

COE STUDIOS

ARCHITECTURAL LIGHTING

Introducing the heavy bronze **Coe Studios LED Footlight** with 12V or 120V setup. These are great options for customers who want to minimize bulb changing or are concerned about the heat of the lamp. These bulbs look especially nice with the new glass lenses, available in clear or frosted. The frosted lens gives a "rice paper" quality to the light. See below for more details.

Coe Studios Solid Bronze Footlight with LEDs

Dimensions:

H 4-3/4" x W 4-3/4" x D 2"

Weight: 2.5 lbs.

12V Solid Bronze Footlight with LED

Model #FL-LED-12V

Coe Studios Footlight with 12V warm white LEDs. This particular bulb directs the light downward, so no light is lost inside the housing. This creates the highest efficiency at a mere 4 watts. The bulb emits no heat and lasts 50,000 hours. We supply one 12-volt LED bulb. Please specify voltage.

360 lumen output (warm white)

240mA@12 VDC.

4 Watt usage

18Watt equivalent light output

3000K Warm White

120V Solid Bronze Footlight with LED

Model #FL-LED-120V

Coe Studios Footlight with 120V warm white LED. We have been experimenting with LEDs since their introduction. Recently, we found a bayonet bulb with a small form factor, with equivalent light to 15W 120V. The bulb emits no heat and last 50,000 hours! We supply two 120-volt warm white LED bulbs.

Please specify voltage.

360 lumen output

1 x 100mA@120VAC

4 Watt usage

15 Watt equivalent light output

3000K Warm White
