ICMM’s Track 1
Tailings Aspirational Goal

Overview and Objectives

Dominic Fragomeni, Glencore
June 2020
Who is ICMM?

27 company members operate in over 50 countries

With the support of over 30 regional and commodities associations, we strengthen the environmental and social performance across the mining and metals industry.
What we do - our founding principles

ICMM Principles for sustainable development

1. Ethical business + sound governance
2. Sustainable development in decision making
3. Respect for human rights
4. Effective risk management
5. Health + safety performance
6. Environmental performance
7. Conservation of biodiversity + land use management
8. Responsible use + supply of materials
9. Social contribution
10. Engagement + transparent reporting
ICMM’s aspirational goal on tailings

Overview

• In late 2018, ICMM company member CEOs signalled their commitment to a long-term goal on tailings
• Members agreed to “work collectively to advance progress over the next 10-15 years towards developing superior and cost-effective alternatives to conventionally managed tailings storage facilities (TSFs) with the aim of reducing the risk of catastrophic failure”.

Three tracks of work to support progress towards the goal:
1. Reduce / eliminate tailings (>15 years)
2. Remove moisture from and strengthen tailings (5-10 years)
3. Strengthen operational performance for the design, operation and closure of tailings storage facilities (3-5 years)
Combined tailings production rate has increased by ~40% since the start of the decade.

Estimated Global Tailings Production 2010-2018 (Million Metric Tonnes)
## Technology Themes for Reducing Tailings

**4 technology themes and 5 groups have been selected**

### Technology Themes

**Precision Geology:** *Advanced geometallurgy (Enabler)*  
- Quantitative minerology,  
- Spectral imaging,  
- Data analytics (typhoon, AI, measure while drilling)

**Precision Segregation:** *Bulk Ore sorting*  
- Continuous bulk sorting  
- Batch sensing (truck and shovel)

**Precision Segregation:** *Advanced sensing and particle sorting*  
- Sensor hardware (quantum sensors) & software (quantum technology and AI)  
- Sensor calibration and verification  
- Advanced particle sorting

**Precision Mining:** *Preferential fracturing*  
- Fragmentation (high voltage pulse, microwave, laser, other)  
- Continuous Mining - Preferential Cutting in Hard Rock

**In-situ Recovery / In-situ Mining**
- Percolate ISR (underground and ISR reactors)  
- Well-to-well ISR for hard rock  
- Lixiviant development

- **Landscape Review**
  - Hatch identified ~90 technologies and with input from a sub-committee of AngloAshanti, Freeport, Glencore, Newmont, Rio, South32

- **Deep Dive and Prioritization (in progress)**
  - Based on TRL level, impact on tailings reduction, timeframe to commercialization

- **Goal to encourage collaboration and possibly contribute to the on-going work**

- **Aspirational goal therefore clear expectations are required**

- **Knock on Effects**
  - Energy reduction in (hoisting/comminution/trucking)  
  - Lower overall capital costs, water use  
  - Synergies ie: Fragmentation + Continuous Miners + Sorting
## Schedule of Implementation (Preliminary)

<table>
<thead>
<tr>
<th>Engagement Mechanisms</th>
<th>2020</th>
<th>2021</th>
<th>2022 onwards</th>
</tr>
</thead>
<tbody>
<tr>
<td>Priority 1: Technologies with high impact towards the aspiration goal and short implementation timeframe</td>
<td>Semi-structured interviews</td>
<td>Innovation Workshop &amp; Value Proposition</td>
<td>Joint collaborations</td>
</tr>
<tr>
<td>Priority 2: Technologies that are already commercially available</td>
<td>Suppliers database available for ICMM members</td>
<td>Vendor Engagement/Matchmaking</td>
<td></td>
</tr>
<tr>
<td>Priority 3: Technologies with high impact towards the aspirational goal, with medium to long timeframe for implementation</td>
<td>Semi-structured interviews</td>
<td>Value Proposition</td>
<td></td>
</tr>
<tr>
<td>Priority 4: Outside mining sector</td>
<td>Research of outreach mechanisms in other sectors</td>
<td>Key stakeholders engagement</td>
<td>Design Launch</td>
</tr>
</tbody>
</table>
Do you have a technology could impact on the ICMM Track 1 Aspirational Goal?

How do you get involved and participate?
