

## IVY TECH ASAP PROGRAM

**Attention Seniors!** If you are still undecided about where you want to go to college next year, why not consider Ivy Tech's Accelerated Associates degree program (ASAP)?

The ASAP Program in Anderson still has several spots left for interested students. Through the Ivy Tech ASAP program students have the ability to earn their Associates Degree in 11 months and transfer all of those credits to a 4-year institution. If you are interested in this program please fill out an interest form by clicking on the logo below.

Below are some important points when it comes to ASAP:

- 1) Students in ASAP earn a two-year associate's degree in only eleven months. For many students, this means that they can earn a bachelor's degree in three years if they transfer to a four-year school afterward.
- 2) Classes taken through ASAP are the same cost per credit hour as all other Ivy Tech classes.
- 3) While in ASAP, students benefit from a structured support system. Students in ASAP move through classes as a cohort, creating a supportive learning community. Additionally, significant faculty and staff mentoring and support are built into the program.
- 4) ASAP collaborates with four-year colleges across the state in order to ease the transition and to help our ASAP students transfer. Transfer representatives from schools across the state are invited to speak with the students – this is based on student need and interest.
