

FORESTRY BUCKET TRUCKS

To ensure that Dur-A-Lift helps our customers get the job done right, we're committed to the idea that customization comes standard. Instead of a one size fits all approach, we build lifts made just for you. Check out these bucket trucks that are built specifically for the tree care industry.

2 UNIQUE LIFTS FOR THE TREE CARE INDUSTRY

Reach up to 50 feet with the **Urban Forestry Unit** and up to 75 feet with the **DAT3-70**. Big or small we have a truck for you.

DAT3 SERIES

Working heights to 75 feet and a side reach to 48 feet. This forestry truck features a non-overcenter design for added stability and side reach and an innovative telescopic upper boom that allows you to reach where you couldn't before.

URBAN FORESTRY UNIT

The Urban Forestry Unit is the only Class 5 bucket truck in the industry with a reach of 50 feet allowing it to get places much larger lifts cannot. Features a 7 cubic yard, steel or aluminum chipper box with hydraulic cylinder dump.
