & Bones, cannot be precisely compared to the Japanese samurai code of Bushido. The Japanese Bushido code emphasized honor among the warriors and presumed a fundamentally moral or ethical vision of the world.

No such emphasis on morality and honor exists in the code of Skull & Bones. On the contrary, the Skull & Bones philosophy, according to several of its most astute critics and historians, emphasizes the "double-cross system." The "double-cross" is symbolically represented by the crossbones on the emblem of

the Order. According to this philosophy, anyone who is not an initiate is inferior, and can be lied to and manipulated to further the power of the WASP Establishment. To the extent that Japanese leaders view their American WASP counterparts as men of honor whose word is sacred and whose intentions are presumed to be virtuous, they will miss the fundamental character of the American imperium. This is of special importance today, with a leading member of the Skull & Bones system occupying the White House.

Skull & Bones philosophy first manifested itself at the American national political level in the late 19th century. At that time, the men of the Order adopted all the critical features of the British imperial system, especially the belief in the Anglo Saxon God-given right to rule over all the other races. Even countries like Japan, which were never colonial possessions of the Anglo-American combination, were viewed as inferior nations to be treated no differently from the colonies in Africa, India or Latin America.

In 1898, President William McKinley, one of the last of the American presidents to manifest any of the early republican (anti-British imperialism) traditions of the Founding Fathers, was under enormous pressure from the Skull & Bones-led American imperialists. Eventually, he went to war against Spain to "free" Cuba and seize the Philippines. This was the first time that the United States entered a war through devious manipulation and purely in order to expand its territories. It marked the beginning of a new epoch in American history which would forever alter the vision of the United States. It was the first evidence that the men of the Order were at the helm of the ship of state.

President McKinley's capitulation to the WASP warriors would prove to be fatal to himself and, some would say, for his country, too. The Spanish-American War of 1898 catapulted the Skull & Bones crowd into a position of dominance within the Republican Party. At the 1900 party presidential nominating convention, McKinley was forced to accept Teddy Roosevelt as his vice presidential running mate. The McKinley-Roosevelt slate was swept into office, in part as the result of the jingoist climate built up by the just-concluded Spanish-American War. Those circumstances were not all that different from the mood that prevails in America in the aftermath of the Gulf War of 1991.

Within months of his inauguration of 1901, President McKinley was assassinated by an anarchist while traveling through Buffalo, New York. Thus, Teddy Roosevelt became president, and the Order of Skull & Bones for the first time moved into the White House. Roosevelt surrounded himself with Bonesmen. His successor in 1908, William Howard Taft, was himself a second generation member of Skull & Bones.

HENRY STIMSON: MASTER BONESMAN

According to a January 1991 article by the Washington syndicated columnists Rowland Evans and Robert Novak, when President George Bush was making

his final decision to use military force to crush Saddam Hussein and decimate Iraq, he spent most of the Christmas holidays closeted at Camp David reading a newly published biography of one of his true heroes, fellow Skull & Bones initiate Henry Stimson. While most White House advisers thought that the gulf crisis would be ultimately resolved through diplomacy, unbeknownst to them, President Bush had already decided on the use of devastating military force -- regardless of what measures the world community or the Iraqi leaders took to avert war. Intimate Bush advisers described the president as being in a "mesmerized" state of mind as he walked around the presidential retreat in the Maryland mountains with his Stimson biography, "The Colonel: The Life and Wars of Henry Stimson," under his arm at all times.

Indeed, for most contemporary Bonesmen, Henry Lewis Stimson, the quintessential WASP warrior, was the very personification of the Order's full ascent to power during the period of World War II.

A member of the Order's class of 1888, Stimson served seven U.S. presidents: Theodore Roosevelt, William Howard Taft (a fellow Bonesman), Woodrow Wilson, Calvin Coolidge, Herbert Hoover, Franklin Delano Roosevelt and Harry S Truman. As the Secretary of War under FDR and Truman, Stimson oversaw the Manhattan Project, which developed the atomic bomb. Stimson personally decided on the use of that devastating weapon against the Japanese cities of Hiroshima and Nagasaki. Years earlier, as the chairman of the American delegation at the London Naval Conference and as Secretary of State under President Hoover (1929-1933), Stimson had played a pivotal role in restricting the size of the Japanese Imperial Navy. He would be an architect of the FDR 's administration's economic provocations against Japan which ultimately helped induce Japan into the attack at Pearl Harbor, thus bringing the United States formally into World War II. And Stimson was also ultimately responsible for the FDR administration's decision to intern the Nisei (Japanese-Americans) after Pearl Harbor.

Yet, it was also Stimson who ordered American bombers to refrain from attacking the old Japanese imperial capital of Kyoto, a city rich in religious and historical tradition and artifacts. And, according to at least one of Stimson's biographers, it was also "the Colonel" who decided at the close of the war that the Japanese emperor should not be deposed. His sensitivity to Japanese culture and the importance of allowing Japan to retain honor even in defeat is widely to his close adviser, Joseph Grew, a longtime U.S. ambassador to Japan and an accomplished historian. Whether this report of Stimson's involvement in the decision to maintain the emperor is accurate or whether it underplays the role of Gen. Douglas MacArthur, the fact remains certain that Stimson was the key policymaker overseeing the postwar occupations of both Japan and Germany.

To fully understand President George Bush's attitudes and policies toward Japan, one must first appreciate the overarching influence that Stimson had on

the current occupant of the White House.

According to his British biographer Geoffrey Hodgson, Stimson's membership in Skull & Bones was "the most important educational experience in his life." Unlike most of his fellow Bonesmen, Stimson earned his membership solely on the basis of his achievements at Yale -- not through family money. His parents were not wealthy, although his forefathers did come to America as early Puritan colonists. But Stimson made up for his lack of financial credentials by his fierce competitive spirit. As he himself put it, the "idea of a struggle for prizes, so to speak, has always been one of the fundamental elements of my mind, and I can hardly conceive of what my feelings would be if I ever was put in a position or situation in life where there are no prizes to struggle for."

Although Stimson did not come from classic blueblood background, he married into wealth and power. His wife, Mabel White, came from a prominent Establishment family with longstanding ties to the Order. Thus, upon graduation from law school, Stimson became a partner in the law firm of Eliahu Root, President Theodore Roosevelt's Secretary of War.

Although Stimson and Roosevelt would have a falling out in later years, early on Roosevelt and Root provided "the Colonel" with the critical sponsorship and training required to succeed in the world of Establishment politics. According to Stimson's biographers, Roosevelt would frequently taunt the young Bonesman about the fact that he, unlike the president, had never been in the military or fought in any wars. (Roosevelt had resigned as Under Secretary of the Navy to go off and fight in the Spanish-American War.) Thus, at the ripe old age of 44, Stimson joined the Army during World War I and served in the American Expeditionary Force in Europe.

Among the other lasting interests that Roosevelt would pass on to Stimson was his deep passion for the Pacific. Roosevelt was convinced that America's imperial destiny was dependent upon its domination of the Pacific Ocean and the Far East. The Spanish-American War, which marked the beginning of America's imperial phase -- and the virtual abandonment of the republican principles upon which the nation had been founded -- began the U.S. colonial occupation of the Philippines, which would continue through half of the next century. Ultimately, Stimson would himself serve as the American Governor General of the islands.

In 1900, Roosevelt wrote to Stimson: "Our people are neither craven nor weaklings, as we face the future high of heart and confident of soul, eager to do the great work of a great power... wish to see the United States the dominant power on the Pacific Ocean."

STIMSON'S KINDERGARTEN AND THE COLD WAR

Henry Stimson's towering influence on George Bush and many other current

members and like-thinking allies of the Order was based not only on "the Colonel's" lifetime of achievements. It was also rooted in the fact that Stimson used the World War II period to groom a successor generation of young WASP warriors who would dominate American policymaking during the Cold War and beyond. Although not every member of what came to be known as the "Stimson's Kindergarten" was a member of Skull & Bones, or even a Yale graduate, many were. All were inculcated with the Skull & Bones philosophy and methodology of wielding power. It is through this alliance and patronage system that the influence of the Order has been extended far beyond its small membership roster.

Among the leading members of the "Stimson Kindergarten" were:

- * John J. McCloy, who was Assistant Secretary of War and later served as the High Commissioner for Germany during the postwar occupation.
- * Robert Lovett, a member of Skull & Bones and a partner in the Order's preeminent Wall Street investment house Brown Brothers Harriman. He became Stimson's Assistant Secretary of War (Air Section). Lovett remained an influential policymaker through the presidency of John F. Kennedy.
- * Harvey Bundy, another Bonesman, who became Stimson's special assistant at the War Department. Harvey Bundy's two sons, McGeorge and William, fresh out of Yale University and Skull & Bones, joined their father on Stimson's personal staff. McGeorge Bundy would co-author Stimson's memoirs *In Active Service in Peace and War*.
- * Dean Acheson, Assistant Secretary of State, Yale graduate (he was not a member of the Order, but, rather, of one of the other Yale secret societies, Scroll Key) and senior policy adviser to FDR and Truman, who ultimately made him Secretary of State.
- * Gen. George C. Marshall, Chief of Staff of the armed forces during World War II and later Truman's Secretary of State.

This group of high-powered policymakers of World War II and immediate post war period were known as the "Stimson-Marshall-Acheson Circle." They shaped America's Cold War containment policy against the Soviet Union and Communist China, including the involvement of the United States in the Korean War. It was also this group which, for better or worse, directed the postwar reconstruction programs in Germany and Japan.

Another influential member of Skull & Bones, Averell Harriman, was personally responsible for the sacking of Gen. Douglas MacArthur. It was Harriman, a banker, intriguer and former American Ambassador to Moscow, who convinced

President Truman to fire MacArthur.

The predominant role that Averell Harriman would play over the course of 40 years of postwar American policymaking underscores the fact that not all leading members of Skull & Bones share the identical policy outlook. While some members of the Stimson inner circle were critical of Harriman, whom they considered to be too personally ambitious (he was also a liberal imperial Democrat in a secret fraternity dominated historically by moderate Republicans), Harriman nevertheless stands out as one of the Order's most active figures. The fact that he was a business partner and social intimate throughout his adult life of fellow Bonesman and Republican Sen. Prescott Bush Sr., the father of the current president underscores that point.

Henry Stimson died in 1950, leaving behind a core group of political offspring led by members of his old secret society, Skull & Bones. In the final years of his life he was involved in helping to shape a number of postwar government agencies which would become bastions of power and influence for the Order for years to come. Through this active role in shaping the key institutions of the Cold War era, Stimson was able to establish a continuity of power that would more than compensate for the fact that no single figure among his "kindergarten" emerged as a clear successor, and that several, like McGeorge Bundy, would prove ultimately to be rather disappointing students.

The National Security Act of 1947 transformed Stimson's old War Department into the Department of Defense, a sprawling civilian bureaucracy which would in future years house many of the most important members of the Order. Robert Lovett, for example, would become the Secretary of Defense in 1950. The 1947 act also established the Central Intelligence Agency (CIA) as the permanent successor to the wartime Office of Strategic Services (OSS). In the early 1950s, the State Department's Office of Policy Coordination was merged into the CIA, giving the secret agency total control of America's clandestine operations. The National Security Agency (NSA) also was established, under the direction of the Department of Defense, vastly expanding America's signal intelligence capability.

Of all these agencies of the Cold War era, the CIA would stand out as a singular power center for Yale University alumni in general and Skull & Bones initiates in particular. The term "spooks," the well-known CIA term for a clandestine operator, was originally Yale campus argot for a secret society member. According to a recently published article in the Covert Action Information Bulletin, there is reportedly a "Bones club" within the CIA which helps promote the intelligence careers of members of the Yale secret society.

It should be pointed out that bureaucratic standing is not a real measure of power within the CIA. Very often, individuals in relatively insignificant positions within the organizational chart wield tremendous clout and maintain access to the most sensitive information and policy. Thus, for example, the present U.S.

Ambassador to Beijing, James Lilley, a member of Skull & Bones and a career CIA man, is being suggested to replace William Webster as Director of Central Intelligence. For Lilley to step in as director of CIA would at this moment represent a demotion for the senior field operator. It is, however, a demotion he might accept as a personal favor to fellow Bonesman and longtime intimate pal George Bush.

The predominance of Yale graduates inside the CIA is also a part of the Stimson legacy. During World War II, many Yale students and even several leading faculty members entered the OSS. The X-2 Branch of OSS, the counterintelligence unit, was dominated by Yale students, as well as Yale English Literature professor Norman Holmes Pearson. One of the Yale men in X-2, James Jesus Angleton, went on to a legendary career as director of the CIA's counterintelligence staff.

Yale Skull & Bonesman and Stimson "Kindergartener" William Bundy assumed a senior post at CIA during the 1950s, as did Yale graduates Richard Bissell and Cord Meyer and Yale professor Sherman Kent.

VIETNAM: THE BONESMEN'S DEBACLE

According to author David Halberstam's best-selling critique of the Kennedy years, "The Best and the Brightest," the JFK presidency marked the high point of Skull & Bones postwar power. But it also marked the beginning of the secret fraternity's fall from the position of unchallenged power, and the beginning of America's precipitous decline as a world power. All these factors are summed up in one word: Vietnam.

John Fitzgerald Kennedy's Cabinet was largely handpicked by Skull & Bones elder statesman Robert Lovett, who was personally approached by Joseph Kennedy, the president's father, and asked to shape the direction of the new administration. Lovett had been one of the architects of the World War II industrial mobilization under President Franklin Roosevelt, which helped bring the United States out of the Great Depression. He had been a factional opponent of Averell Harriman within the Skull & Bones circles, initially opposing the Cold War containment doctrine and pushing the idea of Atoms for Peace during the early years of the Eisenhower presidency (1952-1960).

Kennedy had personally asked Lovett to join his Cabinet, but Lovett, a partner in Brown Brothers Harriman, preferred to shun formal government service. Instead, he placed a number of younger Bonesmen into the critical posts. McGeorge Bundy was appointed Kennedy's National Security Adviser. Averell Harriman was made Under Secretary of State for Asian Affairs, a position that placed him in charge of many of the most critical decisions along the way to disaster in Vietnam. William Bundy remained in a senior post at CIA.

The decision to escalate the American military involvement in Vietnam -- a

rejection of Gen. Douglas MacArthur's prophetic warning that the United States should never engage in a ground war in Asia -- was made by members of the Order. According to some accounts, President Kennedy began to have serious second thoughts about escalating the war, particularly after several private Oval Office discussions with MacArthur.

With Kennedy's assassination, American soldiers began pouring into Southeast Asia. Harriman remained a fixture of Vietnam policy under President Lyndon Baines Johnson. McGeorge Bundy remained on as LBJ's National Security Adviser until , when he left government service to assume the presidency of the Ford Foundation, the largest tax-exempt philanthropic agency in the United States. The Ford Foundation annually dispenses of nearly \$3 billion in grants.

In his capacity as president of the Ford Foundation, Bundy helped finance the anti-Vietnam War movement. The National Student Mobilization Committee, the umbrella group for the entire New Left of the late 1960s and early 1970s, was led by David Dellinger, a Yale graduate. Episcopal Church activist William Sloan Coffin, a Bonesman, a second leading figure in the anti-war protest movement, had previously served as a CIA officer.

Thus, the Order had its hands in two critical elements of the policy debacle of the second half of the 1960s. Some leading Bonesmen helped shape the disastrous limited war strategy in Vietnam, while other members of the Order, at least tacitly, contributed to the growth of the drug-rock-sex counterculture by nourishing the New Left soil from which it sprang.

As a result of the Vietnam debacle, the "Stimson Kindergarten" literally drove itself out of the corridors of power which it had occupied without challenge for the previous 20 years. With the election of Richard Nixon as president of the United States in November 1968, a different team came into prominence. The politics of that team were personified by Henry A. Kissinger, Nixon's National Security Adviser and Secretary of State.

In a May 1982 speech in London at the Chatham House headquarters of the Royal Institute for International Affairs, Kissinger boasted that he was an enthusiastic follower of the late British Prime Minister Winston Churchill, and that throughout his years in senior government posts under Presidents Nixon and Gerald Ford (1974-1976), he had always consulted more frequently with his counterparts in the British Foreign Office than he had with officials of his own government.

Although Kissinger had enjoyed early patronage from McGeorge Bundy, when the Bonesman was Dean of Harvard University and Kennedy's NSC adviser, the Kissinger era marked a low point in Skull & Bones' government power. The Central Intelligence Agency, a hub of the Order's clout, was decimated by scandals that only compounded the damage done to the Agency as the result of its role in the Vietnam disaster.

According to some respected writers, for example, Jim Hougan, author of "Secret Agenda," the CIA attempted to reverse the route by helping to bring down Richard Nixon in Watergate. There is significant evidence to bolster some of these accounts.

When Gerald Ford became president in August 1974 following Nixon's resignation, Skull & Bones made a brief comeback. In what came to be known as the "Saturday Night Massacre," Ford, in the autumn of 1975, removed Henry Kissinger from his post as NSC Adviser, replacing him with Gen. Brent Scowcroft. Kissinger ally James Schlesinger was fired as Secretary of Defense and replaced by Donald Rumsfeld. And CIA Director William Colby, who had dueled with Angleton, was fired and replaced by Skull & Bones member George Bush.

If these maneuvers were intended to be the first step in a more ambitious comeback by the WASP warrior faction, the plan was short-circuited with the election in November 1976 of Jimmy Carter as president. It would really not be until the inauguration of George Bush as president in January 1989 -- a dozen years later -- that Skull & Bones would resurface with the same degree of governmental power that it had enjoyed during the Stimson years. George Bush's selection as Ronald Reagan's vice presidential running mate in the 1980 and 1984 elections was the transition back to that power.

Many things had gone wrong in the years since Vietnam to drive the Bonesmen off the center stage. With more than a little input from Bonesmen like McGeorge Bundy and Averell Harriman, the United States had gone into a period of scientific, technological and industrial retreat. The Nixon decision on August 15, 1971 to remove the dollar from a fixed, gold-backed exchange rate system, had triggered a move toward double-digit inflation, urban decay, rising unemployment and soaring interest rates. The Kissinger-orchestrated Iranian-Middle East oil crisis in the early 1970s had contributed to a rate of deindustrialization that ultimately transformed the United State from the biggest creditor nation in the world to the world's biggest debtor nation. According to estimates compiled around the time of George Bush's inauguration as president, the total U.S. internal indebtedness had skyrocketed to more than \$12 trillion.

Moreover, the period of the 1970s and 1980s had given rise to a new and powerful political-financial combination demanding a share of government clout. This new grouping, with its principle power bases in the U.S. Congress, in Hollywood and on Wall Street, was known as the Zionist lobby.

Although Jewish names had been prominent in the legal profession and on Wall Street since the founding of the American republic, in the aftermath of the 1967 Six-Day War between Israel and her Arab neighbors, Zionist power took on a whole different proportion. Again, Henry Kissinger's position in the Nixon administration symbolized the fact that the pro-Israel lobby had moved in with a

vengeance to the corridors of power in the nation's capital. Even on Wall Street the 1970s and 1980s had seen a new generation of Jewish financiers come into power, replacing their more cultured and Anglicized predecessors. The WASP Establishment had developed a tolerance of and working relationship with the largely German Jewish bankers known among themselves as "Our Crowd." The new upstart Wall Street Zionists, however, were viewed by the WASPs as a collection of gangsters.

If the Skull & Bonesmen needed a legitimate justification for reviving their ever-present dislike of the East European Ashkenazic Jews, the Wall Street Zionists who became known as the so-called "New Crowd" provided them with all the excuses necessary. When Jonathan Jay Pollard, a Naval intelligence analyst, was arrested in November 1985 and charged with spying for Israel against the United States, there was a resurgence of more unabashed antisemitism among the Bonesmen and their blueblood upperclass mates. It has since become a hallmark of the Bush White House. Even when practical political affairs have demanded that the Bush administration deal with the American Zionist lobby or the right-wing Shamir government of Israel, there has been a distinctive undertone of distrust bordering on overt hostility.

BUSH IN PROFILE

Unlike Averell Harriman, who reportedly coveted personal political power and drew sharp criticism from some of his fellow Bonesmen, George Bush has been a long-term "project" of Skull & Bones. The Bush presidency in real and symbolic terms represents the effort by the Order to restore the lost spirit of the WASP warrior Henry Stimson. With the passage of time and the decay of the WASP elite, the Bush presidency may yet prove to be a tragic replay of past American dreams.

George Bush's career was sponsored every step of the way by Skull & Bones members, mostly of his father's generation. Prescott Bush (Skull & Bones Class of 1917), a Brown Brothers Harriman partner who would serve one term in Congress as senator from Connecticut, sent George to the traditional private preparatory school, Phillips Academy in Andover, New Hampshire, which grooms young New England squires for later studies at Yale.

It was while finishing his prep school training at Andover that Bush was first exposed to Henry Stimson. Reportedly, Stimson delivered a stirring patriotic speech to the Phillips student body in 1940 arguing forcefully for American intervention in the war in Europe. Ironically, at that very moment on the Yale campus, the majority of Skull & Bonesmen were leading the America First movement, which opposed any such U.S. entanglement in Europe.

When war with Japan broke out a year later, George Bush enlisted in the Navy and was trained as a pilot. He flew more than 50 missions before being shot down in the Pacific. At Yale after the war, Bush captained the baseball team and

followed his father's footsteps into the Order.

Political legends have it that George Bush shunned his family's patronage and went off on his own to launch a business career as an oil wildcatter, or speculator, in Texas. Nothing could be farther from the truth. Bush moved to Texas to work for Dresser Industries selling oil drilling equipment. The job was arranged for him by his father with Dresser president Neil Mallon, who was a fellow member of Skull & Bones. Dresser, according to several sources, had close ties with the CIA.

After a few years with Dresser, George Bush set up his own company, Zapata Oil, to explore new oil fields in Texas and Mexico. Again, Bush was heavily backed by member of his family. Uncle George Herbert Walker, also a Skull & Bonesman, put up a large amount of capital, as did Brown Brothers Harriman. Lazard Brothers, a Jewish brokerage house with longstanding friendly ties to the New England WASPs, put up some money as well, at the urging of Andre Meyer, the owner of the Washington Post Corporation and the father of the current Post publisher Kathanne Graham. Zapata Oil sunk the first offshore well for the Kuwaiti government.

Even with that kind of backing, George Bush was less than a success as a businessman. In 1964, a longtime Bush friend, William Farrish III of Scotland, bought the majority of shares in Zapata for \$3.2 million to keep the business afloat, while George, in a major career shift, ran for U.S. Congress from a wealthy district in Houston, Texas. He won.

During his three terms in Congress (Bush lost the 1970 Senate race to Lloyd Bentsen), George Bush distinguished himself as an advocate of zero population growth and a defender of the eugenics movement. Both of these positions, radical for their day, were probably the result of Bush's close friendship with William Draper Jr. -- a fellow Bonesman and a longtime advocate of population reduction schemes in the Third World.

The 1970s were for George Bush years of grooming in high-level politics and foreign policy. During the Nixon re-election campaign of 1972, George Bush was the chairman of the Republican National Committee. He later joined the chorus calling for Nixon's resignation. After a tour as the U.S. Ambassador to the United Nations, Bush was sent off to Communist China as the Chief Liaison Officer prior to the formalization of diplomatic relations. Bush shared the Beijing experience with Winston Lord, a fellow Skull & Bones member who was the CIA station chief. Lord went on to become president of the New York Council on Foreign Relations (CFR) in 1983. (The Lord family founded the city of Hartford, Connecticut, has a large number of Skull & Bones members on its family tree, and set up one of the most powerful old-line Wall Street law firms, Lord Day Lord.) In 1975, George Bush completed his "grooming" with a brief stint as Gerald Ford's CIA director.

In 1980, Bush ran a short-lived campaign against Ronald Reagan for the Republican Party's presidential nomination. Future running mate Reagan cut short Bush's 1980 presidential hopes by defeating him soundly in the primary election in New Hampshire, in the heart of New England. Reagan blasted Bush for his membership in the internationalist Trilateral Commission, which had attained notoriety because 20 members of the unpopular Carter administration had served on the commission. Bush's campaign was otherwise noteworthy because a significant number of his campaign volunteers were CIA officials; his campaign organization was directed by six top Agency and Pentagon retirees.

THE ORDER'S NETWORK

With Bush in the White House, the WASP Establishment is seeking to reconquer lost territory, not only within the domain of national politics, but within the financial community, the legal profession and big business. A struggle between some elements of the WASP crowd and the Jewish "New Crowd" on Wall Street has been playing out in the newspapers and federal courts for the past six years, beginning with the criminal indictments of junk bond dealers Ivan Boesky and Michael Milken and the bankrupting and criminal prosecuting of the powerful Zionist-run brokerage house Drexel Rurnham Lambert.

To some extent these wars reflect the kind of scramble that always takes place during a financial crisis and shakeout, when certain formerly powerful financial institutions are wiped out and others profit from their rivals' adversity. During the Great Depression of the 1930s, the House of Morgan came out on top. Not coincidentally, Morgan Guaranty Trust and Morgan Stanley have been cornerstones of the Skull & Bones grouping on Wall Street since their founding during the last century. Founding partner Harold Stanley was a Bonesman.

One hub of the Order's postwar economic power, the major multinational oil corporations, have clearly benefited greatly from President Bush's "charming little colonial war" in the Persian Gulf. The leading oil companies which are linked to the Order are: Standard Oil Trust Corporation, Shell Oil of America, Creole Petroleum Corporation and Pennzoil Corporation. The founder and present chairman of the board of Pennzoil started out in the oil business in partnership with George Bush in Zapata Oil. It is interesting to note in the context of the Bonesmen's deep involvement in the world petroleum business that George Bush, during his early days as a Texas oilman, had worked closely with the Kuwaitis.

Eight major Wall Street and Washington, D.C. law firms stand out as practically wholly-owned subsidiaries of the Order of Skull & Bones. Each of these firms was founded by members of the Order, and each of these firms continues to provide up-and-coming Order initiates in the legal community with training, credentials and connections. A review of the major corporate clients of these firms would reveal many of the most powerful companies among the Fortune 500.

The Skull & Bones law firms are:

- * Lord Day Lord
- * Davis Polk Wardwell
- * Simpson Thacher Bartlett
- * Debevoise Plimpton Lyons & Gates
- * Cravath Swaine & Moore
- * Covington & Burling
- * Dewey Ballantine Palmer & Woods
- * Milbank Tweed Hadley & McCloy.

In addition to their corporate clientele and their direct involvement in government through the frequent appointment of partners to Cabinet posts, these firms also specialize in handling the personal financial affairs and investment portfolios of the leading WASP families. In this respect, the Skull & Bones-centered WASP Establishment imitates the Venetian model. During the height of power of Venice, which was the trading capital of the Byzantine Empire, the leading families used their personal wealth to establish insurance companies, family funds and cultural programs through which they extended their political power.

Today, the prominent law firms listed above play a special role in directing the affairs of the leading tax-exempt foundations which shape the culture and public opinion of the United States and many foreign countries. We have already seen that McGeorge Bundy, a leading Bonesman, left his position as National Security Adviser to President Lyndon Johnson in 1966 to assume the presidency of the Ford Foundation. During the nearly two decades that Bundy spent directing the \$3 billion tax-exempt fund, he arguably wielded more power than he did during his six years as the National Security Adviser to two presidents. Under the Bundy reign the Ford Foundation spent hundreds of millions of dollars to launch the environmentalist movement and funded scores of projects devoted to population reduction in the Third World.

From its early decades, the Order has concentrated much of its efforts at establishing, controlling and, in some instances, capturing the major tax-exempt philanthropic foundations of America. The Russell Sage Foundation, which

specializes in "social control" programs, was founded by Bonesmen. Among the leading functions of the Russell Sage Foundation today is the maintaining of a centralized tracking of the finances of all the large tax-exempt foundations in the United States.

es. The Peabody Foundation, the Slater Foundation and several of the Rockefeller foundations were all either started by members of the Order or have been dominated by Bonesmen from their inception. Other major family funds, like the Ford Foundation and the Carnegie Endowment, were wrestled from family control by the Skull & Bones apparatus. During the tenure of McGeorge Bundy, two members of the Ford family resigned from the Ford Foundation in disgust over the direction in which Bundy had taken the philanthropic agency.

THE NEW WORLD ORDER

Between 1983-1986, the British-born conspiracy theorist Antony Sutton wrote a series of pamphlets about the Order of Skull & Bones. According to informed sources, Sutton was one of several historians who were provided with a large file of the Order's internal documents, including minutes of some meetings, descriptions of rituals, and what would appear to be a rather complete list of its members from its founding through to the early 1980s. The short pamphlets were compiled into one volume and published as a book in 1986.

For someone closely following the just-concluded Persian Gulf War and attempting to gain some insight into George Bush's performance during that largely orchestrated affair, one recurring theme in the Sutton volume stands out like a sore thumb: the New World Order.

According to the Skull & Bones documents used by Sutton in his somewhat flawed profile of the Order, the creation of a New World Order is a primary goal of the Bonesmen and has been for decades. For the initiates into the Order, the term New World Order has a very specific meaning.

It is a world dominated by American military power and American control over all strategic raw materials. Just as the Greek city-state of Sparta provided the Skull & Bones with the image of a WASP warrior caste, the Persian Empire, with its system of coalitions of satrap armies, provides the model for the Bonesmen's New World Order. The image of Secretary of State James A. Baker III traveling from foreign capital to foreign capital demanding military legions or chests of gold to finance the war for a New World Order is an image straight out of the chronicles of the Persian Empire.

According to the recent biography of Henry Stimson, the man who inspired President Bush was firmly convinced that it was essential for America to go to war once every generation or so. It was, for Stimson, a spiritually cleansing process which enables the nation to rally behind a cause and overcome its weaknesses and shortcomings in one grand burst of military fervor. The romantic mystique of the purgative powers of combat is key to understanding the political philosophy of Skull & Bones.

Although America's Vietnam debacle remains a bitter memory of the Bonesmen's failure in war, the recent Persian Gulf conflict, with its massive overkill and the use of highly advanced weapons and technologies, is now the new glorious symbol of the WASP warrior caste's reincarnation. When President Bush vowed that the Gulf War would not be another Vietnam, he was speaking first and foremost to his fellow Bonesmen -- not to the American people. If such thinking smacks of dangerous fantasy on the part of a major world power in the modern era, it is indeed.

On a more practical political level, the Gulf War was a gambit to save the Bush presidency from a mounting pile of domestic financial woes, not the least of which was the savings and loan (S&L) crisis and a pending series of failures of major commercial banks. In the months preceding the Gulf showdown, the president's own son, Neil Bush, came under intense media scrutiny for his role in the failure of a large S&L in Colorado. Neil's photograph, testifying under oath before a congressional committee probing fraud among top S & L managers, became a familiar front-page feature in every major newspaper in America, threatening dangerous popular disillusion with the Yale Bonesman in the White House. With a U.S. federal government deficit projected at nearly a half a trillion dollars for Fiscal Year 1991, in large part because of the S&L crisis and a shrinking business tax base, the Democratic Party majority in the U.S. Congress was pressing for deep cutbacks in defense spending now that the Cold War had ended.

On the international stage, the reunification of Germany, clearly the most dramatic event of 1990, posed new challenges to the Bush team. Germany was about to emerge as the dominant power in continental Europe by virtue of its advanced industrial infrastructure and its long tradition of independent political dealings with Moscow. Just months before the outbreak of the Gulf crisis, Germany's Chancellor Helmut Kohl had met with Soviet President Mikhail Gorbachev and signed a long term economic assistance pact. As a result, Gorbachev dropped all remaining objections to the immediate reunification of Germany.

At that point, the Bush administration changed its tactics. Previously, in sharp contrast to the Thatcher government in Great Britain, it had been nominally in favor of German reunification. But at the Houston economic summit of the Group of Seven Industrialized Countries in the summer of 1990, the United States blocked (with Britain) Germany's plan of unconditional economic aid to the Soviet Union. President Bush took the position that the Soviet Union must submit to International Monetary Fund requisites as a precondition for any substantive economic assistance.

In the Far East, Japan's continuing growth in manufacturing also posed a threat to Washington's desire to retain superpower status. If President Bush and his Bonesmen coterie were unaware of a stunning historical analogy, their British "cousins" were quick to pick up on the parallels between the global strategic situation in July 1990 and the identical international situation that existed 100 years earlier.

In the 1890s, France, under the brilliant political leadership of Foreign Minister Gabriel Hanataux, was attempting to forge a Eurasian alliance with Germany, Russia and Meiji

Japan. The idea was to link continental Europe with Japan and China through a series of large overland infrastructure projects, beginning with the Trans-Siberian Railroad. Through treaties covering key areas of economic and security matters, Hanataux hoped to create a zone of prosperity, built on a foundation of rapid economic growth and extensive trade.

Such a political-economic common interest alliance threatened the imperial hegemony of Great Britain. At the turn of the 20th century, Britain looked to the United States (as its English-speaking ally) to join in sabotaging the Hanataux plan. Through the Spanish-American War of 1898 and the Russo-Japanese War of 1905, Britain and her American junior partner (by then led by Henry Stimson's old mentor Teddy Roosevelt) managed to disrupt the French-German-Russian-Japanese economic axis. Two world wars and the Great Depression were the consequences of that interference.

THE PERSIAN GULF WAR

It was against this historical backdrop that President Bush, invoking the World War II imagery of his Skull & Bones idol Henry Stimson, went to war against Iraq. There is even speculation that President Bush was personally instrumental in luring Saddam Hussein into invading Kuwait, thereby provoking the American-led military response. Many news accounts have emphasized that a two-hour private meeting between the president and Margaret Thatcher in the Aspen, Colorado vacation chalet of U.S. Ambassador Henry Catto on August 2, 1990 helped finalize Bush's decision to immediately deploy military force.

Recently, an astute Japanese analyst drew a disturbing parallel between Bush and FDR, who was greatly influenced by Stimson. According to the writer, FDR lured Japan into World War II through an intricate series of economic warfare maneuvers which left Japan with little choice but to strike-back. In much the same way, said the analyst, Bush had lured Saddam Hussein into Kuwait in order to launch a new Gulf War that would have consequences reaching far beyond Iraq and the Middle East.

As a result of the military victory over Iraq, the United States is in the process of establishing a string of permanent military bases throughout the Persian Gulf and Near East. The oil sheikdoms of the region, led by Saudi Arabia, are now thoroughly dependent on the American military presence to ensure the survival of their regimes. The Organization of Petroleum Exporting Countries (OPEC) is effectively captured by Washington. American bankers aided by U.S. gunboats now are setting world oil prices. Thus, one consequence of the Persian Gulf War is that the United States now has an oil weapon -- pointed principally at Germany and Japan. Ironically, America's two chief economic rivals have paid out a total of \$27 billion to date to help finance a Bush administration military adventure which put the oil weapon in Washington's hand.

Another telling example of how the Order's man in the Oval Office intends to administer a crumbling U.S. domestic economy while imposing the New World Order on the rest of the world is to be found in the recent buyout of the majority of stock in Citicorp, the largest U.S. commercial bank, by Saudi Prince Talal bin Abdul Aziz. Citicorp is one of the major

American commercial banks on the verge of collapse, but which is considered by the Bush administration and the Federal Reserve System to be "too big to fail." The stock purchase amounted to a Saudi Royal Family bail-out of Citicorp, using the increased profits being enjoyed by the House of Saud as a result of the massive jump in Saudi oil production since the beginning of the Gulf crisis in August 1990.

There points up a striking difference between the role of the United States in World War II and the Bush administration's handling to date of the Middle East crisis. During World War II, the United States went through a genuine economic revival. Skull & Bones historian Samuel Huntington described it as a "neo Hamiltonian" policy, a reference to the first United States Secretary of the Treasury Alexander Hamilton. Beginning in 1939, America became a major supplier of military and industrial goods under the Lend-Lease program to the European states fighting Hitler. At the same time, the federal government began issuing low-interest credits to revive the nation's manufacturing base which had been gutted by a decade of economic depression. The industrial buildup accelerated once the United States formally entered World War II, leading to the establishing of entirely new industrial sectors, such as aerospace and petrochemicals.

This time around -- at least to date -- there has been no such marshaling of the U.S. domestic industrial base. Despite moderate increases in the production of certain high-tech weapons systems, the U.S. economy continues its gradual slide into what could be a new depression. Unemployment is greater than at any point in the last decade. Some sociologists fear that the complete disintegration of America's urban centers could produce new race-riots as early as the summer of 1991.

The single greatest challenge to George Bush and the Order is: Can they capitalize on the current revival of the American spirit to reverse the disastrous post-industrial society dogmas, and launch their own version of the World War II neo-Hamiltonian industrial recovery? So far, some doomsayers claim, it appears that Bush and his administration plan instead to direct their efforts at looting and blackmailing the rest of the world -- especially the gulf oil sheikdoms, Japan and Germany -- into bailing out the bankrupt U.S. financial houses and federal government and financing the posting of American-led foreign legions at every corner of the globe where there are large deposits of strategic raw materials. If this policy is not altered, George Bush may soon find himself presiding over a new disaster that will make the Vietnam debacle appear insignificant in comparison.

The politics of the New World Order appear to be borrowed largely from the pages of the decline and fall of the British Empire. Political columnist Patrick Buchanan, an early vocal opponent of the Bush Persian Gulf strategy, warned as early as August 1990 that the White House was falling into the trap of British "balance of power" politics, the very politics that left Great Britain on the scrap heap of world powers at the close of World War II, and put Winston Churchill, the architect of World War II and the Cold War, out of a job.

Since the crushing military defeat of Iraq by a technologically far superior American-led coalition, the Bush administration has vacillated on a postwar policy for the region. It has pursued a pragmatic power balancing game which is rife with potential problems. The two

key elements of the American balance-of-power politics in the region are the preservation of a weakened but territorially whole Iraq to offset the other would-be regional-powers Iran and Syria. At the same time, it is tilting toward a nominally more "pro-Arab" position with regard to the Arab-Israeli conflict.

While the harsh reparations terms being imposed upon a war-devastated Iraq are probably, in the mind of Bush, aimed at dissuading any future regional military power from launching-cross-border aggressions, they amount to the slow, excruciating extermination of the population of that country. As one seasoned observer noted recently, earlier air wars had caused greater immediate losses of life, due to the inaccuracy of bombs and rockets, but had generally left basic infrastructures intact. The precision bombing of Iraq's entire infrastructure has caused what a United Nations team has called an "apocalypse." The greater loss of life will occur in the aftermath of the combat as a country with 16 million inhabitants is suddenly thrown into a "pre-industrial" state with no electricity, no water or other necessities. American humanitarian aid, administered by occupying troops, will not offset this apocalypse -- especially if harsh war reparations and asset seizures deprive Iraq of the financial resources needed to begin a rebuilding process.

Regardless of the fact that the United States has not thrown the full weight of its military presence behind the overthrow of the Saddam Hussein regime, the shortsightedness of the present Bush policy may very well lead to a Lebanon-type protracted civil war in Iraq. Such a war could potentially spread throughout the region.

IMPLICATIONS FOR JAPAN

Throughout this short study of the Order of Skull & Bones, emphasis has been placed on the philosophy, the rituals and the modus operandi of the Bonesmen who have devoted their post-Yale careers to world politics. This particular emphasis was chosen in order to provide the Japanese reader with an insight into how the Bush presidency views the rest of the world, so that it will be possible for Japan to better understand what it faces in the post-Persian Gulf War strategic environment.

The implications of Skull & Bones domination over American policymaking under the Bush presidency are enormous. Japan must be prepared to meet what amounts to a fundamentally new challenge. Few of the postwar experiences in U.S. Japanese relations will have prepared the Japanese government and the leaders of Japanese industry and finance for-what they now face.

In the recent past, the policy of Washington toward Japan has been simply to use political leverage, mostly related to Japan's regional security concerns, to exact compromises and concessions in the economic and financial sphere. But the United States, under its policy of free trade, privatization of the monetary and credit mechanisms, and the transition to post-industrial service-oriented forms of economic activity at home, has suffered a gradual but steady decline over the past 20 to 30 years. Japan, meanwhile, has prospered under a more protectionist and industry oriented policy.

In the past decade, Japan has been increasingly thrust into the role of scapegoat for the

decline of American prosperity, while at the same time coming under mounting pressure to help finance the United States out of its economic mess. The pressures upon Japan to bail out its postwar big brother have caused tensions between Washington and Tokyo, but the Cold War had provided a common security interest that generally offset the occasional rough language.

Under the George Bush Skull & Bones regime at the White House all that has changed. True to the Bonesmen's credo of constructive chaos and global political domination by the WASP Establishment, the United States is now out to dominate U.S.-Japanese relations with a degree of brutal frankness that will fly in the face of all previous American sensitivities to Japan's honor. Gone are the days of former U.S. Ambassador Michael Mansfield, who always sought to maintain a public climate of friendship and cooperation between the two nations even when behind the scenes he was taking the toughest of stands on the most divisive issues.

Under the American-led New World Order, Japan can expect to be treated with far less respect publicly. It can expect that the Bush administration, including his coterie of former top CIA men now working directly out of the Oval Office, will be constantly interfering, covertly in the internal affairs of Nippon.

This shift in style has held sway since the Bush inauguration and the subsequent appointment of Michael Armacost as U.S. Ambassador to Tokyo. Armacost has assumed the posture of a Roman pro-consul, dictating policy to a weak satrap, rather than to engage, in diplomatic dialogue. Armacost's performance even before the recent events in the Persian Gulf reestablished American military might as the defining factor in world affairs -- should have provided the Japanese leadership with a clue as to the shift under way in Washington's new policy approach.

The Bush policy can best be described as a sophisticated containment policy. The new approach to Pacific affairs was telegraphed in the early days of the Bush administration when the president deployed three of his most trusted senior spooks to three critical Asian diplomatic posts: Armacost was sent to Tokyo; Bush's vice presidential national security aide and former career CIA operator Donald Gregg was sent to Seoul; and John Lilly, another career CIA man and a fellow Yale Skull & Bones member, was sent to Beijing. The fact that three of the CIA's most experienced clandestine field operators were assigned the senior diplomatic posts says a great deal about the Bush administration's intentions to conduct sophisticated political-warfare and sow confusion among the three major nations of the Far East. Bush clearly intends to pursue the historic Skull & Bones mission of extending America's dominion over the entire Pacific region. The idea of even paying lip service to equal partnership between Washington and Tokyo is over, at least for the time being.

The process of internally weakening Japan's resistance to this overarching domination by Washington's New World Order began with the Recruit scandal, when the Takeshita government was brought down through a U.S.-inspired secret intelligence operation. One of the primary targets of that operation was Yasuhiro Nakasone, the former prime minister and the architect of Japan's post-1973 effort to develop independent ties to the

oil-producing Arab states of the Persian Gulf.

It is important to understand that Bush's WASP warriors, while adopting a similar approach of non-compromise and domination over Israel and the Zionist lobby inside the United States, will not hesitate to use the Jewish lobby as an instrument for bashing Japan into line. Thus, Commerce Secretary Robert Mosbacher went out of his way to encourage the Anti-Defamation League's leadership convention, which he addressed last year, to join with the Bush administration in pressuring Japan to submit to American free trade demands.

The Bush administration will at times encourage the Zionist lobby and Israel to mercilessly attack Japan and will at other times severely criticize Zionist "insensitivity" to Tokyo. This will all be part of the Bush strategy to dominate the Pacific Rim by playing one country or faction off against another, using hard cop-soft cop and other classic techniques of the intelligence trade.

Japan will be offered a limited junior partner status in the New World Order, while coming under mounting pressure to continue providing tribute to finance the American imperium. Above all else, Japan will be forbidden from developing any independent foreign policy toward its neighbors, the Soviet Union, the Arab world or anyone else. Such programs as the Global Infrastructure Fund, to the extent that they pose an alternative to the U.S.-dominated international regime, will be vetoed.

As a subservient junior partner in the New World Order arrangement, Japan's financial and economic muscle will be used as the piggy-bank for U.S. imperial objectives. The \$14 billion "contribution" to the U.S.-led Gulf-War coalition was another benchmark in the transition in U.S.-Japanese relations, as was President Bush's abrupt cancellation of his long-scheduled state visit to Tokyo. When the chairman of the Liberal Democratic Party (LDP) attempted to visit Kuwait immediately after the gulf cease-fire in March 1991, the U.S. State Department refused to grant him permission to go into the American-occupied territory. These intentional diplomatic affronts should be understood as telling signs of the new American-Japanese relationship.

On the other-hand, President Bush also suddenly scheduled a brief summit with Japanese Prime Minister Kaifu in Newport Beach, California for April 4, 1991. One purpose of the sudden meeting was to lay out clear parameters of acceptable behavior on the part of the Japanese government when the prime minister meets later in April with Soviet President Mikhail Gorbachev. Japanese Soviet relations, like all other crucial Japanese foreign relations, will be expected to conform with those of the U.S.

An essential blackmail "stick" that the Bush administration intends to hold over Tokyo is-Japanese dependency on Persian Gulf oil. As-the result of the Gulf War and the post war American military occupation of Kuwait, Saudi Arabia and other-key oil-producing sheikdoms, the Bush administration will exert unabashed control over world oil supplies -- and prices. In the New World Order, Japan's oil supply will be increasingly linked to concessions on a range of monetary and economic issues, including the Global Agreements on Trade and Tariffs (GATT) talks, which broke up last year as the result of

largely Japanese and continental European resistance to the pure free-trade system sought by Bush and Thatcher. Assistant Treasury Secretary David Mulford, a former senior official at White Weld Securities, Inc., which restructured Saudi Arabia's entire financial apparatus, has recently announced that he will seek to prosecute Japan for its violations of the GATT regulations that call upon Tokyo to surrender government control over interest rate policies to the international banking community.

The Bush presidency, with its ambitious drive for domination over former friends and foes alike, poses an unprecedented challenge to Japan. While this is neither the time nor the place to offer a solution to the growing dilemma, the profile of the men of Skull & Bones in this white paper should provide the Japanese reader with helpful insights into the nature of the American WASP warrior class and the secret society which spawned it.

Some Prominent Members of Skull & Bones:

William F. Buckley, Jr. (Bones Class of 1950):

Founder of National Review, the leading conservative magazine in the United States. Brother James (Skull & Bones 1944) is now a member of the U.S. Court of Appeals. William F. Buckley, Jr., former CIA officer in Mexico, also built the political grassroots conservative movement in the U.S. in the 1960s. President Bush and Buckley have recently split over Buckley's strong pro-Israelism.

McGeorge Bundy (Skull & Bones initiate of 1940):

Scion of the Skull & Bones Bundy family. Father Harvey H. Bundy was Skull & Bones, as was brother William P. Bundy. McGeorge served in the War Department during World War II as Henry Stimson's assistant and later became the National Security Adviser to President Kennedy. William Bundy became a CIA official and later served in key positions at the Departments of State and Defense. McGeorge headed the Ford Foundation (1968-1980) and William chaired the Council on Foreign Relations (1972-1983).

George Bush (initiated in 1948):

President of the United States. Comes from a complete Bones family. Father Prescott, a Bones initiate of the class of 1917. Uncle George Herbert Walker, Bones Class of 1927. U S Federal District Court Judge John Walker is also a relative and a Bonesman.

Alfred Cowles (Class of 1913):

Built the Cowles Communication empire based on the Des Moines (Iowa) Register and the Minneapolis (Minnesota) Star and Tribune. These two newspapers play a significant role in shaping the early presidential primaries, especially in Iowa.

Hugh Cunningham (Bones 1934):

CIA man from 1947 to 1973. He served in top positions in the Clandestine Services, the Board of National Estimates and later as Director of Training.

Thomas Daniels (initiated in 1914):

Founder of the largest agro-business and grain cartel company in Minnesota -- Archer-Daniels-Midland (ADM). Served in the Foreign Service and later during World War II as head of the Fats and Oils Section of the War Production Board. ADM Corporation's new head Dwayne Andreas is one of the most powerful figures in U.S.-Soviet trade relations. Daniels's only son, John (Bones 1943), also works in ADM. The bank which underwrites ADM stock issues is the Morgan Stanley investment bank

Richard Ely Danielson (Skull & Bones 1907):

Past publisher of the Atlantic Monthly magazine, one of the leading magazines for seeing which policy line on a variety of issues is coming out of the Eastern Establishment.

Russell Wheeler Davenport (initiated in 1923):

Fortune magazine writer and editor, made this magazine the leading authority on financial matters in the United States. Davenport created the Fortune 500 companies list.

Henry P. Davison (Bones Class of 1920):

Key senior partner in the Morgan banking and financial trust networks. His fellow Bonesman Harold Stanley (1908) founded the investment bank Morgan Stanley. Davison and his family helped set up the Guaranty Trust Corporation which became Morgan Guaranty. Thomas Cochran (1904 Bonesman) was one of the most powerful partners in the Morgan bank. The influence of the Morgan banking system can be seen in its relationship with the hierarchy of U.S. intelligence. The head of the Office of Strategic Services, Gen. William Donovan, worked as a Morgan intelligence operative in the 1920s and prepared the intelligence reports for the Morgan banking concerns on developments in Europe. F. Trubee Davison became CIA Director of Personnel in 1951 and placed key Bonesmen in the right positions inside the CIA.

Averell Harriman (1913 initiate):

Scion of the Harriman railroad family. His brother Roland (Skull & Bones 1917) ran the investment bank Brown Brothers Harriman. Averell was one of the most powerful members of the Skull & Bones fraternity, His government posts ranged from Ambassador to Russia during World War II and various State Department positions to chief negotiator on the Vietnam Talks. Confidential adviser to Presidents Roosevelt, Truman, Kennedy, Johnson and later Nixon and Carter. His investment banking firm is virtually a Skull & Bones bank; nine senior partners are from Skull & Bones. President Bush's father worked in Brown Brothers Harriman after helping to merge several companies in the United Rubber Corporation of America.

Winston Lord (Bones Class of 1959):

Chairman of the Council on Foreign Relations (1983-1988). Former State Department official and CIA officer in Asia. China expert. Six members of the Lord family were Skull & Bones, including Charles Edwin Lord, former Comptroller of the Currency, Department of the Treasury. Oswald Bates Lord (Skull & Bones 1926) married Mary Pillsbury of the Minnesota based Pillsbury Flour Corporation. Winston Lord is their son.

Robert A. Lovett (1918 initiate):

Put together the Brown Brothers Harriman merger and later organized the aviation industry mobilization for World War II. Became part of the most exclusive power group in World War II under Henry Stimson. Lovett was one of the five or six most powerful men in the United States for nearly 40 years until his death in 1986.

Henry Luce (initiated in 1920):

Built the Time-Life publishing empire. Became the leading publicist of the "American century" doctrine.

Dino Pionzio (Bones Class of 1950):

CIA deputy chief of station in Chile during the overthrow of Chilean President Salvador Allende. Now works at the investment firm Dillion Read.

Alphonso Taft (initiated in 1833):

Secretary of War (1876), Attorney General (1876-1877) and later Minister to Austria and Russia. Co-founder of Skull & Bones.

Robert A. Taft (1910 initiate):

Speaker of the House of Representatives (1921-1926) and Senator (R-Ohio). Leader of the Isolationist movement in the 1930s. His son Robert A. Taft, Jr., also senator from Ohio, led the right-wing of the Republican Party in the 1950s and 1960s. Robert A. Taft, Jr., however, was the only member of the Taft family who was not Skull & Bones.

William H. Taft (Skull & Bones 1878):

President of the United States (1908-1912) and appointed Chief Justice of the Supreme Court (1921-1930). Secretary of War (1904-1908). Trustee, Carnegie Institution. Part of the long line of Tafts who served in the U.S. government.

William Collins Whitney (initiated 1863):

Secretary of the Navy (1885-1889). Promoter of the Naval Shipyards and financier. Part of the Whitney family which sent eight of its members to Yale to become Skull & Bonesmen. Family intermarried with the Payne, Harriman and Vanderbilt clans. The Whitneys became some of Wall Street's most powerful financiers through the Guaranty and Knickerbocker Trust Companies.

Current U.S. senators who are Skull & Bones members:

Sen. Jonathan Bingham (D-N.M.).

Sen. David Boren (D-Okla.) is chairman of the Senate Intelligence Committee.

Sen. John Chafee (R-R.I.); Former Navy Secretary and on the Senate Intelligence Committee.

Sen. John Heinz (R-Pa.): Recently killed in an airplane crash. was a Bonesman as was his father. The Heinz family has one of the largest food-producing companies in the world.

Sen. John Kerry (D-Mass.): Formerly on the Senate Intelligence Committee, Kerry is now on the Senate Foreign Relations Committee.

Selected Quotations:

-- During the Cuban missile crisis in October 1962, two Skull & Bones advisers to President Kennedy, McGeorge Bundy and Robert Lovett, met in the west wing of the White House to discuss strategy. According to author Godfrey Hodgson, there was a photograph of master Bonesman Henry L. Stimson, their mentor, on Lundy's desk. "All during the conversation the old Colonel seemed to be staring me straight in the face," recalled Lovett. Finally, he said to Bundy, "Mac, I think the best service we can perform for the president is to try to approach this as Colonel Stimson would."

-- At the Potsdam summit in 1946 when President Truman first met Soviet dictator Josef Stalin, Stimson told the president: "The chief lesson I have learned in a long life is that the only way to make a man trustworthy is to trust him."

-- Commenting on the plan of Robert Morgenthau, President Franklin D. Roosevelt's Treasury Secretary, to deindustrialize Germany after World War II, Stimson wrote: ". . . just such a crime as the Germans themselves hoped to perpetrate on their victims . . . a crime against civilization itself?" He added rather ironically that the plan was like "a beautiful Nazi program! This is to laugh!"

-- "They possessed a common background, common experience, and a common liking for old wines, proper English and Savile Row clothing," wrote the biographer of former U.S. Ambassador to Japan Joseph Grew. A top level diplomat and State Department powerhouse during the first half of the 20th century, Bonesman Hugh Wilson adds, "The Foreign Service [is] a pretty good club."

-- "These men helped establish a distinguished network connecting Wall Street, Washington, worthy foundations and proper clubs," wrote historian and former JFK aide Arthur Schlesinger, Jr. "The New York financial and legal community was the heart of the American Establishment. Its household deities were Henry L. Stimson and Elihu Root; its present leaders, Robert A. Lovett and John J. McCloy; its front organizations, the Rockefeller, Ford and Carnegie foundations and the Council on Foreign Relations."

-- British author Godfrey Hodgson stated in an essay on the American Establishment that it was "characteristic of these men to take on the burdens of world power with a certain avidity... It reflected a grim but grand duty that was a legacy from half-buried layer of New England Puritanism."

-- Averell Harriman's father, owner of the largest railroad company in the United States at the turn of the century, told his son: "Great wealth is an obligation and responsibility. Money must work for the country."

-- "I scoffed at Harvard's Porcellian club. It was too smug. But to get into Bones, you had to do something for Yale, wrote Averell Harriman. He would frequently return to the

"Tomb on High Street." During the Paris Peace Conference on the Vietnam War, Harriman was quite upset about not being able to attend a "Bones Reunion." In the book *The Wise Men*, Harriman is described as willing to talk openly about national security affairs, but "he refused, however, to tell [even] his family anything about Bones... so complete was his trust in Bones's code of secrecy..."

-- Stimson during the liberation of France in 1944 wrote about the need for France's reconstruction following the Nazi occupation of France: "America cannot supervise the elections of a great country like France. Consequently, we must eventually leave the execution of the State Department formula to the French themselves... where we ourselves will assume responsibility in part or more for its execution according to Anglo-Saxon ideals."

-- Stimson on Austria and Germany following World War II: "They [the British] haven't any grasp apparently of the underlying need of proper economic arrangements to make peace stick... If they restore Austria to her position in which she was left by the Versailles arrangement 25 years ago, why they would reduce her to a non-self-sustaining state [is beyond me]... Central Europe after the war has got to eat. She has got to be free of tariffs in order to eat."

-- Stimson was "opposed to a Carthaginian Peace" in which Germany was reduced to a non functioning society. He wrote, "The Ruhr and Saarland... [must not] be turned into a second rate industrial land . . . regardless of what it means to Germany... [rather] to the welfare of the entire continent "

-- In 1948, the debate within the U.S. government over the creation of the state of Israel was reaching critical intensity. President Truman was the "dark horse" candidate to defeat the Republican nominee, Thomas Dewey. Truman thought he needed the Jewish groups to mobilize in his support in order to get elected. He also believed that after so many years of suffering and persecution, the Jews deserved a homeland of their own. However, his most trusted foreign policy advisers, George Marshall, Dean Acheson and Robert Lovett, were, according to the book *The Wise Men*, "all dead set against the birth of Israel... However humanitarian a Jewish homeland might seem... it posed a real risk to U.N. national security. It was absolutely vital that the U.S. maintain its pipeline to Mideast oil. Supporting the Zionist cause would only antagonize the Arabs." Lovett said, "Israel was one ally too many "

-- On Japan, Stimson and McGeorge Bundy wrote their book *On Active Service in Peace and War*: "Since 1937, when the Japanese attacked China, Stimson had been urging, as a private citizen, an embargo on all American trade with Japan, and this attitude he carried with him into the Cabinet [when he became Secretary of War]." Stimson prepared a memorandum in 1940 pointing out how Japan had yielded before American firmness, in her withdrawal from Shantung and Siberia in 1919 and her acceptance of naval inferiority in 1921. "Japan," Stimson wrote, "has historically shown that she can misinterpret a pacifistic policy of the United States for weakness. She has also historically shown that when the United States indicates by clear language and bold actions that she intends to carry out a clear and affirmative policy in the Far East, Japan will yield to that policy even

though it conflicts with her own Asiatic policy and conceived interests. For the United States now to indicate either by soft words or inconsistent actions that she has no such clear and definite policy towards the Far East will only encourage Japan to bolder action."

-- On December 7, 1941, Stimson wrote in his diary: "When the news first came that Japan had attacked us, my first feeling was of relief that the indecision was over and that crisis had come in a way which would unite all our people. This continued to be my dominant feeling in spite of the news of catastrophes which quickly developed. For I feel that this country united has practically nothing to fear, while the apathy and division stirred by unpatriotic men have been hitherto very discouraging."

-- On the decision to drop the atomic bomb on Hiroshima, Stimson wrote in an article for Harper's Weekly in 1947: "My chief purpose was to end the war in victory with the least possible cost in the lives of men in the armies which I had helped to raise. In the light that no man, in our position and subject to our responsibilities, holding in his hands a weapon of such possibilities for accomplishing this purpose and saving those lives, could have failed to use it and afterwards looked his countrymen in the face."

-- At the Truman White House in the presence of Secretary of State James Byrnes, Adm. Leahy and Secretary of the Navy James Forrestal, according to his biographer: "Stimson had argued consistently for a commitment to allow the Japanese to keep their Emperor, not because- with the memory of Manchuria in his mind he had any special sympathy for him, but because only the Emperor could persuade the Japanese to surrender and therefore save American lives."

Dear Tony Gosling,

Thank you for your interest in becoming an Open Directory Project editor.

After careful review, we have decided not to approve your application at this time. The most common reasons a reviewer will deny a new application include, but are not limited to,

* Incomplete application. Insufficient information has been provided in some fields

including reason, affiliation and/or Sample URLs.

* Improper spelling and grammar.

* Sample URLs are inappropriate for the category which one has applied to edit. They may be too broad, too narrow, completely out of scope, poor quality, or in a language inappropriate for the category. All non-English sites are listed in the World category. Applications for World categories that include sites only in English will be denied. Likewise, applications for World categories that include sample URLs in languages other than the one appropriate for the applied category will be denied.

* Not properly disclosing affiliations with websites that are, or have the potential of being, listed in the category.

* Titles and descriptions of sample URLs (and other information provided) were subjective and promotional rather than unbiased and objective. ODP editors do not rank or write website reviews. ODP editors provide objective and unbiased descriptions of websites and their content.

* Self-Promotion. Application which leads us to believe that the candidate is interested primarily in promoting his/her own sites or those with which the applicant is affiliated. The ODP is not a marketing tool, and should not be used to circumvent the site submission process. If this is an applicant's motivation for joining, then we ask him/her not to apply. Editors found to be inappropriately promoting their own site will be promptly removed.

Due to the large number of applications we get every day, we are unable to provide personal responses to every application or to respond to inquiries about why you were rejected. If a reviewer chose to provide additional comments to you, they will be given in the "Reviewer Comments" section below.

Your willingness to volunteer is greatly appreciated and perhaps we will be able to utilize your talent in the future.

Anthony Sutton On 'Skull & Bones,' US Banks Financing Hitler, & 'Trance-Formation'
3-19-00

Antony Sutton, is the author of 26 books, many of which can be purchased on-line at Amazon or Barnes & Noble. Liberty House Press at 1-800-343-6180 has copies of America's Secret Establishment and Best Enemy Money Can Buy for sale.

The following interview with Mr. Sutton is dated July 6, 1999

Antony C. Sutton, 74, has been persecuted but never prosecuted for his research and subsequent publishing of his findings. His mainstream career was shattered by his devotion towards uncovering the truth. In 1968, his Western Technology and Soviet Economic Development was published by The Hoover Institute at Stanford University. Sutton showed how the Soviet state's technological and manufacturing base, which was then engaged in supplying the North Vietnamese the armaments and supplies to kill and wound American soldiers, was built by US firms and mostly paid for by the US taxpayers. From their largest steel and iron plant, to automobile manufacturing equipment, to precision ball-bearings and computers, basically the majority of the Soviet's large industrial enterprises had been built with the United States help or technical assistance.

Professor Richard Pipes, of Harvard, said in his book, Survival Is Not Enough: Soviet Realities and America's Future (Simon & Schuster;1984): "In his three-volume detailed account of Soviet Purchases of Western Equipment and Technology . . . [Antony] Sutton comes to conclusions that are uncomfortable for many businessmen and economists. For this reason his work tends to be either dismissed out of hand as 'extreme' or, more often, simply ignored."

The report was too much and Sutton's career as a well-paid member of the academic establishment was under attack and he was told that he "would not survive".

His work led him to more questions than answers. "Why had the US built-up it's enemy? Why did the US build-up the Soviet Union, while we also transferred technology to Hitler's Germany? Why does Washington want to conceal these facts?"

Sutton, following his leads, proceeded to research and write his three outstanding books on Wall Street: and FDR; and the Rise of Hitler; and The Bolshevik Revolution. Then, someone sent Antony a membership list of Skull and Bones and--"a picture jumped out". And what a picture! A multigenerational foreign-based secret society with fingers in all kinds of pies and roots going back to 'Illuminati' influences in 1830's Germany.

For the full story, check-out Sutton's book America's Secret Establishment, in print for 14 years and available from Liberty House Press, 1-800-343-6180.

Skull And Bones

Here, in a recent e-mail interview, are Antony Sutton's own reflections and answers to questions from myself and other researchers.

Pre-interview note from Antony Sutton: Remember all my papers on this are in deep storage 1000 miles away and cannot be accessed and I've not even thought about S&B for

15 years. I had no idea that any interest had been aroused out there. I know the book is a steady seller from the royalty reports; but that is all. For the last 10 years I have been in complete seclusion working on future technology...I'm more engineer than historian. The only visitors I've had or meetings have been with three-letter agency people, who arrive on the doorstep unannounced and complain I am hard to find. Big Brother has the ability apparently to find anyone. Nothing mysterious about this, I just dislike publicity and social interaction. . . . You will see from the Dutch TV episode that my work still upsets the "powers that be" so these are merely reasonable precautions.

KM - Can you tell the story of how you learned of Skull & Bones? And how you felt?

AS - I knew nothing of S&B until I received a letter in the early 80's asking if I would like to look at a genuine membership list. For no real reason I said yes. It was agreed to send the package by Federal Express and I could keep it for 24 hours, it had to be returned to the safe. It was a "black bag" job by a family member disgusted with their activities. For the benefit of any S&B members who may read and doubt the statement; the membership list is in two volumes, black leather bound. Living members and deceased members in separate volumes. Very handsome books. I spent all night in Kinko's, Santa Cruz , copied the entire volumes and returned within the 24 hour period. I have never released any copies or identified the source. I figured each copy could be coded and enable S&B to trace the leak. How did I feel? I felt then (as I do now) that these "prominent" men are really immature juveniles at heart. The horrible reality is that these little boys have been dominant in their influence in world affairs. No wonder we have wars and violence. Skull and Bones is the symbol of terrorist violence, pirates, the SS Deaths Head Division in WW Two, labels on poison bottles and so on. I kept the stack of xerox sheets for quite a while before I looked at them--when I did look--a picture jumped out, THIS was a significant part of the so called establishment. No wonder the world has problems!

KM - What is the percentage of active members?

AS - I haven't checked for 15 years...it used to be about one quarter. With the rise of the Bush dynasty it will increase somewhat, as they climb on the bankwagon. The Demos had their turn with Harriman in the 40's and 50's.

KM - How many active members are there?

AS - Usually about 600 alive at any one time . . . recently more active.

KM- What is your take on the grandfather clock that each member allegedly receives?

AS - They do get a clock I've had that confirmed and you will see it in the photos in ASE (AMERICA'S SECRET ESTABLISHMENT). Might be symbolic, perhaps to state their organization goes on timelessly.

KM - Has Skull and Bones lost its clout?

AS - Well look at the recent fundraiser for George Bush...Republicans are stuffing money

into his pockets...I suggest members recently got behind one of their own and decided to push George all out for president--and Democrats can't do a thing because Democrat Bones are not going to allow the Party to use the ultimate weapon--George's membership in a foreign secret society.

KM - What do you know of George ' W.' Bush?

AS - He is a third generation Bonesman. My personal impression is that he doesn't have the drive of his father or the skills of his grandfather....--but I could be very wrong. He can beat anyone hands down--EXCEPT VENTURA. If Bush handlers allow a face to face debate between Bush and Ventura, Ventura will win. Remember Ventura has admitted to his so-called "sins". Bush has a closet full waiting to emerge. People are getting bored with cover ups and spin. 2000 may see the end of the Bones influence or--reality that these Bones people are powerful.

KM - Is the 'name' of the German group known?

AS - Almost certainly Illuminati.

KM - Some people say that there are other 'cells'; what do you think?

AS - There are many other secret societies. I've only looked at S&B. Unfortunately no historian will keep his job if he tries to explore conspiracy...this is taboo for the American Historical Association. Sooner or later outsiders will take a look. I've long thought that S&B fits the legal definition of a conspiracy and needs to be officially investigated. Yes there should be other cells. No secret society worth anything is going to keep its inner actions written down on paper. If the gigantic electronic monitoring apparatus is for national security purposes; then it should be monitoring these people 24 hours a day.

KM - What are your thoughts on Wolf's Head? Scroll & Key? And the other Senior societies at Yale?

AS - Wolfs Head, Scroll and Key seem to be pale imitations of S&B, but they have the same objective of deliberately building discrimination into a society. I listened to Jesse Ventura last night and he made the point that the Founding Fathers intended for CITIZENS to represent the people. I agree, a trucker, a farmer, a teacher--represents the people not a bunch of professional pols or a secret society like S&B. All these societies place their own members ahead of the pack and give preference to their own members--this is discrimination par excellence.

KM - Have you read Cathy O'Brian's book Trance-Formation Of America? What do think of it?

AS - The book does not contain one piece of hard physical evidence.. I think Cathy O'Brien BELIEVES SHE IS TELLING THE TRUTH . . . but remember that Mark Phillips is a skilled neuro-linguistic-programmer. Another point that really concerns me is this...where did this story originate? It originated in Communist Chinese Intelligence and

Mark Phillips had a contractual relationship with the ChiComs. This could be an attempt to destabilize the US. No doubt these Washington pols are fully capable of these weird practices, just look at Bohemian Grove but that doesn't mean that the book is an accurate portrayal. If the book is credible I would think the police would have raided Bohemian Grove long ago.

My best guess is that the Chinese picked up whispers of Washington scandals and blew them out of proportion for their own purposes. This is a GUESS...I don't know. One thing that puzzled me, with all these sexual shenanigans how do Washington politicians find time to do anything else? According to the book this is a full time occupation for Senator Byrd and others.

KM - What did your study of elites, economics, secrecy and technology do for your career?

AS-Depends what you mean by "career"? By conventional standards I am an abject failure. I've been thrown out of two major Universities (UCLA and Stanford), denied tenure at Cal State Los Angeles. Every time I write something, it appears to offend someone in the Establishment and they throw me to the wolves. On the other hand I've written 26 books, published a couple of newsletters and so on...even more important I've never compromised on the truth And I don't quit. In material terms...hopeless failure. In terms of discovery...I think I've been successful. Judge a man by his enemies. William Buckley called me a "jerk". Glenn Campbell, former Director of the Hoover Institution, Stanford called me "a problem".

KM - Do you believe that there has been suppression of technology? Has it been major or minor?

AS - Yes there has been suppression but its going to be impossible to suppress the new emerging paradigm.

KM - The Federal Reserve, the House of Morgan, House of Rothschild and Skull and Bones are they related?

AS - Best source for this is a book by me THE FEDERAL RESERVE CONSPIRACY, 1995 CPA, PO Box 596, Boring OR 97007.

KM- On Skull and Bone's influencing John Dewey and Horace Mann; are there good source materials to follow that story?

AS - Depends what you want to find. You could explore the 10(?) volume works of Dewey... outrageous Hegelianism, the state is supreme, the individual merely a pawn to be trained. This is the basis of our 'educational system"...or you could go and explore the members of S&B who brought the system to the US. This trained "sausage mind" outlook has thoroughly permeated our universities--that's why we have the peer review system...we are all supposed to think alike and find the same answers. This political correctness garbage is another step to total thought control.

AH - Did any of Hitler's economic policies threaten the interests of the international bankers, and if so did that play a role in his downfall?

AS - Hitler's economic policies were OK'd by the bankers right through the war...ITT, Chase, Texaco and others were operating in Nazi-held France as late as 1945. In fact Chase in Paris was trying to get Nazi accounts as late as 1944. When we got to Germany in May 1945, I remember seeing a (bombed-out) Woolworth store in Hamburg and thinking, "What's Woolworth doing in Nazi Germany?" While we were bombed and shelled it was "business as usual" for Big Business. Try the Alien Custodian Papers. See my BEST ENEMY MONEY CAN BUY for more information. Union Banking is very important. I made a documentary for Dutch National TV some years ago. It got all the way through the production process to the Dutch TV Guide...at the last minute it was pulled and another film substituted. This documentary has proof of Bush financing Hitler--documents. Maybe my Dutch friends will still get it viewed, but the apparatus reaches into Holland.

KM - What is the story that was going to be told on Dutch TV? And what is the story of it's censorship?

AS - Couple of years back, a Dutch TV production company from Amsterdam--under contract to Dutch National TV--came to US to make documentary on S&B. They went to the Bones Temple and other places and interviewed people on East Coast. On West Coast, they interviewed myself and one other person. I saw extracts from the original and it is a good professional job. They had documents linking Bush family and other S&B members to financing Hitler through Union Banking of New York and its Dutch correspondent bank. More than I have in WALL STREET AND THE RISE OF HITLER. The first version was later upgraded into a two part documentary and scheduled for showing this last March. It was pulled at last minute and has never been shown.

AH - Who has been financing Milosevic, and what role has the international banking community played in the Balkans?

AS - I haven't looked at this one. Of course the notorious Black Hand society is located in the Balkans. See WW One.

DG - What is the importance of your work on Skull and Bones?

AS - The potential is extraordinary. IF we find that secret societies are indeed significant the entire history of the last two centuries will have to be re-written. At this point in 1999, the potential has not been explored by others and I've moved back to my original interest--technology. Apparently people see some merit in the work. It is never advertised. It is an underground word of mouth distribution but has sold steadily from 1986 to date. Every month I get a royalty check, so I know it is selling. But my original enthusiastic statement has not been fulfilled.

KM - What do you see for the future?

AS - Chaos, confusion and ultimately a battle between the individual and the State. The individual is the stronger; and will win. The state is a fiction sanctified by Hegel and his followers to CONTROL the individual. Sooner or later people will wake up. First we have to dump the trap of right and left, this is a Hegelian trap to divide and control. The battle is not between right and left; it is between us and them. The message is getting through. ASE has sold for 15 years, small but steady. No advertising. Its an underground work. But the breadth of interest is amazing. From Black Africa, to Russia (12,000 copies), right, left...it cuts across all ethnic, political, social lines...The spirit of God is within us as individuals. Skull & Bones represents death. It has no life spirit and pretends that the State "is the march of God on earth". The thinking of immature juveniles, deadly and destructive and has almost totally infected Washington. What to do? Find yourself and then go to work.....tell your friends and put out the message. The answer is within you. _____ Antony Sutton, is the author of 26 books, many of which can be purchased on-line at Amazon or Barnes & Noble. Liberty House Press at 1-800-343-6180 has copies of America's Secret Establishment and Best Enemy Money Can Buy for sale. New York Editors . . . In talking to a magazine in New York that is working on a feature story on George ' W ' Bush and was thinking of doing a piece on S&B. I asked how about a sidebar on Antony Sutton? After getting responses peppered with phrases such as; "Someone is claiming he's a John Bircher" and; Here is what one editor (who shall remain nameless) had to say about Sutton:

"Liberty House was/is a right wing publishing company located in Billings, Montana. Anthony Sutton was a research fellow at Stanford's Hoover Institution. Among many other claims, Sutton's book accuses Skull and Bones of funding and encouraging "the Maxist/Leftist '60s revolution"....and diverting attention by drawing students into disarmament and/or environmental groups and issues. Although there seems to be some real info in his book, it reads like a classic text of right-wing propaganda, filled with hyperbole and unsourced allegations" Antony Sutton's response:

What's wrong with these editors? I was thrown out of the Hoover Institution by the CIA types....I am definitely persona non-grata. Director Glenn Campbell actually threatened me: "you will not survive."

Some right winger!! I've never been a member of the Birch Society or any society come to that. I'd like to have that Editor say that to my face. They're sick! Get his comments on the above...and have him come up with some proof. What's the legal definition of slander...it has to be untrue and malicious. Do they have any money? When it comes right down to it the NY people didn't even read my book...else they would know that I see the right-left approach as a Hegelian trap...as for lack of evidence Ill leave that to the readers. On second thought they probably never heard of Hegel. When Lenin referred to 'useful idiots' he must have had these people in mind.
