

Faster, Better, More Economical Data Extraction and Loading

What is A2B Data™?

- Cloud based Software-as-a-Service (SaaS) product
- Designed to handle large volume and variety of data
- For any to any data movement
- Substantially reduces development and testing time for any data extraction, replication or conversion project
- Will create the foundational Staging area for any data warehouse or data mart in a matter of minutes – not days

Schedule a Demo: sales@a2bdata.com

Business Benefits

- ▶ Faster, Better, More Economical way to extract and load data for your data warehouse, operational data stores, and data marts
- ▶ Ensures consistent, reliable data extraction and load processes
- ▶ Significantly reduces project costs and time for ETL development, testing, production and support
- ▶ Enables deploying staff to other tasks - applying their expertise where it matters

Key Features

- ▶ Automatically creates data extraction and load processes
- ▶ Incorporates CDC to capture source table changes quickly
- ▶ Monitoring dashboard to view process execution statistics
- ▶ Automatically converts data types from source RDBMS to target
- ▶ Creates historical staging area for subsequent processing by analytical tools or loading into your data warehouse
