

Concierge Care

Concierge care is a major part of the Health and Wellness Center, it offers patients a more personable, one on one relationship with a healthcare provider to focus on their overall health including but not limited to; prescription and disease management, education, preventative care, and health management. These services are offered through our Case Manager who will be able to spend time devoted to your health needs, provide advice and patient management, and while being someone you can trust, ease your stress, get the right answers and help you focus on a healthy life.

As part of this offering, the Case Manager will have access to Pinnacle care to provide expert care and advice. Pinnacle Care is a leader in providing concierge care and can offer Associates and their family's resources to connect with the leading health experts, specialists and advisors across the world. The Case Manager will be available for you to discuss any health situations with you in person or over the phone at 920-907-3924.

- ✓ Preventative/Health Maintenance
- ✓ Management of Chronic Diseases

The Health and Wellness Center is designed to provide primary and preventative care, disease management, patient education and wellness promotion services to Associates and their family members. The essence of the center is a focus on wellness with a centralized management of care through onsite providers. By offering this benefit, Associates and their families have access to high quality primary healthcare that is very convenient, offers personal one-on-one attention, encourages healthy lifestyles through a dedicated wellness focus and reduces Associates time away from work.

The on-site clinic is available for use by active Full-time and Part-time Associates, Spouses, Domestic Partners, and dependent children between the ages of 8-26. You must be able to show proof of medical insurance to use the clinic. Any full medical insurance plan will be acceptable – it is not required to be Grande’s medical plan.

Appointments are required; please call the clinic Receptionist to schedule an appointment. Hours of operation are subject to change. For the most current appointment openings, call the clinic Receptionist at 920-907-3922 or toll-free 855-289-7517.

The following list of services is not an all-inclusive list, but is a summary of services that are provided. If you are ever referred out of the onsite clinic for additional care (x-rays, MRI, specialists, etc.) those services will be the responsibility of the patient and billed through your insurance plan.
