WATER DOWSING SCHOOL

School Instructors: Leroy Bull, Jim Linn, Keith Schaffer, Leedra Yablonsky, Tick Gaudreau

In this course, you will learn and practice how to locate underground water sources, direction of flow and water quality using simple dowsing tools.

Fresh potable water is essential for all life on Earth. Even though the Earth's surface is 70% water, only 1% is fit to drink. Locating potable water is fundamental to dowsing. This day-long course will give you the opportunity to learn all aspects of water dowsing from the best that ASD has in their ranks. We will cover dowsing tools, geology of water, writing your dowsing program, asking the right questions to determine quality, flow rate, hydrostatic levels, possible contaminants and hazards to the driller. In addition, we will cover drilling methods, how to build relationships with drillers, and advising your customer about drilling methods and what to expect from drillers. We will cover map dowsing, moving water veins and do possible field work to locate, assess and map potable water veins and determine the best spot to drill. Gain the confidence and techniques necessary to become a competent water dowser.

Water dowsing is an ancient human and animal practice dating back to early in humanity's history.

The Water Dowsing Course is a full day of learning and practicing Water Dowsing. Water Dowsing instructors, gathered by former ASD president Leroy Bull, will be on hand to teach you, learn with you and discuss upcoming issues.

Dowsing tools will be provided, but you are also encouraged to bring along your favorite tools and your body.

REPAIR THE BPF – THE DNA’S COMPUTER OPERATING SYSTEM –

Aaron and Sue Singleton

Medical Intuitives-Healers Aaron and Sue Singleton define the bioplasmic field (BPF), your body’s intelligence system, which stores critical information about bodily functions, cellular replication and cell death. It functions like a computer operating system, without which critical bodily programs cannot function optimally or at all. Learn how it relates to the aura, body and DNA. Data in the BPF can be damaged or its connection with the body scrambled by toxins, injuries, electricity, emotional or karmic imprints, etc. Examples: following gallbladder removal, the BPF may still transmit sick gallbladder data, adversely affecting healing. Phantom limb and organ pain originate in the BPF, and other people’s energy may be stuck in your BPF. Learn how to evaluate and heal the bioplasmic field for yourself and others, as well as to re-connect, synchronize and align the bioplasmic field with various critical systems, including the chakras, glands, organs. For experienced energy healers only.

CHANGE YOUR FREQUENCY, CHANGE YOUR WORLD – Peter Blum

Along with Himalayan singing bowls, participants will be introduced to shamanic journeying, using frame drum. Additionally, we will explore how tuning forks, a more modern, and precisely calibrated tool, can be used for brain wave entrainment, as well as direct application to specific spots on the body to relieve pain and tension.

GEOPATHIC STRESS: THE CHALLENGES OF DISTANCE DOWSING AND HEALING - Robert Egby

It's a heart-rending cry: "Why didn't somebody tell me?" Every day untold numbers of people suffer -- and some die! -- from the effects of Geopathic Stress, a toxic Earth energy gone terribly wrong. Government and Society wrongly claim that dowsing is scientifically unproven. In just three years Egby using simple remote healing techniques has brought relief to almost 400 homes and buildings world-wide. Through Investigative Dowsing Studies Egby has shown geopathic stress dangerously affects many public buildings such as schools and public facilities. In this workshop participants are taken through the process of Remote Dowsing and Healing and how to organize and be affective as a working Dowsing Service. Participants need a sound knowledge of Google Earth (which is free) and an ability to dowse and mentally project oneself to a target. The workshop comes with a 20-page detailed instruction booklet.
