

EpochField Administrator

Unifying The EpochField web application experience, EpochField Administrator web application provides a suite of automated tools to perform necessary industrial administrative tasks.

These tools conveniently handle all the non-intuitive, granular, multi-step tasks that EpochField application administrators were required to perform themselves in previous releases.

- ✓ Manage Dispatch Areas and Service Territories.
- ✓ Validate and upload configuration files for EpochField Mobile.
- ✓ Validate and upload role/group/user configurations via CSV files – bulk administration.
- ✓ Set the duration of time before users must re-login to the web application.

Intuitive Administrator Tools

Administration control over users, groups, and roles gives the administrator the ability to create users and assign specific roles to those users, and assign them to groups.

EpochField Mobile configuration management in Epochfield Administrator abstracts the complexity of publishing configurations, giving the mobile app administrator the ease of a few clicks to publish to mobile users in the field.
