

## Tropical Storm/Hurricane Preparations

In preparation of a storm surge and/or hurricane wind gusts, please do the following:

- Call building elevators up to the 2nd or 3rd floor before the rain starts
- Remove furniture, plants, etc. from all balconies and outside areas
- Raise garage doors up at least 2 feet to allow water to flow out
- Move valuables (power tools, tool chests, etc.) stored in your garage to a dry location
- Move your vehicles out of the garage to higher ground if you are on the bay (south and west) side of Sunset Bay Villas
- Secure your windows/glass doors with storm shutters if available

In past hurricane events the buildings closest to the bay on the south end of the complex (#12, 13, 16, 17, 18, 19, 20, 21, 22) got the most water in the garages
