This is an application for a grading permit exemption. It does not exempt you from other federal, state or local permits that may be required for the proposed activity. A sketch is required as part of this application. The sketch must indicate the distance between the location of the activity and buildings, roads, steep slopes (>10%), open water, wetlands and direction of overland water flow. On slopes 10 percent or greater, erosion and sediment control measures will be required on the downhill side of the disturbed area. Proposed activities within a wetland or shoreline (or their buffers) require review/approval by the Department of Natural Resources, Army Corps of Engineers, Maryland Department of the Environment and Calvert County. A copy of all permits or Letter(s) of Exemption must accompany this application

PROPOSED PROJECT INFORMATION

DESCRIPTION OF WORK:

DISTURBANCE: square footage, cut/fill amount (contact the Soil Conservation District with any questions) For required parking and site improvements Violation Correction (#)

Check all additional permits that will be required for this project: Building Electric Plumbing

I hereby certify 1. I read and understood the above requirements, 2. I have the authority to make this application, 3. The information given is correct, 4. I have discussed the proposed activity with the Calvert Soil Conservation District representative and understand the limitations of this exemption. I further understand that if I exceed the limits stated below or have not accurately disclosed the nature or location of the activity, this exemption is void. 5. All excavated material will remain on site within the Limits of Disturbance (LOD) as approved by SCS. 6. The activity will not occur within the 100' critical area buffer, the 50' buffer for non-tidal wetlands and/or the 50' buffer for streams outside the critical area, AND The total of all disturbed areas does not exceed 5,000 square feet, AND/OR The total volume of cut and fill does not exceed 100 cubic yards (which is approximately 7 dump truck loads), AND/OR no changes are made to the existing driveway or entrance, AND/OR Stormwater Management is not applicable, AND/OR the construction does not require a new/replacement septic system, AND/OR the construction is a retaining wall under 3' in height.
