

ACO. creating
the future of drainage

PORTFOLIO

Executive Housing Development, Santa Cruz, CA

The Executive Housing development provides various residential housing options including corporate apartments and homes in the Santa Cruz Metro area.

Project Design Brief

To get permission to build an exclusive housing development in the hills above Santa Cruz, California, the developers had to build a series of amphibian tunnel and fence systems to allow the Santa Cruz Long Toed Salamander to migrate across the development to their breeding ponds.

Benefits

- ACO Wildlife recycled plastic tunnel entrance and fence systems were used to guide the salamanders into the tunnels.
- Local Conversation experts advised Granite Construction for locations of both the ACO Wildlife AT200 (8 inch wide) tunnel and the AT500 (18 inch wide) tunnel.
