HAZON RECEIVES SECOND 333 EXEMPTION - CRISIS RESPONSE

5 MAY 2015

Virginia Beach, VA, May 5, 2015 – The FAA notified HAZON Solutions LLC (HAZON) of their approval to conduct Crisis Response services utilizing both fixed wing and rotor-wing UAV’s. HAZON is currently the leading US provider of small Unmanned Aerial Vehicle (sUAV) services for large organizations conducting commercial aerial infrastructure inspections.

“With the approval of our second Section 333 exemption, [Crisis Response] HAZON can now offer additional capabilities to our Utility and Transportation customers as well as State and Federal agencies during crisis and disaster response. We are proud that we will be able to respond to the call and support our first responders and infrastructure partners during times of need,” stated HAZON CEO, David Culler.

HAZON was the first UAS service company in Virginia to be approved to conduct commercial infrastructure inspections for Utility, Telecommunications and Transportation customers. Leveraging a highly successful FAA endorsed test program, HAZON has validated their ability to offer safe, effective and efficient sUAS operations while far exceeding customer expectations.

“The ability to assist during times of need is very satisfying and like our time in the service [Military], we take it extremely seriously.” said Sean Cushing, HAZON President. “When we [HAZON] are called to action, we will deliver excellent results with safety always the priority. Our motto is, 'Customer First – Safety Always!””
