Life Sustaining Business/Essential Critical Infrastructure Update

On behalf of the management team, along with all of our associates, I am writing to inform you our company will remain open to assist critical customers with needed engineering support, products, components and/or assemblies.

Cablecraft Motion Controls has been classified as a Life Sustaining Business and considered Essential for Critical Infrastructure Support.

Whether you are an existing customer, or a new customer with an emergency, we are here to help! Our design and Manufacturing engineers are standing by to assist with expedited support to tool up and begin manufacturing new products, many times within days or weeks. Cablecraft can manufacture to print, reverse engineer with a sample part or develop a brand-new product based on your specific requirements.

Cablecraft Motion Controls is an Indiana based linkage, rod end, ball, joint and cable manufacturer located in four locations, New Haven IN, St. Mathews SC, Tacoma WA and Hailsham UK. Cablecraft Motion Controls manufactures the following products that are essential and critical for the functionality of the US healthcare system, the ongoing care of US citizens, or the ongoing operations of essential critical infrastructure:

1. Linkages, rod ends, ball joints Cables used on Military, Agricultural, Construction, Mining, Turbine and power transmission equipment, On-highway truck, bus and rail equipment.
2. Pins used on on-highway truck and bus equipment.
3. Linkages, Rod Ends, ball joints and Cables used on medical furniture and beds used in Hospitals.

Cablecraft Motion Controls is continuing to operate our manufacturing facilities to meet industry needs for these critical products. We know it is imperative for the healthcare of US citizens and American critical infrastructure that Cablecraft does everything it can to continue to operate the manufacturing facilities located at the above locations at 100% capacity.

Cablecraft Motion Controls has instituted strict safety and health protocols recommended by Occupational Safety and Health Administration as well as the Center for Disease Control and Prevention to protect our employees, suppliers and customers

We believe that at this time of uncertainty we are called to do our part to make the world safer, healthier and more productive. We solve the most difficult mechanical motion control problems.

Sincerely,
Cablecraft Management Team
