**Tips for Biking Smart**

- Use lights at night (white to the front and red to the back) and reflectors on your bike.
- Use a U-lock to lock your frame and at least one wheel to a bicycle rack or immovable object. For added security, secure your other wheel with a second lock.
- Use a bell or by saying, "on your left." Make it easy for drivers to see you: avoid weaving between parked cars, and ride with the direction of traffic.
- Use a white headlight and a red taillight.
- Make sure your bike's seat is at a comfortable height.
- Always check your surroundings before turning or changing lanes.
- Wear a helmet to protect your head in case of an accident.
- Wearing high-visibility clothing or accessories can help you be seen more easily.
