

CrowdBureau® Peer-to-Peer Lending and Equity Crowdfunding Index (CBP2PTR)

MONTHLY RESULTS: JANUARY 2019

The CrowdBureau® Peer-to-Peer Lending and Equity Crowdfunding Index (CBP2PTR) was up 21.91% at the end of January, reversing the steep decline in December 2018 and the full year 2018. The index performance during January 2019 exceeded nearly 3X the total return registered in the year prior. This dramatic turnaround coincided with the Federal Reserve Bank's shift in its stance on interest rates and how it manages its balance sheet in near term. The S&P 500 Index rose 8.0% while the Dow Jones Industrial Average picked up 7.1%. Both benchmarks were eclipsed by small cap stocks that posted a total return gain of 11.3% based on the Russell 2000 index. European, Asian and China's markets also bounced back with returns ranging from 6.6%, 6.8% to 11.06%, respectively. (See Chart 1)

Market sentiment changed in a positive way when Federal Reserve Chairman Jerome Powell signaled that the Federal Reserve Open Market Committee was taking additional rate increases off the table and rethinking how fast the central bank would let its balance sheet shrink. Non-farm payrolls released by the Labor Department Friday showed that the U.S. economy added 304,000 jobs in January, surpassing an expected 170,000. The unemployment rate rose to 4% in January from 3.9% in December. The rise was attributed to the government shutdown and an expansion of the workforce as more people sought jobs. At day 211 (February 1), discussions regarding the trade deficit took center stage with the U.S. forging ahead with scheduling an in-person meeting with China. Corporate earnings estimates are coming down and signals that the global economy is slowing, however, there is no indication of a recession but an indicator to remain cautious given U.S. and China trade discussions loom.

U.S. Economy Reflects Continued Strength

On the basis of both the number of constituents and market capitalizations, the CrowdBureau® Peer-to-Peer Lending and Equity Crowdfunding Index (CBP2PTR) is dominated by U.S.-based companies with each classified as one of the four index segment definitions. Namely peer-to-peer lending and equity crowdfunding platforms; financial institutions with dedicated peer-to-peer lending or equity crowdfunding platform; social network(ing) platforms that offer or plan to offer peer-to-peer lending or equity crowdfunding services; and, providers of technology and software solutions to the peer-to-peer lending and equity crowdfunding industry.

Company specific earnings driven results aside, these 22 U.S. firms, account for more than 51% of the index by weight as of year-end 2018; and, were powered higher by the same factors that contributed to the market rally in January. At the same time, the peer-to-peer lending platforms, in particular, also rallied as small cap companies that benefited from indicators reflecting the continued strength of the underlying U.S. economy. While Lending Tree, Inc (TREE) currently exceeds the small cap range of \$2.0 billion, the other three firms fall well within the small cap span, including Lending Club Corp. (LC), On Deck Capital, Inc. (ONDK) and GreenSky, Inc. (GSKY). Together, these four stocks posted an average gain of 24.7% in January, falling within a range of 14.94% to 34.9%. These companies have yet to announce fourth quarter earnings results. (See Chart 2)

Slower Economic Growth Rate Reported in China

The International Monetary Fund's (IMF) 2019 and 2020 forecast indicates a slowing economic outlook for China, and news that China's economy expanded by 6.6% in 2018, was the slowest growth rate for the country since 1990. Moreover, consumer spending, factory activity and car sales all sagged during the fourth quarter of 2018, however, these factors didn't shake confidence in China-based online peer-to-peer lenders trading in the U.S. Conversely, eleven (11) of the twelve (12) China domiciled index member firms, all small cap companies may have benefited from the markets' rebound. These firms posted an average gain of 18.9%, ranging from a low of 0.23% to a high of 50.1%. The only exception was PPD AI Group (PPDF) that gave up -1.11% during the month of January. At the end of January, the company announced that PPD AI's total loan origination volume in the fourth quarter of 2018 increased by 19.2% versus the prior quarter and was facilitated with institutional sourced funds. This news ahead of the firm's earnings announcement which has not as yet occurred, lifted the stock slightly but was insufficient to erase the PPD AI's January decline. None of these companies have released earning results for the fourth quarter 2018. See Chart 3.
