

November 2017 update for Radius Capital Management

PERFORMANCE AT A GLANCE

Portfolio/Index	November Return	YTD Return To 11/30/17
Stock Portion of Radius portfolios (Radius 100)	+2.1%	+14.5%
Stock Portion of Radius Index portfolios (Index 100)	+3.2%	+16.0%
U.S. Stock Benchmark (Vanguard S&P 500 Index Fund)	+3.1%	+20.3%
Balanced Risk 75 Portfolio (target risk/volatility vs. S&P = 75%)	+1.4%	+10.7%
Bond Portion of Radius and Index portfolios	-0.0%	+1.3%
Bond Benchmark (Vanguard Total Bond Index Fund)	-0.2%	+3.0%

US and international stocks were broadly higher in November, with all market segments posting strong gains. Growth and Value stocks both did well, although Value put on a strong surge towards the end of the month. Time will tell if this is the beginning of a shift away from Growth and towards Value. Bonds were mixed in November, with the benchmark bond index closing the month down a scant **-0.2%**.

MARKET CHARACTERISTICS

Stock market volatility ¹	Very Low (monthly avg. = 11, month end = 11)
Business Cycle Phase	Late Expansion (seventh out of nine "innings")
Dominant Investment Style (active vs. passive)	Passive (index-based)

¹ In general, the higher the market volatility (as measured by the CBOE Volatility Index or VIX), the more the market is driven by investor emotions (greed and fear). Lower market volatility indicates a market environment based on fundamentals (economic growth, corporate earnings, etc.). The long-term average for the VIX is 20, 30 is considered high, 40 very high, and 50+ extreme.

LONG-TERM PERFORMANCE THROUGH 11/30/2017

The longer-term performance of the Radius portfolios continues to be strong. Since inception (1/1/2001), the Radius 100 portfolio has generated a net cumulative return of **+259%** (7.9% annualized) vs. a cumulative return of **+175%** (6.2% annualized) for the benchmark S&P 500 – with a comparable level of risk (i.e., standard deviation of monthly returns, maximum drawdown, and beta). Over the same time period, the more conservative Radius 60 (60% stock mutual fund, 40% bond mutual fund) portfolio grew **+210%** (6.9% annualized) vs. a **+159%** return (5.8% annualized) for its benchmark (60% S&P 500 Stock Index and 40% Total Bond Index).

Footnotes:

^a Returns for the Index portfolio prior to 7/30/2014 and Balanced Risk prior to 3/30/2015 are **back-tested** and not actual returns of accounts managed by Radius. Back-tested (simulated) performance results have certain inherent limitations. Unlike an actual performance record, simulated results do not represent actual trading. Also, since the trades have not actually been executed, the results November have under- or over-compensated for the impact, if any, of certain market factors, such as lack of liquidity. Simulated investment strategies in general are also subject to the fact that they are designed with the benefit of hindsight. No representation is being made that any account will or is likely to achieve profits or losses similar to those shown.

¹ The Balanced Risk 75 portfolio invests part of its assets in leveraged ETFs. These funds seek daily investment results – before fees and expenses – that are triple the return of stock (S&P 500, S&P Mid-Cap 400, Russell 2000), bond (20+ Year Treasury Bond), and commodity (gold, silver, oil) market indices. Using these leveraged ETFs results in greater volatility and a greater risk of loss.

Other Notes:

- Investment returns since the portfolio inception date reflect the (unaudited) performance of actual investment portfolios.
- For the period prior to its inception date, the returns for the Radius 20 are calculated using the actual returns from the Radius 100 and 60.
- All performance numbers include dividends and capital gains and are net of all transaction costs and management fees, but do not reflect the impact of taxes.
