City: _____ **State:** _____ **Zip Code:** _____

Race: ___ White ___ Hispanic/Latino ___ Black/African American ___ Native American/Alaska Native ___ Asian ___ Native Hawaiian/Other Pacific Islander ___ Other

Email: _____

MEDICAL HISTORY: Complete the following questions for the individual receiving the vaccine. If you answer “YES” you may not be able to receive the COVID-19 vaccine.

*If YES refer to Pfizer website at www.PfizerMedInfo.com . For Moderna COVID-19 vaccine www.modernatx.com . For Janssen COVID-19 vaccine www.janssencovid19vaccine.com . Refer to Pre-vaccination Checklist for COVID-19 Vaccines Information for Healthcare Professionals (cdc.gov) to clarify further questions. www.cdc.gov/vaccines/covid19/downloads/pre-vaccination-screening-form.pdf .	*YES	NO
Have you had a previous COVID-19 vaccine? If yes, what type and date?		
Have you had any vaccines within the previous 14 days? Pfizer-BioNTech, Moderna, or Janssen COVID-19 vaccine should be administered alone with minimal interval of 14 days before or after any other vaccine.		
Do you have a fever today? Are you sick today? Do you have COVID-19 infection and are currently in isolation? Are you currently in quarantine for known exposure to COVID-19?		
Have you ever had severe allergic reaction (anaphylactic reaction that required treatment with EpiPen or treatment at a hospital) to any vaccine(including Pfizer-BioNTech, Moderna, or Janssen COVID-19 vaccine), or vaccine component (including polyethylene glycol [PEG] in medications or laxatives and preparations for colonoscopy), or immediate allergic reaction of any severity to polysorbate in vaccines, coated tablets or IV steroids (due to potential cross-reactive hypersensitivity with the vaccine ingredient PEG) or injectable therapy? This would include an allergic reaction that occurred withing 4 hours, such as difficulty breathing, hives, swelling of your face and throat, fast heartbeat, bad rash all over your body, dizziness, and weakness.		
Have you ever had a severe allergic reaction (anaphylaxis) to something other than a component of COVID-19 vaccine or any vaccine or injectable medication such as food, pet, venom, environmental, or oral medication allergies?		
Do you have a bleeding disorder or are you taking a blood thinner? If so, a fine gauge needle (23 gauge or smaller caliber) should be used to administer the vaccine, followed by firm pressure without rubbing for at least 2 minutes.		
Do you have dermal fillers? If swelling occurs at or near the filler injection site, usually face or lips, patient should contact their health care provider.		
Are you pregnant, breastfeeding, or planning to become pregnant? Women in this group may receive Pfizer- BioNTech, Moderna, or Janssen COVID-19 vaccine. A discussion with your doctor can help make an informed decision.		
Are you immunocompromised? Do you have a condition that weakens your immune system? Are you receiving any immunosuppressive therapy? You are still eligible to receive Pfizer-BioNTech, Moderna, or Janssen COVID-19 vaccine unless you have a contraindication for some other reason. However, you will need special counseling about the vaccine.		
Have you received monoclonal antibodies or convalescent plasma as part of COVID-19 treatment? Pfizer-BioNTech, Moderna, or Janssen COVID-19 vaccine should be deferred for at least 90 days to avoid interference of treatment with vaccine-induced immune responses.		
NOTE: Recipients of Janssen COVID-19 vaccine should be instructed to seek immediate medical attention if they develop shortness of breath, chest pain, leg pain or swelling, persistent abdominal pain, neurological symptoms (including severe or persistent headaches or blurred vision), nausea, vomiting, petechiae or easy bleeding beyond the site of vaccination within 4 to 30 days of receipt of Janssen vaccine. Most people who have developed blood clots and low platelets were females ages 18 through 49 years		
NOTE: Depending on vaccine type, a second dose of COVID-19 vaccine may be due in 21 days or 28 days after initial vaccine. Refer to your COVID-19 vaccination record card for second dose due date. Contact your vaccination provider, PCP, or your ADH Local Health Unit in 21 days or 28 days for more information. Keep your COVID-19 vaccination record card for your records for proof of initial vaccine date. Janssen COVID-19 vaccine is a ONE dose series.

RELEASE AND ASSIGNMENT:

- I have read or had explained to me the Vaccine Recipient Emergency Use Authorization (EUA) Fact Sheet for COVID-19 vaccine risks and benefits. To read the Vaccine Recipient EUA Fact Sheet for Pfizer COVID-19 vaccine, Moderna COVID-19 vaccine, or Janssen COVID-19 vaccine visit <https://www.cdc.gov/vaccines/covid-19/eua/index.html> or you may also visit your Local Health Unit or PCP to receive a printed copy of the EUA Fact Sheet.
- I give consent to this COVID-19 provider/staff for the individual named below to be vaccinated with COVID-19 vaccine.
- I hereby acknowledge that I have reviewed a copy of the Provider’s Privacy Notice.
- I understand that information about this COVID-19 vaccination will be included in (WebIZ) Arkansas Immunization Information System.

To My Insurance Carrier(s):

- I authorize the release of any medical information necessary to process my insurance claim(s).
- I authorize and request payment of medical benefits directly to this COVID-19 Provider.
- I agree that the authorization will cover all medical services rendered until I revoke the authorization.
- I agree that the photocopy of this form may be used instead of the original.
