The meeting was then turned over to Zabrina Gregg to present the HUD racial Disparity Data. Zabrina was able to give a definition of what the Racial Disparity information detailed and how our continuum was going to be a part of the solution to the trending information. She noted that she would have a better interpretation of the continuum's role in the data in the coming meeting.

Then the meeting was turned back over to Rae Sanchez and a correction to the next meeting date was made for September 19th instead of the 15th which was a typo. The meeting was closed out by Rae Sanchez having no more business to present to the board.
