

September 2020 update for Radius Capital Management

PERFORMANCE AT A GLANCE

Portfolio/Index	September Return	YTD Return To 9/30/2020
Radius 100 (100% stock mutual funds)	-2.4%	4.8%
Radius Index 100 (100% stock ETFs)	-4.2%	0.2%
U.S. Stock Benchmark (Vanguard S&P 500 Index Fund)	-3.8%	5.5%
Balanced Risk Max (target risk/volatility same as S&P 500)	-2.9%	7.7%
Radius Bond (100% bond mutual funds)	0.2%	2.2%
Radius Index Bond (100% bond ETFs)	-0.2%	4.5%
Bond Benchmark (Vanguard Total Bond Index Fund)	0.1%	7.0%

September is historically a difficult month for stocks, and 2020 was no exception. The benchmark S&P 500 was down 3.8% in September – although it is still up 5.5% year-to-date. The multi-asset Radius Balanced Risk Max portfolio fared better, giving up 2.9% in September and posting a gain of 7.7% YTD. Large Growth Stocks were the most penalized in September, falling 4.7% after a stellar 2020 run. Bond returns remained muted as the Vanguard Total Bond Index gained only 0.1% for the month.

Given the ongoing uncertainty around the outlook for the virus and the upcoming November election, we continue to recommend that investors remain prudent and expect further volatility in the near term. The best way to protect from long-term investment declines is to diversify one's investments across multiple, uncorrelated asset classes and investment strategies. Attempting to "time the market" is seldom a successful strategy and we would not recommend you do so.

MARKET CHARACTERISTICS

Stock market volatility [§]	High (monthly avg. = 28, month end = 27)
Business Cycle Phase	Mid/Late recession
Dominant Investment Style (active vs. passive)	Mixed

[§] In general, the higher the market volatility (as measured by the CBOE Volatility Index or VIX), the more the market is driven by investor emotions (greed and fear). Lower market volatility indicates a market environment based on fundamentals (economic growth, corporate earnings, etc.). The long-term average for the VIX is 20, 30 is considered high, 40 very high, and 50+ extreme.

LONG-TERM PERFORMANCE THROUGH 9/30/2020

The longer-term performance of the Radius portfolios continues to be strong. Since inception (1/1/2001), the Radius 100 portfolio has generated a **net** cumulative return of +327% (7.6% annualized) vs. a cumulative return of +268% (6.8% annualized) for the benchmark S&P 500 – with a comparable level of risk (i.e., standard deviation of monthly returns, maximum drawdown, and beta). Over the same time period, the more conservative Radius 60 (60% stock mutual fund, 40% bond mutual fund) portfolio grew +257% (6.6% annualized) vs. a +232% return (6.3% annualized) for its benchmark (60% S&P 500 Stock Index and 40% Total Bond Index).

Footnotes:

- Investment return numbers for the Radius 100 and Radius 60 reflect the (unaudited) performance of actual portfolios that have been invested since 1/2001. For the period prior to its inception date, the returns for the Radius 20 are calculated using the actual returns from the Radius 100 and 60.
- Returns for the Index portfolio prior to 8/2014, the Balanced Risk Basic and the Balanced Risk Plus prior to 4/2015, and the Balanced Risk Max portfolio prior to 11/2019 are **back-tested** and not actual returns of accounts managed by Radius. Back-tested (simulated) performance results have certain inherent limitations. Unlike an actual performance record, simulated results do not represent actual trading. Also, since the trades have not actually been executed, the results may have under- or over-compensated for the impact, if any, of certain market factors, such as lack of liquidity. Simulated investment strategies in general are also subject to the fact that they are designed with the benefit of hindsight. No representation is being made that any account will or is likely to achieve profits or losses similar to those shown.
- The Balanced Risk Plus and Max portfolios invest part of their assets in leveraged ETFs. These funds seek daily investment results – before fees and expenses – that are triple the return of stock (S&P 500, NASDAQ, Russell 2000), bond (20+ Year Treasury Bond), commodity (gold, oil), and real estate market indices. Using these leveraged ETFs results in greater volatility and a greater risk of loss.

- All performance numbers include dividends and capital gains and are net of all transaction costs and management fees, but do not reflect the impact of taxes.
