## EDUCATION SCHEDULE 2021 (JAN-JUN)

*Scheduled dates subject to change. Courses are four days each.  
Custom courses/dates take priority.*

MONTH	DATE/WEEK	4-DAY COURSES
JAN	1/4/2021	UniData Fundamentals
	1/11/2021	MultiValue Programming
	1/18/2021	UniVerse Fundamentals
	1/25/2021	UniVerse Administration
FEB	2/1/2021	UniData Administration
	2/8/2021	MultiValue Programming
	2/15/2021	System Builder+ Essentials
	2/22/2021	UniVerse Fundamentals
MAR	3/1/2021	No Classes
	3/8/2021	SB/XA Essentials
	3/15/2021	UniVerse Administration
	3/22/2021	No Classes
	3/29/2021	SB/XA Essentials
APR	4/5/2021	MultiValue Programming
	4/12/2021	UniData Administration
	4/19/2021	UniVerse Administration
	4/26/2021	UniData Fundamentals
MAY	5/3/2021	UniVerse Fundamentals
	5/10/2021	System Builder+ Essentials
	5/17/2021	UniData Fundamentals
	5/24/2021	UniVerse Fundamentals
	5/31/2021	No Classes
JUN	6/7/2021	MultiValue Programming
	6/14/2021	UniVerse Administration
	6/21/2021	System Builder+ Essentials
	6/28/2021	UniData Fundamentals

## Brief description of course content

**UniVerse Fundamentals:** This course is designed for end-users, managers, system administrators, and programmers new to the UniVerse database environment who need to understand basic concepts of the powerful MultiValue database.

**UniVerse Administration:** Learn how to manage a UNIX or Windows-based UniVerse relational database management system. Learn how to install and configure the software, manage data files, define and maintain security, and monitor system performance.

**UniData Fundamentals:** This course is designed for end-users, managers, system administrators, and programmers new to the UniData database environment who need to understand basic concepts of the powerful MultiValue database.

**UniData Administration:** Learn how to manage a UNIX or Windows-based UniData relational database management system. Learn how to install and configure the software, manage data files, define and maintain security, and monitor system performance.

**MultiValue Programming:** This course is designed for programmers new to the MultiValue BASIC language as well as those with limited experience who wish to expand their knowledge.

**MultiValue Advanced Programming:** This course is no longer available.

**System Builder+ Essentials (SB+):** This course introduces novice and seasoned programmers to the functionality and concepts of the SB+ Rapid Application Development environment.

**SB+ Advanced Development:** This course builds on the knowledge and experience of the SB500 course. It is recommended the SB500 course be taken first but it is not required. The advanced course focuses more on the building blocks of the SB environment.

**SB/XA Essentials (System Builder Extensible Architecture):** This course is designed for programmers familiar with the System Builder application development and those who wish to move to the SB/XA environment.
