ADVANCED CHEMICAL CONCEPTS, INC. Successfully Passes Responsible Distribution Verification, Sustaining Commitment to Health, Safety, Security, and Environmental Performance

Kentwood, MI – Today, Advanced Chemical Concepts, Inc. announced that it has successfully passed its NACD Responsible Distribution® verification for the current three-year cycle, reaffirming the company's commitment to the health, safety, and security of its employees, communities, and the environment. Responsible Distribution is the National Association of Chemical Distributor's (NACD) third-party verified environmental, health, safety, and security program that allows members to demonstrate their commitment to continuous performance improvement in every phase of chemical storage, handling, transportation, and disposal.

"Responsible Distribution is critical to the chemical distribution industry's ability to safely deliver more than 30 million tons of product every year," said NACD President and CEO, Eric R. Byer. "Through their successful verification, Advanced Chemical Concepts, Inc. and its senior leadership have committed to the continuous improvement in the chemical distribution industry's responsible management and handling of chemicals that ensures NACD members effectively support the industries America relies on most, like agriculture, healthcare, oil and gas, manufacturing equipment, and many others."

The Responsible Distribution program requires on-site, third-party verification of facilities against a set of guiding principles, including strict adherence to laws and regulations and participation with interested entities in creating responsible laws, regulations, and practices to help safeguard the community, workplace, and environment.

Participation in Responsible Distribution has significant benefits, including lower instances of safety and environmental incidents, better documentation of company policies, better communication with local communities, reduced audit time and costs, and increased credibility.

Another valued step in ACC's continual development of win/win and sustainable long-term relationships.

###

Advanced Chemical Concepts, Inc. mission and dedication to quality assurance is to bring added value to both our customers and our supplier partners. We accomplish this by creating sustainable win/win relationships, offering cutting edge technology, supply chain efficiencies, and most importantly maintaining the highest level of integrity. Our product and service standards are driven by a detailed Quality Management Program, requiring a committed team effort and ongoing improvement on behalf of management and employees. Innovation is who we are, applying new ideas and emerging technologies to generate positive results in real-world situations. Our commitment to measurable quality standards, "Customer First" philosophy, and pragmatic culture are the core building blocks to ACC's foundation.
