

Dear {name},

Eight out of 10 Americans have or will suffer from back pain at some point in their lives. If you are among the 29 million diagnosed with diabetes, your minor to chronic back or knee pain could even raise your blood glucose levels. Even the simplest daily tasks put you at risk for back or knee injury, including:

- Clerical work, such as sitting at a desk or filing
- Gardening
- Running
- Cycling
- Frequent bending and lifting

Don't allow the crippling ache of back or knee pain dictate your life any longer. **You are entitled to treatment covered by Medicare or Insurance.**

Our team of dedicated, compassionate experts will schedule a home visit to customize a plan of remedy, including fitting you for a supportive back brace. Our professionals are able to prescribe you an easy-to-use support system that will aid in eliminating discomfort and pain. These clinically proven strategies are currently being used by thousands of others whom used to suffer just like you. Join them by letting us lead you to a healthier, happier lifestyle.

The first step to reducing your pain is one phone call away. However, supplies are limited.

Your eligibility status is currently **PENDING**.

IMMEDIATE ACTION BY PHONE IS REQUIRED TO CONFIRM YOUR ELIGIBILITY.

Call 1-8xx-xxx-xxxx 24/7 by **{date}** to claim your Medicare/Insurance covered treatment.

Sincerely,
The National Center for Pain
