

Radiology Faculty Job Posting
Division of Cardiothoracic Radiology
Department of Radiology
University of Michigan Medical School
Ann Arbor, Michigan

Job Summary: The Department of Radiology is recruiting a fellowship-trained cardiothoracic radiologist with high integrity and a strong commitment to professionalism to join our team of 17 cardiothoracic radiology faculty at either the Instructor, Assistant or Associate Professor or Professor level.

Our growing and diverse practice has the breadth, depth and scale for faculty at any career stage and with general or specialized interests anywhere along the spectrum from clinician-educator to clinician-scientist. We emphasize mentorship, career and leadership development.

The division performs and interprets the full gamut of cardiothoracic radiology examinations, including thoracic and cardiovascular CT and MRI, and CT-guided thoracic biopsies/drainage procedures. The division was responsible for nearly 145,000 examinations in the last fiscal year using state of the art digital portable & standard chest radiographic equipment with tomosynthesis capability, MRI, and CT scanners with low dose technology. Responsibilities include teaching a spectrum of learners (medical students, residents, fellows and ourselves too), and clinical, translational and/or basic research. We have many ongoing research programs within the Department, including close collaboration with our own Basic Sciences Division, and with colleagues across Michigan Medicine and the University of Michigan campus. The University of Michigan Medical School has the largest group of health services researchers in the United States at our Institute for Healthcare Policy & Innovation, and an excellent Faculty Development Program.

Cardiothoracic Radiology faculty enjoy close relationships with many disciplines, including Pulmonary and Critical Care Medicine, Thoracic Surgery, Cardiac Surgery, and Cardiovascular Medicine. We are active in many multidisciplinary programs including the Thoracic Cancer Program as part of our NCCN & NIH designated Comprehensive Cancer Center, Interstitial Lung Disease, obstructive lung disease, lung transplantation, cardiac oncology, cardiomyopathy, pediatric and adult congenital heart disease, aortic disease and TAVR, and cardiac electrophysiology/arrhythmia. These close collaborations provide a stimulating collegial atmosphere with numerous interdisciplinary clinical and research conferences. We strive to be the “leaders and best” in pursuit of excellence in clinical care, research and education

Required Qualifications: M.D. or equivalent, ABR-certified or has passed the core examination and on track to take the certifying examination within 15 months of completing residency, fellowship training in cardiothoracic radiology, and the ability to obtain a medical license in the State of Michigan. Evidence of clinical competence and competence in teaching is expected.

How to apply: Qualified applicants should send their CV and a letter of interest to:

Prachi Agarwal, M.D.
Division Director, Cardiothoracic Radiology
University of Michigan Health System
1500 E. Medical Center Drive; CVC #5582
